of 124 of these farms use pure-bred bulls. Their average yearly profit is \$1.02 per farm; 468 farms use grade bulls and have a yearly profit of \$734 per farm; while 23 farms use scrub bulls and are operated at a yearly loss of \$234 per farm.

Milch Cows More Popular.

According to a summary of reports of farm conditions in Ontario made by agricultural representatives to the Department of Agriculture, the high cost of feeding live stock is affecting breeders. Brant states that at a recent sale of pure-bred Shorthorn, good cows with plain pedigrees sold very cheaply, some really good ones going as low as \$120 and \$140. Bulls and very young stock scarcely brought best prices.

On the other hand, report shows that good milch cows are still highly regarded. Both Welland and Huron report sales of dairy cows at prices ranging from \$125 to \$200. The milk flow has largely increased with so many herds freshening.
