How to Study Skillfully

What the Dictionary Tells

BY ISABEL W. CLAYTON Do you know our big brother, the dictionary? If you do not know him, make his acquaintance at once.

Do you know how many different questions the dictionary can answer?

In the first place, he tells the various meanings of all the words in the English language.

The dictionary also tells us if the word begins with a capital letter, if it has a hyphen, how to pronounce it, how many syllables it has, what they are, what its history or etymology is, and what are its synonyms or other words with the same meaning.

In the front of the dictionary, is a history of the English language with rules for spelling. In the back is a gazetteer. This is a list of geographical places. It tells us where the place is, how large it is, and how the name should be pronounced.

Humorous School Errors. "Edward the Third would have been King of France if his mother had been a man."

"The cause of the Revolution was that the Colonists wanted room to pasture their cattle."

"Georgia was settled by the people who had been executed."

"In 1820 the Pilgrims crossed the ocean and this is known as the Pilgrim's Progress."

Sydenham School.

How To Make a Catapult. To make a catapult get a croch from a tree about four inches in length.
