

BLIND LOVE

By Juanita Hamel

"Blind!" says the cynic of the man who is in love. Perhaps this is why many a masculine adventurer has paused on the brink of matrimony. But only paused—if he be blind enough to everything except the call of ONE pair of curving, ruby lips and the laughing, beckoning eyes of her he adores—he will not pause for long.

And no matter what the cynic says, the optimist shakes a knowing head and hides a smile—a smile that says he is glad some are gloriously blind enough to love, and that the brink he stands upon leads to happiness with THE girl of all the world to him.

20 Trials Free To Show You What Clean Teeth Mean. All Statements Approved by High Dental Authorities. This is to offer you a 10-Day Tube of Pepsodent—the peppin tooth paste which combats the film. Able authorities have proved the product by clinical and laboratory tests. The results are beyond any question. Leading dentists everywhere are now urging its adoption. We ask you to prove it by a 10-day test. Do this for your sake and your children's sake. See for yourself how it will help you to cleaner and whiter teeth. Film Wrecks the Teeth. That slimy film which you feel on your teeth causes most tooth troubles. Every modern dentist knows that. And for years dental science has sought a way to combat it. Film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Now science knows a way to combat it. The way is embodied in a dentifrice called Pepsodent. It is now used daily on millions of teeth, largely by dental advice. To those who don't know it we supply a free tube, so they may find it out. Old Ways Don't End It. This film is clinging. It enters crevices and stays. The tooth brush doesn't end it. The ordinary tooth paste does not dissolve it. That's why millions find that well-brushed teeth discolor and decay. Pepsodent is based on pepain, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it. But pepain must be activated, and the usual agent is an acid harmful to the teeth. So this method long seemed barred. Now science has found a harmless activating method, and teeth can now be daily cleaned as they never were before. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears. This means more than pretty teeth. Compare your teeth now with your teeth in ten days and decide what is right for yourself. Cut out the coupon now. Pepsodent CANADA The New-Day Dentifrice. A scientific film combater, based on activated pepain, now advised for daily use by leading dentists everywhere.
