THE HOME OF GOOD SHOES

Low Up-Keep Cost of Dominion Friction Surface Belting

Cost of maintaining equipment in the average plant is seemingly so small when compared with other costs that it is seldom considered seriously; but when totalled at the end of five years, represents a far greater expense than actual necessity demands.

Maintenance of belting is in itself an important item, because each repair means idle employees, idle machines and less production, the total cost of which is often greater than you would pay for better belting.

Dominion Friction Surface Belting is built for "service first" that its long, continuous performance may eliminate the necessity for repairs and replacements.

But it gives an added service in conserving power—the rubber that goes into it is a special friction compound that prevents practically all slipping on the pulleys even under quick load changes.

Our belting experts are ready to help lower your maintenance costs on belting and can suggest changes that will lower your production costs.

A phone, wire or letter to our nearest service branch, places at your disposal, without obligation or charge, not only their services but the entire facilities of the oldest and largest rubber organization in Canada.

ALWAYS LAND OF TROUBLE

Barbaric Invasion and Czarism Have Moulded Russian History, to People's Sorrow.

The backwardness of the Russians can be pretty adequately accounted for by three historical factors. There is, first, the Mongol yoke which rested upon them for nearly two and a half centuries. During the wonderful thirteenth and fourteenth centuries, while England was establishing her parliament and democratic models were being worked out in the free self-governing city states of Italy and the low countries, the Russians lay flattened under their alien Asiatic despotism. By the time they had rid themselves of the Mongols all legal rights of individual, local communities and social classes had disappeared, leaving the power of the czars unlimited.

In the second place, for a long time after the Muscovites had freed themselves from the Mongols, their settlements in the rich treeless steppes to the south of them—the famous "black soil" destined to become the granary of Russia and, indeed, of Europe—were exposed to raids by the nomad Tartars hemming them on the east and south. Until the days of Peter the Great the Russians were for the most part confined to the less fertile forested region of the North, where they were safe from the incursions of the nomads. Let one imagine how our economic development would have suffered had our ancestors been confined to the wooded region of the upper Ohio and the Great Lakes because the fertile prairies from Indiana to the Rocky mountains lay open to the raids of barbarian horsemen welling up from the great populated area in the Southwest!

Then there was the Romanoff surr-cruy, which in Shakespeare's day crushed the bulk of the people down into serfdom—which later became slavery—and kept them there for two and a half centuries.—Edward Alworth Ross in Asia Magazine.

At Kingston Mills.
Kingston Mills, April 15.—A number from around here attended the tea meeting given in the stone church down the middle road on Wednesday night. Mr. and Mrs. E. Campbell made a flying trip to Kingston on Thursday. There is some talk of the post office being removed to the corner. Every body around the mills is rejoicing over daylight saving now the fish have made their appearance in the streams. Some fine examples of the finny tribe have been caught, especially pike. Farmers have decided that sugar making is done for the season.

Henry of Verona spent the week-end the guests of their cousins Mr. and Mrs. E. Campbell. The former's brother is a returned soldier who for four years, Mrs. M. Peck, Joyceonville, called on friends last week. William McKane was in the city on Saturday.

Bela Kun, Hungarian foreign minister, said: "We will not put down our arms until the middle classes and aristocracy are crushed." A new and seemingly rich oil field has been discovered in Durham.

Old Folks' Coughs, Catarrh, Bronchitis Quickly Cured

This Tells of a Method That Cures Without Using Drugs.

Elderly people take cold easily. Unlike young folks, they recover slowly. That is why so many people pass middle life in pneumonia. Cough, croup, cold, influenza, and bronchitis, disappear almost instantly. A much more effective treatment is "CATARRH OZONE," which heals and soothes the irritated surfaces of the throat.

In using Catarrh-ozone you do not take medicine into the stomach—you simply breathe into the throat, nose and lungs rich piney balsam vapor, so full of healing power that cold, croup, and bronchitis disappear almost instantly.

The germ-killing balsam vapor mixes with the breath, descends through the throat, down the bronchial tubes, and finally reaches the deepest air cells in the lungs. All parts are soothed, with rich, pure, medicinal essences, whereas with a syrup the affected parts could not be reached and harm would result through benumbing the stomach with drugs.

A Catarrh-ozone Inhaler in your pocket or purse enables you to stop a cold with the first essence. Large spring patents, \$4.00 and supplies treatment for two months, small size 50c trial size, 25c; all storekeepers and druggists.

Charming scene from "The Rosary," which comes to the Grand Opera House on Wednesday, April 23rd, matinee and night.

Russian Soviet troops after heavy fighting, have compelled the Rumanians to bogis a general retreat along the Dnestor river.

Japanese Airmen for Italy.
Japanese military flyers accompanied by mechanical workmen, will soon be sent to Italy. The question of sending Japanese airmen to the war office has long been considered by the Italian government having recently been concluded, the war office has issued a note to the airmen and workmen who have volunteered, assuring them of the decision. At first twenty airmen were expected to be sent, but the number has been reduced to fourteen or fifteen.

Munich is again in the hands of Communists, but the troops loyal to the government have received reinforcements and are using artillery against the Communists' strongholds.
