GANANOQUE
(From Our Own Correspondent.)
Aug. 23.—Under the auspices of Protection Lodge No. 51, L.O.L., the steamer America took out a large excursion party to Alexandria Bay on Thursday evening for a moonlight trip.
Mrs. William Tomkins, King street, met with a severe mishap by falling in front of her residence and against the window of the adjoining building, cutting her arm and hand quite seriously.
Pte. James Drummond, who went overseas with the 2nd Battery of the 1st Brigade in the fall of 1914, and saw service during the entire war, has returned to town.
Prof. John H. Loud, of Boston, Mass., gave an excellent free organ recital in St. Andrew's church on Thursday evening, when E. O. Emerson, also of Boston, rendered a number of excellent vocal selections.
The little daughter of Mr. and Mrs. William Appleby had the misfortune to break her arm recently by a fall on the new cement sidewalk on Charles street north.
William Forster of Kingston, factory inspector for this district, was in town this week.
Excursion to Brockville Fair. Per str. America, Tuesday, Aug. 26th, 8 a.m. All afternoon in Brockville, 75c. return.
For use at sea a Scotchman has invented a gyroscope mounting for a telescope and a chair for its user, which is claimed to keep the glass pointed at an object irrespective of the motion of a vessel carrying it.
Two British inventors have designed an automobile that is run by gas manufactured by a producer carried on the rear of the vehicle.

Newest Notes Of Science
A bicycle tire invented in Europe is made of closely coiled steel wire. Four pins attached to the rim of a new plaiter hold meat firmly for carving.
British scientists have detected traces of light more than 300 feet under water.
Billboards on which figures are made to move by electric motors have been patented.
Electricity is replacing all other forms of power in Bombay's extensive cotton mills.
Malt extracts have been found valuable for laundries in removing starch from clothing.
Successful experiments in growing peanuts have been conducted in Mesopotamia by Englishmen.
To afford a stronger grip on wires new pliers have handles that are shaped like a pistol stock.
An Englishman has invented apparatus to electrolyze sea water on shipboard to form a disinfectant.
A vocational school for its employes has been established in an Idaho mine 14,000 feet underground.
Natal is expected to break its sugar producing record this year with an output exceeding 140,000 tons.
The sides of a new vacuum washer for laundry purposes are corrugated so it can be used as a wash board.
The Union of South Africa is producing 19,500,000 pounds of butter a year and 4,266,000 pounds of cheese.
Its inventor has patented a pneumatic helmet composed of inflatable rubber tubing to protect babies' heads, which is being produced in Italy by agricultural production Italy will establish an experiment station in Tripoli.
Novel snowplows of recent invention for automobiles are carried on sled runners in front of the forward wheels.
According to a Roumanian scientist, old age is due solely to a decrease in the amount of water in the human system.
A Texan is the patentee of a new harness to hold a rod for a fisherman and leave his hands free for other purposes.
Guatemala's salt industry, which began soon after the Spanish conquest, now produces nearly 2,000,000 pounds a year.
Experts have estimated that 20,000,000 tons of paper pulp can be produced each year from India's bamboo and grass.
A recently invented folding porch grate for the protection of children can be folded out of sight into a pillar when idle.
New Zealand is reforesting with larch trees an extensive area that was devastated by a volcano a quarter of a century ago.
After years of experimenting a Missourian claims to have perfected a process for extracting potash from cottonseed hulls.
To enable one-armed persons to eat easier an Englishman has invented a wooden cup with rubber feet that prevent its slipping.
After studying thousands of cases a South Dakota scientist decided that four per cent. of human beings are born left-handed.
Since the United States assumed control of the Philippine islands the number of lighthouses has been increased from 29 to 151.
A new electrical call bell for hospital patients' use gives a continuous signal until a person answering it shuts off the current.
So that a bicyclist can use his machine for gunning a Frenchman has invented a support to hold it still while he is firing his gun.
When not in use a new crib for infants can be folded and slid between the springs and frame of an adult's bed to save space in a room.
For the use of convalescents an Englishman has invented a cane from one end of which can be unfolded a projection to rest the user's feet.
Invented by a New York man, a camera attachment permits up to eight different pictures to be taken on the same film without interference.
Italy has one-third as many telephones in proportion to population as France and only slightly more than one-sixth as many as Great Britain.
Combined with a compact electric room heater that can be screwed into a light socket is a tiny fan to drive the warmed air downward toward the floor.
A thief alarm invented in Europe is small enough to be carried in a vest pocket and explodes a cartridge when any object under which it is laid is moved.
A recently patented bottle is made from a single sheet of paper that is so folded and pressed into shape that there are no weak joints to permit leakage.
Early establishment of trans-Atlantic radio telephone service is expected as a result of successful experiments in talking between Nova Scotia and Ireland.
To enable women to dry their hair after shampooing it a member of that sex has invented a rack shaped like a wide brimmed hat, over which the hair can be spread.
Electrical apparatus has been invented by a Japanese with which all movements of a ship can be controlled from the bridge without signalling to the engine room.
Detachable ears to be fastened to dolls' heads, the invention of an Alabama woman, are said to give a more lifelike appearance than when the ears are integral parts of the head.
On the theory that insomnia can be cured by lessening the moisture in the lungs an English physician has invented apparatus supplying warm, dry and sterilized air to be breathed.

Summer Complaint IS A SERIOUS BOWEL TROUBLE
Very few people escape an attack of Summer Complaint. It may be slight, or it may be severe, but nearly everyone is liable to it.
You can't tell, when it seizes on you, how it may end.
Allow the profuse diarrhoea, the vomiting and purging to continue for a day or two and you will become weak and prostrated.
Just as soon as the bowels become loosened up, get a bottle of Dr. Fowler's Extract of Wild Strawberry and check these unnatural movements, and thus prevent the system from becoming weakened.
Mrs. L. J. Alteen, wife of the well known wholesaler and retail Fish Dealer, 44 Mill St., Amherst, N.S., writes:—"I have four children, the oldest being eight years old. Every summer, they were troubled with Summer Complaint. Doctors' prescriptions did not seem to help them any. One day a friend asked me to use Dr. Fowler's Extract of Wild Strawberry. I at once got a bottle, and to my surprise and wonder, I soon saw a change in them. I now keep a bottle of it in the house all the time, and will recommend it to any mother."
"Dr. Fowler's" is 35c. a bottle. Get the original which has been put up for the past 74 years by The T. Millburn Co., Limited, Toronto, Ont.

To protect the eyes from an electric light without interfering with the illumination in other directions, a metal shade to be attached to a lamp with a wire spring has been patented.
A Brazilian engineer has invented a process for casting iron pipe by centrifugal force, which distributes the molten metal within revolving cylindrical molds that are water-cooled.
To economize in the use of gas a cover for gas ranges has been patented, which the heat of each burner can be confined to an opening above it or divided among two or more openings.
Two French scientists contend that 10 per cent. of the chickens in that country have tuberculosis and that the disease is as high as 23 per cent. among poultry in some other countries.
A recently invented watch, in addition to the time, shows the day of the week, day of the month, and the moon's phases automatically, while the names of the months are changed by hand.
A company has been formed in Denmark to manufacture a fuel briquet, patented in several countries and which is composed of peat dust and brown coal, from which the water has been evaporated.
Each battle plate in a new automobile muffler is flanged and overlaps the next section, forming a part of the outer casing, which its inventor claims, prevents its becoming loose and rattling.
In a new rear signal for automobiles pressing a button on the steering wheel lights a red light and lifts a semaphore, which is dropped and the light changed to green when the button is pressed a second time.
Utilizing a galvanometer, a French scientist has invented apparatus for measuring vibrations of human bones and tissues with which, among other things, he reads a person's pulse more accurately than by hand.
A recently patented rifle target is composed of plungers which absorb the energy of the bullets and drop them into a receptacle, at the same time registering the place of their impact on an indicator at a distance.
