## C.P.R. EXHIBIT OF CANADIAN NATURAL RESOURCES AT WINDSOR STATION MONTREAL

Visualizing in a striking manner a large number of the diverse natural resources of Canada, the Canadian Pacific Railway has opened to the public an exhibit at the Windsor Street Station, Montreal. This exhibit, which is situated in a room immediately adjoining the main entrance to the station on Osborne street, has been prepared by the collaboration of the Quebec Government and the C. P. R. One half comprises the Quebec exhibit, consisting of samples of the resources of the province—lumber, asbestos, and other minerals, grain, maple sugar, fur-bearing animals, such as the ermine, marten, mink, fox and beaver, and fish and game birds. The C. P. R. exhibit has been gathered from the entire Dominion. A splendid display of grains produced in the fertile fields of Western Canada is a special feature. Supplementing this is a big collection of fruits, forestry products, and minerals. A number of colored transparencies show the methods used in developing the forest resources of Canada, from the primary state to the finished product, such as wooden ships. Other transparencies illustrate some of the summer resorts along the company's lines. Complete and recent statistics of all the country's resources add conviction to the display. The exhibit is installed in handsome showcases, brilliantly lit; and it is interesting to know that all the material used in the construction room is exclusively Canadian.
