Cholera Infantum

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded complaints. They are an absolutely safe medicine being guaranteed by a government analyst to contain no opiates or narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

HEARD ON THE SIDE

It is funny, but there still is a number of tipplers who think they can put it over Magistrate Farrell, by saying they got drunk on two per cent. beer. Good night! Forget it. The cork on a bottle of good old Scotch would do a better job than the two per cent.

All the grocers are being notified regarding the law calling on them to keep a record of all their sales of extracts of lemon, etc. It is in great demand these days. Well, the boys have to drink something, and they all cannot afford to pay \$5 and upwards for a bottle of good stuff.

Too bad the City Council has to have extra sessions in the vacation time. Some of the aldermen who are heard to complain about it, are the first ones to get in line when election times comes around.

Citizens would take off their hats to the men who could invent some scheme to box up some of this hot weather for next winter when the purchase of coal is the burning question.
