SUBSCRIPTION RATES (Daily Edition): One year, delivered in city \$8.00; One year, if paid in advance \$5.00

OUT-OF-TOWN REPRESENTATIVES: F. Calder, 22 St. John St. Montreal; F. M. Thompson, 402 Lansdowne Bldg. Toronto

Letters to the Editor are published only over the actual name of the writer.

Attached is one of the best job printing offices in Canada.

The circulation of THE BRITISH WHIG is authenticated by the A B O Audit Bureau of Circulations.

The vaccination scare is providing a rich harvest for the doctors.

The United States authorities intend to stand no nonsense from the "Red" element.

Every fresh wine by the Germans brings concessions from the Allies.

GET BUSY, PLEASE! What is Kingston going to do for Queen's Medical College in order to retain its clinical teaching here?

While the proposal to transfer the clinical department to Ottawa has been held up, Kingston cannot fold its arms and forget that it has a duty to perform in order to make it unnecessary to again talk about a division of the medical school course.

The municipality must contribute well to the scheme that promises to provide the hospital teaching necessary to enable Queen's medical school to maintain the high standard it has set.

Reports from across the Atlantic state that Great Britain is on the verge of a wave of unprecedented trade, in spite of the adverse exchange rate.

Lloyd George sounded a true and lofty note when he said that the only real basis of peace is for all the nations of the world to unite to accept the fatherhood of God.

This city is to be congratulated upon the council it elected to guide its affairs during the year 1920.

During the past four months over seventeen thousand dollars have been taken up farming and have settled on farms in the west.

Roosevelter and Carnegie gave their money away to help colleges and libraries.

The Belleville Chamber of Commerce, with nearly four hundred members, has got off to a flying start for 1920.

The farmers of Middlesex are up in arms because a woman was promoted to be registrar at a salary of \$3,500 a year.

The school teachers of Hamilton are to receive substantial increases in their salaries, beginning on January 1st, 1920.

occupation as all the others which are open to young men and women.

The mayor of Peterboro was elected by only one vote over his opponent. Hot election contests seem to have been the rule all over Ontario this year, so that Kingston is merely keeping in line with other centres in having a house-cleaning in the city council.

The clear statement that the government's forty million dollar fund will not be used to give aid to men who refuse to work will meet with a certain amount of approval, but still it is hardly right that our veterans should have to depend upon charity to tide them over the winter.

One of the mayorality candidates in Belleville strongly advocated the city manager plan of government. The most progressive cities in the United States have already adopted this plan, which tends to increase efficiency in municipal government, and to decrease running expenses. It is an idea well worth considering for the future of Kingston.

A NEIGHBORLY TRIBUTE. While we read with awe of the vast increase in the value of the production of our fields and factories—expressed, as we are apt to forget, in dollars that are worth less—Canada, declares the Syracuse Post-Standard, has been doing as well as the United States.

"The Canadians," it admits, "paid heavier than we did in war with the lives of their sons, but war did not leave them staggering financially."

The value of the field crops of the dominion has tripled in ten years.

The value of manufactured goods has tripled.

Our external trade has quadrupled. Our mineral trade has doubled.

Our exports of pulp and paper have increased from \$10,000,000 to \$71,000,000 in 1918, and are still increasing.

Canada is, next to Great Britain and France, the best customer Uncle Sam has; she buys from him twice as much as all South America.

Despite the value of the Canadian market as admitted by this authority, our neighbor, by maintaining a high rate of exchange, is doing much to restrict trade between the two countries.

consist of five members, including the Minister of Lands and Forests, his deputy minister, the provincial forester, with one representative of the Ontario lumbermen and one of the Ontario pulp and paper interests.

That would guarantee that the interests of all parties would be safeguarded, and at the same time form an organization which would have the responsibility for the reforestation of the province. On such a basis, the forests of Ontario might become, in truth, inexhaustible, in spite of the heavy demands being made upon them.

The re-organization of the Provincial Forestry department, with an adequate and qualified staff, is the key to the reforestation project on the denuded non-agricultural lands of the counties of Ontario. It should be one of the first duties of the new government to tackle this problem and tackle it wisely and well.

Man-Made. (Boston Transcript) God made the country, but man made the billboards that disfigure it.

Britain Never Forgets. (Cleveland Plain Dealer) Great Britain has no intention of forgetting the crimes of the ex-Kaiser. Forgetting is not a British habit.

Now that the Hohenzollern is deposed and exiled, the easiest way would be to permit him to continue his unhappy existence as a more or less unwelcome sojourner in the Dutch kingdom. But England is not looking for the easiest way. She has promised that the Kaiser will be tried, and she desires neither to retract nor to evade the promise.

What is Education? (New York Times) The truth is that "education" is finally and maturely picked up in the fields and streets, among men and women and realities, much more effectively and really than in the formal courses of schools and universities.

However and wherever hit or missed, "education" is multifarious and protean, hard to grasp or define. One of the best concrete illustrations of it was made by Lord Morley. He said, in effect, that "an educated man knows when a thing has been proved and when it hasn't."

Rhodes Scholarship Award. St. John, N.B., Jan. 7.—The Rhodes scholarship for New Brunswick for this year has been awarded to George F. Gregory Bridges, son of Dr. H. V. Bridges, principal of the provincial normal school at Fredericton. He is an under-graduate at the University of New Brunswick.

Will Take Off All Excess Fat. Do you know that there is a simple, harmless, effective remedy for overweightness that may be used safely and secretly by any man or woman who is losing the slimness of youth?

There is; and it is none other than the tablet form of the now famous Marmola Prescription, known as Marmola Prescription Tablets. You can well expect a reduction of from two to four pounds a week without dieting or exercising. Marmola Prescription Tablets are sold by all druggists at \$1. for a large case, or if you prefer you can order direct from the Marmola Co., 514 Woodward Ave., Detroit, Mich.

The Reason Why. Are There Two Sides to the Rainbows? No, there is only one side to the rainbow. The rainbow is made by reflection of the rays of sunlight through drops of water in the air, but you can never see a rainbow, unless you are between it and the sun. You could never see a rainbow if you were looking at the sun, and so if you are looking at a rainbow you can be certain that anyone on the other side of it could not see it, because they would have to be looking right at the sun. The rainbow is always opposite to the sun and there can never be two sides to it.

Rippling Rhymes. IN OUTER DARKNESS. We might as well be reconciled to Vital Truths, my fellow men; Old Booze is dead, and protests will not bring him from the dump again.

Some sports with million dollar thirsts, have baseless hopes of hell return; but every hope of that sort bursts; no more will glarshop bright lights burn. No more will seek the glaring booth to buy cold bottles from the ice; so let's accept the ghastly truth, and hit the hydrant once or twice. There's naught more futile than a hope that has no ground on which to stand; the courts have handed us the dope that Barleycorn is doubly canned. Then let's forget the bowl of gin, the forty drops we used to crave, the buck beer sign, the waylaid inn—for Barleycorn is in his grave. No wails can ever raise the dead; the loved and lost is not reborn; the hydrant's standing, cool and red, inviting us to take a horn. John Barleycorn will never make a return trip from the dim beyond; so let's forget his nobs and take four fingers of the nearest pond.

1,000 Eggs In Every Hen. If You Keep Chickens, Cut This Out—Four to Seven Eggs a Week per Hen Through Cold Winter Season. With Eggs at Dollar a Dozen, Means \$5.00 Profit per Hen in Next Six Months. Amazing Poultry Secrets Revealed by AMERICA'S FOREMOST POULTRY EXPERT

This is an offer no reader of this paper who keeps chickens can afford to ignore. We will tell you why.

Henry Trafford, Famous Poultry Expert and Breeder, for nearly sixteen years Editor of "Poultry Success," has developed a new and remarkable system of rearing, breeding and feeding chickens for heavy egg production that seems certain to revolutionize the poultry industry and give five eggs or more for every egg produced today. This plan or system is explained in Mr. Trafford's "1,000 Egg Hen," a free copy of which will be sent to any person who keeps six hens or more.

Poultry keepers, following Mr. Trafford's directions, learn how to start young pullets laying early; make old hens moult quickly and resume heavy laying during entire winter season. Most any hen will lay in spring when eggs are cheap. Mr. Trafford tells how hens lay four to seven eggs a week during coldest winter days when eggs sell at a dollar a dozen or more. His system shows how any breeder, with ordinary care, may get 1,000 eggs or more from nearly every hen in five years' time at a net profit of \$25.00.

There is big money to be made with chickens this winter by the man or woman who gets the eggs. The time to get the hens ready for heavy winter laying is now. Mr. Trafford's "1,000 Egg Hen" system tells how and arrangements have been made whereby any reader of this paper may receive one copy absolutely free by using the Coupon below. Send no money, but cut out the Coupon and mail it with your name and address to Henry Trafford, 467D, Tyne Bldg., Binghamton, N. Y., and the story of the 1,000 Egg Hen will be sent you by return mail.

Canada-East and West

Dominion Happenings of Other Days.

The Bonsecours Church. Coming into the port of Montreal every tourist sees high above the harbor a great golden angel standing on the top of the spire of the old Bonsecours church. It is an outstanding mark of the harbor, visible for a long distance and one of the finest tower figures in a province where there are many.

The Old Bonsecours church, although visited by far fewer strangers each summer than is Notre Dame or St. James Cathedral, is none the less interesting. Three centuries have passed since the first place of worship was erected on the site it occupies. In 1675 it was completed; in 1768 it was restored and again in 1848 it passed into the hands of the renovators. Great changes were made at those times yet it retains still much of the charm of the pioneer church.

It stands at the corner of Victor and St. Paul streets, within a stones throw of the famous old Bonsecours market where the noise and bustle of modern life is incessant. The church is in the midst of a network of old streets, narrow and unimproved with many structures standing that date back to the early days of the city. The old Chateau De Ramezay is only a short distance away; there it was that the society of the city at one time centred.

On the tower of the church stands the angel with its Nimbus brightly lighted at night guiding the ships as they enter the port like a great star in the heavens.

Whenever one visits the ancient church he is sure to find there some worshipper who has paused for a moment in the rush of his down town trading to present his petitions before the altar of his church. Many a sailor comes there before his ship sails for the wide ocean from Montreal to pray for guidance in the voyage.
