"IN THE PUBLIC EYE"
By J. J. Stewart

BENJAMIN Franklin wrote on August 14th, 1784, "If all other defects and infirmities were as easily and cheaply remedied as eye weaknesses it would be worth while for friends to live a great deal longer." The proper corrective glasses are much cheaper now than they were in Franklin's time and the science of optics has advanced. Don't you put your suffering eyes to further strain. Let us examine them.

DONATIONS AT CHRISTMAS SUPPOSE FARMERS STRIKE

ACKNOWLEDGED BY MOWAT SANATORIUM.

Every Patient Received a Gift—Dr. Hopkins Gives a List of Those Who Contributed.

Portsmouth, Dec. 27.—(To the Editor.)—On behalf of the patients and staff of the Mowat sanatorium I beg to express to the many people and societies who so kindly sent Christmas donations to the sanatorium, our sincere thanks and deep appreciation for their generosity and thoughtfulness in our behalf. It was through the kindness of our friends that Christmas at the Mowat was made so enjoyable. Never have we had a more sumptuous Christmas dinner and this in itself did much to gladden the hearts of the unfortunate patients who were unable to get Christmas leave, and so spend Christmas in their own homes.

The Christmas tree and concert, held on Christmas Eve, were, needless to say, a huge success. Much credit is due to Miss McGill and Miss Nickell for their untiring efforts in decorating the trees and the institution, also to the George Richardson Chapter of the Daughters of the Empire, for a very excellent concert, and the Y.M.C.A. for supplying the music.

Every patient received several presents, including a Christmas stocking from the Red Cross Society, a very handsome box of comforts from the Knights of Columbus, a Christmas parcel from the I.O.D.E., and a present from the Mowat canteen. The boys in the infirmary received special gifts besides the above mentioned ones, including a stocking from the Glangary Chapter of the I.O.D.E., Alexandria.

Words seem utterly inadequate to express our thanks, but we wish through the kindness of your paper to publicly thank all those who have done so much for us. Below I am enclosing a list of the donations received.

Sleepless Nights Overcome By Safe Method

SUGGESTIONS GIVEN WHEREBY INSOMNIA CAN BE SAFELY AND QUICKLY CURED.

Worry, overwork, overstudy and indigestion cause insomnia. Healthy, natural sleep can't be produced by drugs. First, the blood circulation must be improved: Congestion of blood in the head must be removed. Irritation in the brain must be relieved.

It's because Ferronone equalizes circulation, because it soothes the irritation, because it removes congestion that it does cure insomnia.

For building blood and nerve, for instilling force and life into overworked organs, for establishing strength and vitality, where can you find anything so efficient as Ferronone?

Remember, sleep is just as important as food. You must sleep, or break down, but if you'll use Ferronone and thereby remove the conditions which now keep you from sleep, you'll get well quickly.

Ferronone is not a narcotic, not a dope; it is a health-giving tonic that any child or delicate woman can use. Absolutely safe for Ferronone.

Take it for a month, take it for a year—no harm, but immeasurable good will result. To sleep well, look well, feel well, to be free from depression, nervousness or blues—use Ferronone. It's a food tonic, a helper to the weak and wretched, a boon to the sleepless—sold in 50c. boxes, six for \$2.50, at all dealers.

What a Western Paper Has to Say—Possession of Bread is Something to Fight For.

Labor radicals in the industrial centres speak and act as if the world depended entirely upon them, while they are independent of everything and everybody. Here is an editorial from a Western paper—"Successful Farming"—warming should convince even the most unthinking radical that he and his are dependent upon society as a whole, and without it he would starve, freeze, or go naked. The editorial in part, follows:

"We ask city workers to ponder a moment what might happen if the farmers should do what the workers are doing—demanding shorter hours and higher pay. The farmers are their own bosses, so they would not have to quarrel with anybody. They could hold out on strike until they got good and ready, for they can feed themselves.

"You working fellows, suppose for a moment that the farmers adopted the eight-hour day. It would cut down production, at least, half. Suppose they also set a price on their labor and their products, based on an eight-hour basic scale. Where would you get your food? Only the rich could buy it at all, for the price would be prohibitive to men on strike. If the cost of living is too high now, how will lessened production affect it? How will increased cost of production bring down prices?"

"If you city workers expect the farmers to go on feeding you at the old price you have got to get back to work at the old wage and make it possible for the farmer to buy cheaper so he can produce cheaper. This is not a one-sided game. It takes two to play it, and if you city fellows quit, don't get sore if you go hungry soon. Either the farmers must do as you are doing, shorten the hours and demand higher pay, or else they must lengthen the hours and produce more without more pay. The farmers have been patient with you. When they lose their patience, look out. If they quit, who is going to feed you? What city workers have in common with farmers is not so much political, as economic. What are you going to do about it?"

In many countries of Europe, food production this year was half the usual amount, because farmers could not plant the average crops. Relief societies are now trying to save the children from starvation and tuberculosis. In the radical's heaven—Russia—farmers have gone on strike and refused to produce more than sufficient for their own needs. Possession of a piece of bread is now something to fight for.
