## SUFFOCATED WITH STEAM

### HOW JOHN P. COADY MET DEATH ON THURSDAY.

The Evidence Submitted Did Not Show Any Negligence on the Part of the Montreal Transportation Company. "We find that John Patrick Coady came to his death by being suffocated with steam as the result of the blowing out of a manhole gasket in the boiler of the steamer Atkokan, and that the evidence submitted did not show any negligence on the part of the Montreal Transportation Company."

The above verdict was rendered on Friday night, shortly before midnight, by a jury empanelled by Coroner Dr. D. E. Mundell to enquire into the circumstances surrounding the death of John Patrick Coady, one of the four men who lost their lives in the terrible accident on the steamer Atkokan on Thursday afternoon. D. A. Shaw was foreman of the jury, and the evidence of eleven witnesses was secured. Francis King appeared on behalf of the Montreal Transportation Company. The inquest was held in the police court room, and it was filled with interested spectators throughout the hearing.

Dr. A. W. Richardson stated that Coady died from suffocation from superheated steam. Several employees of the company were examined, and they swore that it was quite a common thing for manhole gaskets to blow out in this way. Evidence was also produced which showed that the gaskets had been installed properly, but that there was always a danger of such an accident.

Chief Engineer Robert Knight, of the steamer Atkokan, gave evidence. He said there were two boilers, one "dead," while the other had 60 pounds of steam. He made an examination after the accident with a candle still lit in the empty boiler where men had been working. He said the steam escaped through a section of the manhole joint. This joint was protected with asbestos packing to stand 200 pounds of steam.

Thomas P. Thompson, steamship inspector for boilers and machinery, said that on June 19th he had examined both boilers of the steamer internally and externally. He had also examined the safety valves to see if they were in proper condition. The chief point on such an inspection as far as pressure was concerned is by means of water about 70 degrees temperature. The boilers were filled with water on June 11th. They were given 188 pounds of cold water pressure for about five minutes, and if there had been anything defective it would have shown itself. "Asked as to the cause of the manhole giving away," witness said: "Under the circumstances it is hard to say what caused it."

Questioned by Mr. King, the witness stated that it was quite an ordinary thing for a blow-out of this kind to occur with cold water and steam.

George Henderson, marine engineer, said he had cleaned the manhole doors thoroughly and had put on the gaskets properly. The gaskets used were perfectly new.

Robert Hepburn, marine engineer, testified as to the work on the manhole being carried out properly. He had no idea what caused the gasket to blow out. He had been questioned by Mr. King, the witness stated that it was quite an ordinary thing for a blow-out of this kind to occur with cold water and steam.

## You May Be Skeptical

About What Dr. Chase's Nerve Food Will Do for You! But Here Is the Evidence.

When the blood gets thin and watery, when the nerves become weak and exhausted, when your vitality is run down and you feel weak and tired it is because nourishment is lacking.

You may be eating as usual but your digestive system fails to obtain from the food you eat the elements from which new blood and nerve force is created.

Because Dr. Chase's Nerve Food supplies this element to the blood and nerves it is the most successful of restoratives.

While personal experience with a medical treatment is the only absolute proof that it will benefit you, still we are all similarly constituted and what will help one will help another under similar conditions.

This is why it is so interesting to read the experience of other people, and many will find in this letter their own conditions described.

Mrs. Thomas Williamson, Picton, Ont., writes: "For the last twenty years I have had trouble with my nerves. I suffered from sleeplessness, and, of course, my system was often in a run-down condition from nervousness. At different times when I would have severe attacks, I was under the doctor's care, but this only gave me temporary relief at the time. This past summer I suffered from another nervous breakdown, and it was then that I commenced using Dr. Chase's Nerve Food. I took a treatment of this medicine and can now get up in the morning and do my work, which was something I could not do previously, because I used to get strangely confused. My appetite is good, and I can sleep well, too. Generally speaking, I am so much better that I am proud of my improvement. I cannot speak too highly of the splendid results I have secured through the use of Dr. Chase's Nerve Food."

Dr. Chase's Nerve Food, 50 cents a box, a full treatment of 4 boxes for \$2.75, at all dealers, or Edman-son, Bates & Co., Limited, Toronto.

present when the hydraulic test was made by Inspector Thompson, and there was no appearance of a leak. He regarded the affair as purely accidental. He had seen blow-outs of this kind before, and had also heard of them. They had occurred years ago and would occur in the future.

William H. O'Leary, foreman boilermaker for the M.T. Co., said he was in front of the manhole when the test was made. He declared that not a particle of water came through and that everything was in good condition. Witness had thirty years' experience in the business, and had seen lots of blow-outs of this kind.

Thomas Patrick Compeau said he was working on the "dead" boiler when the blow out occurred. "Coady was in the 'dead' boiler, and Ferguson and Gibson were working outside the dead boiler. Ferguson was about six feet from the manhole. Gibson and I were working together. We heard the noise and could see the steam blowing. It went through towards the bunkers' bulkhead, and quickly filled the fire hole. I ran into the forward coal bunker, and then I ran back again. I could not see very well for the steam, but a grabbed Gibson. He gave a twist, and I lost my hold on him. Gibson and I then made a dive for the coal bunker. I do not know what happened Coady and I did not see him."

Richard Taylor, foreman of the engine department for the M.T. Co., told of the test made. He said there was no leak. The test was kept up between five and eight minutes. It was quite a common thing for gaskets to blow out, and witness told of many similar occurrences. Witness also swore that all the necessary precautions had been taken to avoid an accident of this kind.

John E. Hewitt, a fireman, told of putting on the fire for the test. He had sixty pounds of steam, and from the time the pressure was witness examined every port and found no leaks. He also inspected the manhole. He had figured in an accident when a gasket had blown out.

Hamilton McClymont, assistant marine superintendent of the M.T. Co., said the very best of attention had been given to the boiler part of the work in view of the fact that the steamer was to be used in salt water trade. He regarded the test as "extra severe," and to the best of his knowledge everything was in good shape.

Charles Selby, called as a boiler expert, stated that accidents of this kind would happen. He had met with such accidents in his own experience on more than one occasion.

## G.W.V.A. DEFEAT R.C.H.A.

In Baseball Game Friday Evening By 10 to 8.

An exciting game of baseball was witnessed on the Cricket Field on Friday evening between the G.W.V.A. and R.C.H.A. The former won by 10 to 8. It was a seven inning game and up to the fifth it seemed to be a walkover for the Veterans, as the score was 10 to 0. At this point Renfrew, who was pitching for the Artillery, was replaced by Andy from first base, who retrieved the fortunes of his team by shutting out the veterans after two more runs were made. His own team at the same time found themselves and scored eight runs. What might have happened had he been placed earlier in the box is what everybody is asking. He showed us as a good pitcher and a good manager, too. With a little support in the field and some improvement in the bat, it is evident that the "re-cruiting" will give a surprise some of these days, for their battery has been found. No better catcher than Villeneuve could be desired for the team. The G.W.V.A. team was superior at the bat and in all round holding. Boyd pitched well for four innings and with more practice will do better. Richardson and Jamieson made sensational catches that brought great applause from the fans. The R.C.H.A. were favorites because they played in their uniforms which were a handicap.

The line up was as follows:  
R.C.H.A.—Villeneuve, c; Renfrew, p; Andy 1b and p; Richardson, 2b; Cooner, ss; Stout, 3b; Ward, rf; Jamieson, cf; Ewen, lf.  
G.W.V.A.—Weaver, cf; Boyd, p; Covert, 1b; Reid, 2b; Fennell, 3b; Alton, ss; Downey, rf; Jamieson, cf; Huard, lf.

Umpire—W. Dehaney, bases Cummings.

G.W.V.A.— 3500200—10  
R.C.H.A.— 0000431— 8

## Military Football League.

At a meeting of the military football league on Friday evening an executive committee was selected as follows: Mr. Griffin, representing the Vocational Schools, J. Robinson the Ship Yard, L. Sleuth the 21st Battalion Club, F. Ingledew the Army and Navy Veterans, Lieut. Clark R.C.H.A. The chairman, vice-chairman and secretary-treasurer are ex-officio members of the executive.

## GOLDEN WEDDING OF COUPLE AT NEWBORO

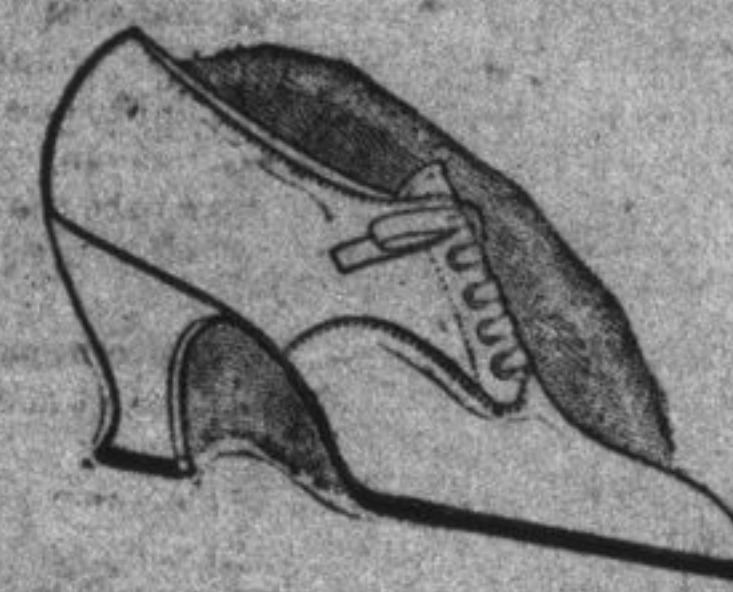

Mr. and Mrs. John Hazlett Were Fifty Years Married on June 16th.

A very enjoyable event was participated in by a number of the friends with the family of Mr. and Mrs. John Hazlett, of Newboro, when on June 16th they celebrated their golden wedding anniversary. They were entertained at the home of their daughter, Mrs. Nelson Mattice, on the banks of the Rideau Lake, a beautiful spot for such a gathering.

John Hazlett and his bride, Miss Pannie Johnson, were united in marriage on June 16th, 1869, at Elgin, Ont., by the Rev. David Savage, assisted by Rev. "Daddy" Howard, both old warriors of early days. The union was blessed by two sons and two daughters, all of whom live to enjoy the anniversary. William Hazlett, of Rochester, N.Y.; Morton Hazlett, who is in uniform in Uncle Sam's
