**Feed Chicks Right**  
They develop twice as fast.  
Purina Chicken Chowder and Purina Chick Feed will develop chicks into broilers for market faster and bring them to the egg-laying period much earlier than ordinary feed. Purina Feeds are adapted to young chicks, and give perfect development.  
**PURINA**  
CHICKEN CHOWDER and CHICK FEED  
Grain feed supplies an excess of heat and energy, but is deficient in elements that make blood, bone, nerve, lean meat and feathers. Purina Chicken Chowder contains an abundance of the very elements which grain feed lacks. The Chowder and Chick Feed should be fed in about equal quantities.

PURINA POULTRY FEEDS, MANUFACTURED IN CANADA BY

**FINANCIAL MATTERS.**  
Ore Bodies in Cash Must Remain British.  
The Financial Times says that Sir Robert Borden, Prime Minister of Canada, has cabled from Paris notifying the Dominion Steel Corporation and Nova Scotia Steel and Iron Company, that they cannot merge their interests unless control of the amalgamated enterprises remains in Canadian hands. The British authorities insist that the enormous ore bodies controlled by the Dominion Steel Corporation must remain British, and as the Nova Scotia Steel and Iron Company is it is generally understood, controlled by New York and Boston capitalists, it might assume control of the Steel Corporation if a merger was permitted.  
Ten Per Cent. War Bonus.  
Employees of the Canadian Bank of Commerce have recently been granted a war bonus equal to ten per cent of their salary. The decision of the bank to make such a distribution came as a surprise to the staff, inasmuch as it follows closely the distribution of a similar amount which was made in December last, thus bringing the bonus distribution up to twenty per cent, in about six months' time.  
It is understood that the bonus to employees is largely in recognition of their loyal service to the institution at a time when staffs were rapidly being depleted through war service, while the cost of living was mounting steadily.  
U.C.R. Raises Capital.  
The United Cigar Stores Company of America filed with the secretary of state at Trenton, N.J., an increase of capital stock from \$30,000,000 to \$65,000,000. Of the new stock \$5,000,000 is seven per cent. cumulative preferred and \$30,000,000 common.  
Wheat Crop Will Be Milled At Once.  
Western Canada's wheat crop residue from last year amounting to about 15,000,000 bushels, will be ground into flour speedily and shipped to Great Britain and her Allies, it was announced authoritatively. Much of this wheat will be ground in western mills, it was declared. The wheat will be purchased at the fixed price of \$2.24 1/2 per bushel, which will continue in effect until Sept. 1st.

**Londoners Eagerly Buy Debentures.**  
The prosperity of Londoners and their eagerness for good investments, even after they have absorbed nearly \$20,000,000 worth of war loans, were demonstrated by the sale over the counter in the city hall of \$100,000 worth of city of London 5 1/2 per cent. debentures within twenty-four hours. City Treasurer J. S. Bell, by instruction of the mayor, announced Thursday that he would sell the bonds. He made his first sale Friday at noon and closed out the lot by noon Saturday, all being taken by private citizens.  
Nickel Dividend Passed.  
Directors of International Nickel decided to pass the dividend on the common stock. The dividend was reduced from \$1.10 to 50c, a share in February.  
International Nickel Company was hit hard by taxes following the entry of the United States into the world war, having had to pay large taxes both in the United States and Canada. Reserves for this item in 1915 was \$20,000, in 1917 \$25,000, in 1918 it advanced to \$3,500,000, while in the nine months to December 31st last a reserve of \$3,829,680 was made.

**Canadian Locomotive Co.**  
Bongard, Ryerson & Co. say in the Stock Market Review: With its 1918-19 fiscal year drawing to a close, the time is perhaps opportune to refer to the position and prospects of one of our most successful industrial—the Canadian Locomotive Company. This company is destined to share largely in the program of reconstruction which faces the Canadian railroad system after the severe strain of the war period. During that period motive power has become badly run down and the need of replacement is obvious. This will doubtless be effected gradually, but it will involve a steady flow of orders which will keep plants profitably occupied. In this business the Canadian Locomotive Company with its efficient organization, will participate.  
The financial position of the company is sound. Since its reorganization in 1912 and up to June 30th, 1918, its gross earnings amounted to \$3,173,341, being an average of \$453,334 per annum. Allowing for tax interest and preferred dividends, this represents close to thirteen per cent on the common stock. As a matter of fact, however, earnings of the past three years have been well above this average. For 1917-18 they amounted to \$677,956. Deducting interest and preferred dividends, the balance represented 25.3 per cent on the common stock. At June 30th, 1918, the company reported a balance at profit and loss of \$229,417; its liquid assets exceeded \$2,000,000, and combined reserves and profit and loss balance were \$1,657,324.  
Locomotive common, which pays a six per cent. dividend, has been selling recently around 87-88, at which price the yield is 6.8 per cent. The company's ability to pay a higher dividend is evident. In any case the continuation of a dividend on the common shares would seem assured.

**When Appetite Fails And Health Declines Follow This Suggestion**  
REQUIRES ONLY A COUPLE OF SMALL TABLETS AFTER MEALS TO FIX YOU UP AGAIN  
A New Blood-Food Called Ferronzone Sure to Restore You Quickly.  
Every day comes the good news of wonderful cures with Ferronzone. In "Peterboro" it worked marvels for Louis Meehan—not him right on his feet—made him entirely well.  
"About three years ago," says Mr. Meehan, "I had the Grippe which left me in a very run-down condition that finally developed into Dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me and on the advice of a friend used Ferronzone. It not only cured me of Dyspepsia and Biliousness, but has built up my strength to what it was before I had the Grippe. I can recommend Ferronzone as an ideal restorative."  
Ferronzone gives you force, energy, vim.  
It strengthens the stomach, cures indigestion, prevents headaches, guarantees good health.  
Thousands use Ferronzone—they all feel better; try it yourself—sold in 50c boxes, six for \$2.50, at all dealers.

**My Wife Objects**  
IT sometimes happens that a man is prevented from insuring his life by the very being that the insurance is intended most to benefit—his wife.  
A wife naturally shrinks from asking her husband the question—"Have you made your will?" or "have you insured your life?" Yet it is a primary duty!  
Yes, it is a duty that the wife owes to herself. There is an even chance that in time the wife will become a widow—there are a quarter of a million such in Canada. Is it unwomanly to guard against being left unprotected?  
Then it is a duty the wife owes to her children. Many women oppose life insurance for themselves who would nevertheless wish it for their children. They could risk poverty for themselves but not for their little ones.  
Every wife should be an ardent insurance solicitor while her husband remains without protection for his home, wife or child. Life insurance is merely an association of men on a large scale for the Mutual protection of their families.
