WHEN ALL ADVERTISERS demand their money's worth, all publications will provide circulation reports verified by the Audit Bureau of Circulations.

It is one of the mysteries of the advertising world that while all manufacturers demand verification of weight and quality in the material purchased, some of them still buy advertising space without knowing what they are paying for.

Such advertisers, however, are now exceptional. Most of them demand verified A. B. C. circulation statements before placing contracts.

In the case of the British Whig, the demand is immediately met. The British Whig is a member of the Audit Bureau of Circulations—the only Kingston member.
