GIVE INCREASES TO TEACHERS

(Continued from Page 1.)

amount be paid for capable teachers.

Regarding the proposed increases for the male public school principals, the management committee set the scale in the case of three principals for three years.

Trustee Elliott objected to this, stating that the teachers should trust themselves to the board for each year, and that the present board should not legislate for future boards. He moved to have this part eliminated, but his amendment was lost by a vote of 12 to 4.

The Collegiate Institute staff asked for a flat increase of \$400 on their 1919 salaries, and the management committee asked that this be granted, but Trustee Elliott advocated giving them 20 per cent. increase on their 1919 salary.

Trustee Godwin thought it would be better to give \$400 to the teachers, and Trustee Jones was of the same opinion.

Trustee Elliott moved an amendment to have the 20 per cent. increase as mentioned, but his amendment was lost.

Trustee Jones asked as to the amount involved in the increases granted, and was informed that a little over \$20,000 would cover the increases.

Property Committee. The property committee, through its chairman, Trustee Campbell, asked that the caretakers of the Collegiate Institute and Victoria school receive a salary increase of \$100 each.

Trustee Godwin felt that these two caretakers were not receiving what they should get and moved that the increase be \$200 instead of \$100.

Trustees Elliott and Lemmon spoke in favor of the \$200 increase. It was decided to place the salary of these two caretakers at \$1,400, this amount to include all bonuses.

On motion of Trustee Renton, the Board's messenger Andrew Lanigan will also be given a boost of 25 per cent in his salary.

These recommendations of the property committee were also adopted.

That the following increases be given the caretakers of the schools mentioned, same to include bonuses: Central School, from \$750 to \$900; Macdonald school, from \$900 to \$950; Frontenac school, from \$750 to \$800; Louise school, from \$325 to \$450; Cataract school, from \$300 to \$400; Sydenham school, from \$300 to \$400; Rideau school, from \$200 to \$250; Depot school, from \$125 to \$150. Increases to date from January, 1920.

That the day work carpenters for the year be G. A. Payne for the Collegiate Institute and George Hunter for the public schools.

Playgrounds Committee. Mrs. Newlands reported for the Playgrounds Committee as follows: "That a playgrounds be opened in connection with Victoria School this year, making three in all under the jurisdiction of the Board."

That the sum of \$1,500 be placed in the estimates for playgrounds purposes during the year 1920.

That the property committee be requested to take into consideration the matter of placing skating rinks in connection with the different schools having suitable land for the purpose.

SICK HEADACHES For Last 10 Years

Headaches affect all ages and both sexes alike, but in all cases the treatment should be directed to remove the cause, for with the cause removed the headaches vanish for all time.

What is necessary for a permanent cure is something that will go right to the seat of the trouble. For this purpose it is impossible to find a better remedy for headaches of all description than Burdock Blood Bitters, acting as it does on every organ of the body to strengthen, purify and regulate the whole system.

Mrs. Flora Hall, Dominion, N.S., writes: "I have been troubled with sick headaches for the last ten years. I had lost faith in all remedies until recently a friend of mine advised me to try Burdock Blood Bitters. This I did, and found relief in a very short time. I would now recommend B. B. to anyone who is suffering from the same. I only took 3 bottles, and am never troubled with sick headaches any more."

B. B. has been on the market for over 40 years. Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

How To Kill Dandruff So It Won't Return

By a Specialist

That the dandruff germ is responsible for nearly all the diseases to which the scalp is heir, as well as for baldness and premature gray hair, is a well-known fact. We appreciate, therefore, the importance of any agent that will destroy its power. For this reason it is a pleasure to give herewith the prescription which a famous scalp specialist states he has found after repeated tests, will completely destroy the dandruff germs in from one to three applications. It will also almost immediately stop falling hair and it has in numerous cases produced a new hair-growth after years of partial baldness. This prescription can be made up at home, or any druggist will put it up for you—4 ounces Bay Rum, 2 ounces Laxone de Composes, one-half drachm Menthol Crystals. Mix thoroughly and after standing an hour it is ready for use. Apply night and morning, rubbing into the scalp with the finger tips. If you wish it perfumed, add 1 drachm of your favorite perfume. While this preparation is not a dye it is unequalled for restoring gray hair to its original color.

purpose, so that they will be ready for use in December of this year.

Trustee Godwin pointed out the need of a playground at Frontenac school, and moved to have one established there, but his amendment was lost.

These recommendations of the Finance Committee presented by the Chairman Trustee McLean were adopted:

That the salary of Macdonald, Secretary Treasurer, be increased 25 per cent.

That the salary of Miss Spooner, office assistant, be increased from the rate of \$260 to \$360 per year, for half day services.

That the tender of the Standard Publishing Co. for the printing for the year 1920, being the lowest, be accepted.

Care of the Teeth. Dr. Nash reported that 2,600 children had been given a dental examination and that the conditions were better than last spring, although there was room for much improvement. There were many parents who did not pay any attention to the notices given and some action should be taken. Teachers were helping the school nurse in the work. Dr. Nash recommended the opening of a dental clinic in the new school, and the examination be made by a nurse.

The management and finance committees will deal with a communication from Mr. Kelly, regarding buses for the band in connection with the cadet corps.

On motion of Mrs. Newlands, the management committee will consider the advisability of providing tooth brushes at cost price to the pupils and also take up with the Health Department the matter of securing moving pictures on the care of the teeth for educational purposes.

The school nurse, Miss Hester Lovick, submitted a most interesting report. She reported having inspected 379 pupils; instructions, given, 53; home visits made, 20; defective vision, 6; nasal breathing, 7; defective teeth, 74; The number of contagious diseases is very large this month:

Measles, 64; whooping cough, 19; chickenpox, 8; scarlet fever, 7; diphtheria, 1; Of the 64 cases of measles 30 were in the Orphans Home.

Twenty-four dental cards were returned during January and 22 are under treatment.

School Attendance. Inspector J. Russell Stuart submitted his report for January, which showed the following:

Enrollment in public schools, 2,705; average attendance, 2,077; Orphans' Home, 38; average attendance, 28; total enrollment, 2,743; average attendance, 2,105.

The enrollment is 39 less than for January, 1919, and the average attendance is 239 less. The smaller enrollment is accounted for by the small number of beginning pupils applying for admission in the kindergarten and primary classes, owing to the unusually severe weather and the fear of contagious disease.

The same condition explains the lowest average daily attendance for many years. The fear of compulsory vaccination also had an effect both in preventing new pupils enrolling as well as in withdrawal from school.

Principal E. O. Sliter, of the Collegiate Institute, also submitted a report which showed the following:

Enrollment, 587; average attendance, 530. The attendance is 98 above January, 1919, and the average is 51 higher. There has been much sickness since the new year among the teachers and pupils. The creation of a new form and the addition of a new teacher in January has relieved the overcrowding to a considerable extent, especially in Form III, but judging by present conditions, there will be need of a new second form.

Principal Sliter asks that \$1,000 be placed in the estimates to provide for furnishing a new room and paying an additional teacher for four months.

Principal Sliter asked that Miss Sloan be given a salary increase of \$200 in view of the great amount of work she was doing for the Collegiate. The board decided to grant this increase.

Among the communications received by the board were the following:

From Parent-Teachers' Association of Rideau school, asking that electric lights be installed in that school.

From Charles Stafford, asking for the position as caretaker of the new school being erected.

From the Parent-Teachers' Association of the Collegiate Institute, asking the Collegiate Assembly Hall be properly heated, seated, and supplied with a projecting lantern.

On motion of Trustees Jones and Mrs. Newlands, this matter was referred to the property committee, to secure an estimate of the cost, and to report to the board in time for the estimates.

On motion of Trustee Lemmon, the board gave the Lindsay Company, Limited, permission to have Miss Skilling give an exhibition on the grafanola in one of the school rooms after school hours.

Joy Cornall, at present principal of the school at Florida, makes application for a position on the teaching staff.

Charles Layzell, caretaker at Sydenham school, asked for an increase in salary, intimating that in addition to his ordinary duties he had "between twenty-five and thirty tons of coal to carry up three flights of stairs."

In the absence of Chairman Mills, who was detained in Toronto, owing to a most important engagement, Trustee Frank Anglin presided at the meeting, and the other members present were Trustees Best, Campbell, E. B. Cooke, William Cook, Elliott, Godwin, Jones, Lemmon, Lockett, Macdonald, R. V. Moore, Miss Mowat, McLean, Mrs. Newlands, Renton, Sawyer, Smythe.

Storing Away Lots of Ice. The men employed by the Kingston Ice Company are working very hard so as to put a big supply in for the summer months. Last summer there was a shortage of ice, due to a very mild winter, which prevented the company getting in a large enough supply. Had it not been for the artificial ice plant being in working order many of the ice cream parlors would have had to go out of business.

MIDWINTER REDUCTION SALE

ASTOUNDING FACTS THAT COUNT

Household Furnishings are "pouring" out of this immense stock daily to our utmost capacity. It is a fact that if the buying public knew the conditions of the market to-day, the advanced prices that are coming, and the great sacrifices we are making, they would grasp the chance while it is on.

IF BACK HURTS BEGIN ON SALTS

Flush Your Kidneys Occasionally if You Eat Meat Regularly.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, Bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding kidney complications.
