### Thought It Was a Boil

**DOCTOR SAID ABSCESS.**  
Mr. Gleason R. Young, Kingscroft, N.B., under date of Feb. 9th, 1918, writes us as follows:—"About five months ago, a lump came on my jaw-bone. I thought it was a boil, and after it had been there quite a while it began to get larger. I went to a doctor and he said it was an abscess and lanced it. He gave me a wash for it, so I went by his directions until it healed up, but it commenced coming again, and in about three weeks it broke itself. I thought it would get better, but it didn't. My neighbor advised me to get a bottle of Burdock Blood Bitters, so I sent and got a bottle, and by the time it was all gone, the abscess had disappeared, and now it is all better."

Burdock Blood Bitters will heal and dry up sores, ulcers, and abscesses, no matter how large or of how long standing. If you have never applied it to a cut, wound, sore or ulcer, just try it and see what soothing, healing, cleansing power it possesses. It takes out itching, stinging and burning, and promotes the growth of healthy flesh. So, too, when taken internally, by its power of eliminating all impurities from the blood and making that vital fluid rich, red and pure, it cuts off the origin and source of the foul matter that goes to make boils, pimples, sores, ulcers, abscesses and the like, and at the same time the purified and enriched blood creates healthy tissue where there was formerly, perhaps a sore full of pus.

Burdock Blood Bitters has been on the market for 40 years. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Adams, as blacksmith, he purchased the property and business, which he successfully carried on for the past forty-eight years. ## The Man Who Banished Corns

Blue-jay was invented by a scientist of distinction. By a man whose lifetime has been spent in the study of surgical dressings.

This is a master's method—correct, complete and efficient. And the millions of people who know it, never think of enduring a corn.

**All in One**

The first step is to stop the pain. This is done by removing all pressure—by the soft protecting ring marked A.

The next step is to gently cause the corn to disappear. This is done by the remarkable B & B Wax, which no corn can resist.

This bit of wax—marked B—is centered on the corn. It cannot spread. So, unlike old-time methods, it acts on the corn alone.

C is rubber-coated adhesive. This snugly wraps the application, protecting everything.

You apply this Blue-jay in a jiffy. The corn pain stops at once. The wrapping is comfortable and you forget it.

In two days you remove it and the corn can be lifted out. Only rare corns need a second application.

This is the scientific way, the easy, sure and right way to end corns. You will never return to any wrong method when you try a Blue-jay once. Try it tonight.
