POLICE LOOKING FOR ITALIA

MISSING FROM OTTAWA. Rocco Baris is Alleged to Have Stabbed Salvatore Russo, and it is Fur-

ther Alleged That He. Was a Vic-

tim of Black Hand.

Inquiries are being made here concerning Rocco Baris, an Italian, wanted in Ottawa on a charge of murdering one, Salvatore Russo, an Italian, who died there Wednesday night as a result of five knife wounds in his body . It is believed that he has skipped out, and the Ottawa police have a drag net out for him. Regarding the case, the Ottawa

Journal has the following: Russo was born in Italy 35 years ago. WHe had lived in Canada for 17 years, and was employed by the city for 16 years. A particularly sad feature of his death is the fact that he leaves his wife and six small children, the oldest, a girl of 14 years of age, without any means of support. All other relatives of the deceased reside in Italy.

Mrs. Russo, in an interview, said that she was endeavoring to locate the Black Hand letter which her husband received. The letter has been mislaid. Mrs. Russo is anxious to locate it and turn it over to the proper authorities for an investigation. She condemns many Italian "friends" as perpetrators of the plot against

Maria, the hurdy-gurdy girl, tele-phoned a relative of Mrs. Russo, and evoked an exclamation of great surprise when she was informed that Russo was dead. She did not make. her whereabouts known, and friends hiding in fear of an attack being made on her life. Coroner Craig opened an inquest into the death and adjourned the

hearing until a later date.

shrinkage, or Pyorrhea (Riggs' Disease). But many people even under thirty have Pyorrhea. Women, particularly after the baby comes, are peculiarly subject to Pyorrhea. At such time they cannot be toe careful about their teeth.

Pyorrhea commences with tender gums, or with gum-bleeding, at tooth-brush time. Gradually the gums become spongy. They inflame and then shrink. The teeth become exposed to decay at the base and tiny openings in the gums become the breeding places of disease germs which infect the joints—or tonsils—or cause other ailments.

Beware of that first gum tender-ness! Try Forhan's for the gums. It positively prevents Pyorrhea, if used in time and used consistently. No ordinary tooth paste will do this.

And Forhan's cleans teeth scientifi-cally as well. Brush your teeth with it. It keeps the teeth white and clean. If gum-shrinkage has already set in, start using Forhan's and consult a dentist immediately for special trans-

35c and 60c tubes. All Druggista.

Returned Man Draws Comparison to Show Why Warriors Should Get More-Shows Pay of Girls is Much Better All the Time.

The London, Ont., Advertiser says. a local leturned soldier, bitter in his ondemnation of the recent government action in turning down increases of war service gratuity for overseas veterans, has prepared an interesting statement in which bonuses granted by the powers that be to female stenographers employed at Wolseley Barracks here are compared with gratuities awarded front line trench ploneers. The figures obtained by him with respect to the bonuses are official, and not only apmen's extra heavy tweed trousers ply to female stenographers of Milli in Bannockburn tweed, Hewston tary District No. 1, but to young women employed at similar duties-in various military centres throughout the Dominion, the rate of bonus being struck; at Ottawa.

Under the amended war service gratuity regulations, a former soldier who served "in an actual theatre of the war," and whose period of service in the Canadian expedition-Rev. Mr. Farnsworth is holding re- ary force, totals three years or more, vival meetings in the Methodist receives six months', gratuity at a church. A happy event occurred on rate of \$70 a month, which totals Wednesday at the home of S. Pringle, \$420. In contrast to this, one local when his second daughter, Freda, stenographer employed at military was united in marriage to William headquarters here has received over Bell, of Empy Hill. Mr. Allison, \$334 in bonuses, while two others who has been very ill is some better employed in similar capacity have at the time of writing. J. Grange received over \$331. The stenograand J. Wood returned home from the north country with a fine deer. A young daughter has arrived at D. of war, and hence their period of McCutcheon's. J. E. Hudgin spent service totals about four years, or last week with his brother at Hali- approximately the period served by thousands of veterans of the trench-

bonus, July 16, 1919, \$62.50, and cost of living bonus, September 25 last, \$21.50. Further allowances of similar nature have been paid throughout Canada since the date last mentioned, but records of them are not available for publication. However, the total bonuses recorded

bove are \$334. The female stenographers employed at district headquarters are under the Civil Service Commission, senior girls receiving \$85 per month approximately, while the majority receive \$2.60 per day for seven days in the week, which salary, in the opinfair living wage at least, much better than stenagraphers usually receive in local offices. The bonuses

are in addition to regular pay received under the above schedule. Working hours for the female stenographers are from 9 to 5 o'clock with two hours for lunch, Sunday the offices are closed, but pay goes on uninterrupted, while in the summer months, Saturday brings a half-holiday, and during the remainder of the year a half-holiday is granted on alternate Saturdays, for which per-iod pay continues. In addition to the above time off, girls serving one year or more are granted two weeks'

olidays with pay. The veteran critic draws attention the fact that to be eligible for the \$420 war service gratuity he served three years , in the ranks, part of which time was spent at the front, and pay received during his entire service was at the rate of \$1.10 per day for seven days in the week, on duty 24 hours daily, provided that services were required. Difference between the two wages amounts to \$1.50 per day, with the Government servant on the light end of the pay sheet employed in hazardous duty in danger of serious wounds or injuries
