OUT-OF-TOWN REPRESENTATIVES: F. Calder, 22 St. John St., Montreal

Letters to the Editor are published only after the actual name of the writer.

Attached is one of the best job printing offices in Canada.

The circulation of THE BRITISH WHIG is authenticated by the Audit Bureau of Circulations.

Spring seems to have come along at last. Now is the time to see that the garden tools are in good shape

Serbia and London have both tax rates of forty mills for 1920, so that Kingston is fortunate in getting off with thirty-six mills, if the figure is as high as that.

While there seems to have been considerable discussion as to which one of the Allies won the war, there can now be little doubt as to which one is trying its hardest to lose it.

The family food budget for February amounted to \$18.70 a week, as compared with \$15.30 in January, \$13.41 a year ago, and \$7.75 in 1914.

The G.W.V.A. Provincial Convention refused to have its 1921 meetings at Kingston because of lack of hotel accommodation, but is going to Sudbury instead.

Almost at the same time as Lord Jellicoe was advocating a real navy for Canada, the government was making plans to dispose of what we already have.

The changes being made in the elections act by the Farmer government are all beneficial to the country.

Last fall's issue of Victory Bonds is now selling at three points below par.

The United States Senate, by refusing to ratify the peace treaty, has placed the country in a difficult position.

A bill has been introduced into the Ontario Provincial House to abolish property qualifications in municipal elections.

The farm papers of both Canada and the United States, among the liveliest and most influential publications, are devoting considerable study to the farm wage question.

The unrest in the entire industrial world is bringing us more and more to a recognition of the fundamental principle of the living wage.

The farm papers of both Canada and the United States, among the liveliest and most influential publications, are devoting considerable study to the farm wage question.

dealt almost exclusively with city conditions. "What is a living wage on the farm?" Opinions differ. A man of average industry and capacity should be able at least to marry, to live in a decent house and to provide the necessities of physical efficiency for a normal family, while allowing a reasonable margin for contingencies and recreation.

KINGSTON'S "PLACE IN THE SUN." In the estimates brought down in the House of Commons this week appear the following items: To improve Toronto harbor, \$1,700,000; for the Welland ship canal, \$5,500,000; for construction and betterments on the Trent Canal, \$400,000.

The story, aired so often in the press and in the House of Commons, that Sir Henry Drayton, Kingston's federal member, had promised a huge subsidy to this city, vanishes into thin air.

The fact that a local man, with commendable public ambitions, made a grave mistake, should not preclude this city from reaping the rich advantages which its natural location has justly entitled it to expect.

Business men are being warned to prepare for a "rainy day" and to so conduct their operations that they may not be caught with their assets tied up when the slump, that is regarded as inevitable, comes.

Other bankers and business men are sounding similar warnings, and suggesting that effective means be employed by merchants to protect their business.

When bankers begin to talk this way there must be something behind it that calls for the serious consideration of everyone who is earning and spending, for as prices go down, what about wages?

When bankers begin to talk this way there must be something behind it that calls for the serious consideration of everyone who is earning and spending, for as prices go down, what about wages?

voluntarily, after conquest, relinquished one-tenth the amount of territory, Britain has retired from. No other power in the world has voluntarily facilitated the acquisition of self-government by one-tenth of the colonies or possessions Britain has done.

Turned Around and Did It. Speaking at Kingston to a gathering of the United Farmer party, Mr. Kennedy, M.P., challenged any one to point to any plank in the U.F.O. platform which meant class legislation.

Most Successful Example. If it is only Hearst, there need never be any doubt as to friendly relations continuing between Canada and the United States—a relationship founded on a simple "gentlemen's agreement" of more than a century ago.

A Glaring Anomaly. It would appear that the American paper money is at a premium in our banks of from thirteen to fifteen per cent., but that the American dollar in gold or silver is only taken at par.

Sound Sense. There must be an end of all this luxury. Land waste is land luxury. Slowing up waste is idleness luxury. Money waste is land luxury and idleness luxury combined.

The Reason Why. What is the Difference Between Graham Flour and Whole Wheat? Graham flour from which Graham bread is baked is made from un-bolled flour.

Rippling Rhymes. THE FRISKY BACKBONE. The spine of winter beats the band, it is an artful dodger; at times we think we have it canned, and made a graveyard lodger.

Only Western Beef Sold At This Store. Boneless Pot Roast, 20c. per lb. Rump Roasts, 25c. per lb. Rib Roasts, finest, 28c. per lb. Round Steak, 30c. per lb. Hamburg Steak, 20c. per lb.

VEAL VEAL. At Very Low Prices. Smoked Hams, whole or half, 42c. per lb. Smoked Roll Bacon, 36c. per lb.

PUBLIC OPINION. If Britain is Wise. The bestial Turk is at last cowed into submission, and if Britain is wise she will forever hold the Turk in subjugation, strip him of the assassin's dagger, and limit him strictly to the confines of his own territories.

Britain's Justice. No other power in the world has voluntarily, after conquest, relinquished one-tenth the amount of territory, Britain has retired from.

the outside covering or bran has been separated. It contains everything but the bran and is therefore the most nutritious flour made.
