THREE IN CABINET WILL SOON RETIRE

the country.

Foster, Burrell, A. L. Sifton-Possibiy Mewburn-Borden May Go South Again.

Ottawa, Dec. 8 .- Christmas time will see lively times in federal polities. Sir Robert Borden must reconstruct his cabinet. Those who will retire are Sir George Foster, Hon. Martin Burrell and Hon. A. L. Sifton, and probably Hon. S. C. Mewburn. Hon. A. L. Sifton's health makes it impossible for him to remain in political life, and he wishes to retire as soon as possible. General Mewburn may be induced to remain. It is probable Lloyd Harris will enter the government as minister of trade and commerce. Along with him will be new members of the cabinet from New Brunswick and British Colum-

If Sir Robert Borden remains at the head of the government, he will be unable to be present much of the next session. His health is such that he may have to spend the winter in the south. To permit of his absence he must reconstruct and strengthen his government. The prime minister, is faced with a very difficult situation. He must strengther his government or he must remain with impaired health and a weakened constitution to lead in the commons this County farmers, at a representative session, or he may retire.

"I am going to take my coat off when I come back from England, and we will have a show-down," he said, referring to the Dominion Government's refusal to approve his plans for Eastern Ontario. "All we are asking from the Dominion Government is a fair chance, and I am out to see that this Province gets what it is entitled to in the matter of water-

power development." The Hydro-Electric Commission will have the backing of a new Eastern Ontario Hydro-Electric Association which is to be formed by the municipalities at a meeting in Brock-

ville to-day. this province has the exclusive right ment to Tisza's villa and stood guard tional boundary, which is limited only by such uses as may require to be made of these waters for navigation purposes.

Retarded by Lack of Power. For some years past the Hydro-Electric Power Commission has realized that the industrial development of Eastern Ontario has been seriously retarded by the lack of a supply of electrical energy, similar in quantity and price to that which has so greatly accelerated industrial developme in Western Ontario. Investigations leading to a solution of this proble have been under way for some years, but the feasibility of developing power on the St. Laawrence River at a cost reasonably comparable to that at Niagara, has only recently been made manifest by reason of the huge

quantities of electric power used during the war in the manufacture of munitions and other war materials. The Hydro-Electric Power Comtered upon an extensive investigation in Eastern Ontario.
