 Potatoes: In bags of 80 lbs.; No. 1, \$3.50, ex-track.

FEWER CATTLE TUBERCULAR.

British Columbia Reduced Disease From Eighty Per Cent.

Vancouver, B.C., Aug. 4.—"Ten years ago eighty per cent. of the cattle in British Columbia were infected with tuberculosis; last year only two and a half and three per cent. were infected, and within a comparatively short time the number will be nil," W. W. Alton, of Cartier, provincial government veterinarian, states. This year four per cent. of the cattle inspected were ordered destroyed, but this is not an indication that tuberculosis is gaining ground again, as the whole province has not been inspected yet, and the disease is more prevalent in some districts than in others, Dr. Alton said.

Under an act passed ten years ago, every bovine in the province is to be inspected for tuberculosis once a year if possible, and those infected with it are to be destroyed. To partly compensate the owner for his loss the government allows him fifty per cent. of the value of the animal, grade cattle being valued at \$100 and registered cattle at \$200. As additional protection all cattle imported into the province, whether from other provinces in Canada, the United States or other countries, are inspected before they are admitted. British Columbia is the only province in Canada which has an act allowing cattle to be prohibited from entering from other provinces.

RAIN IS NEEDED.

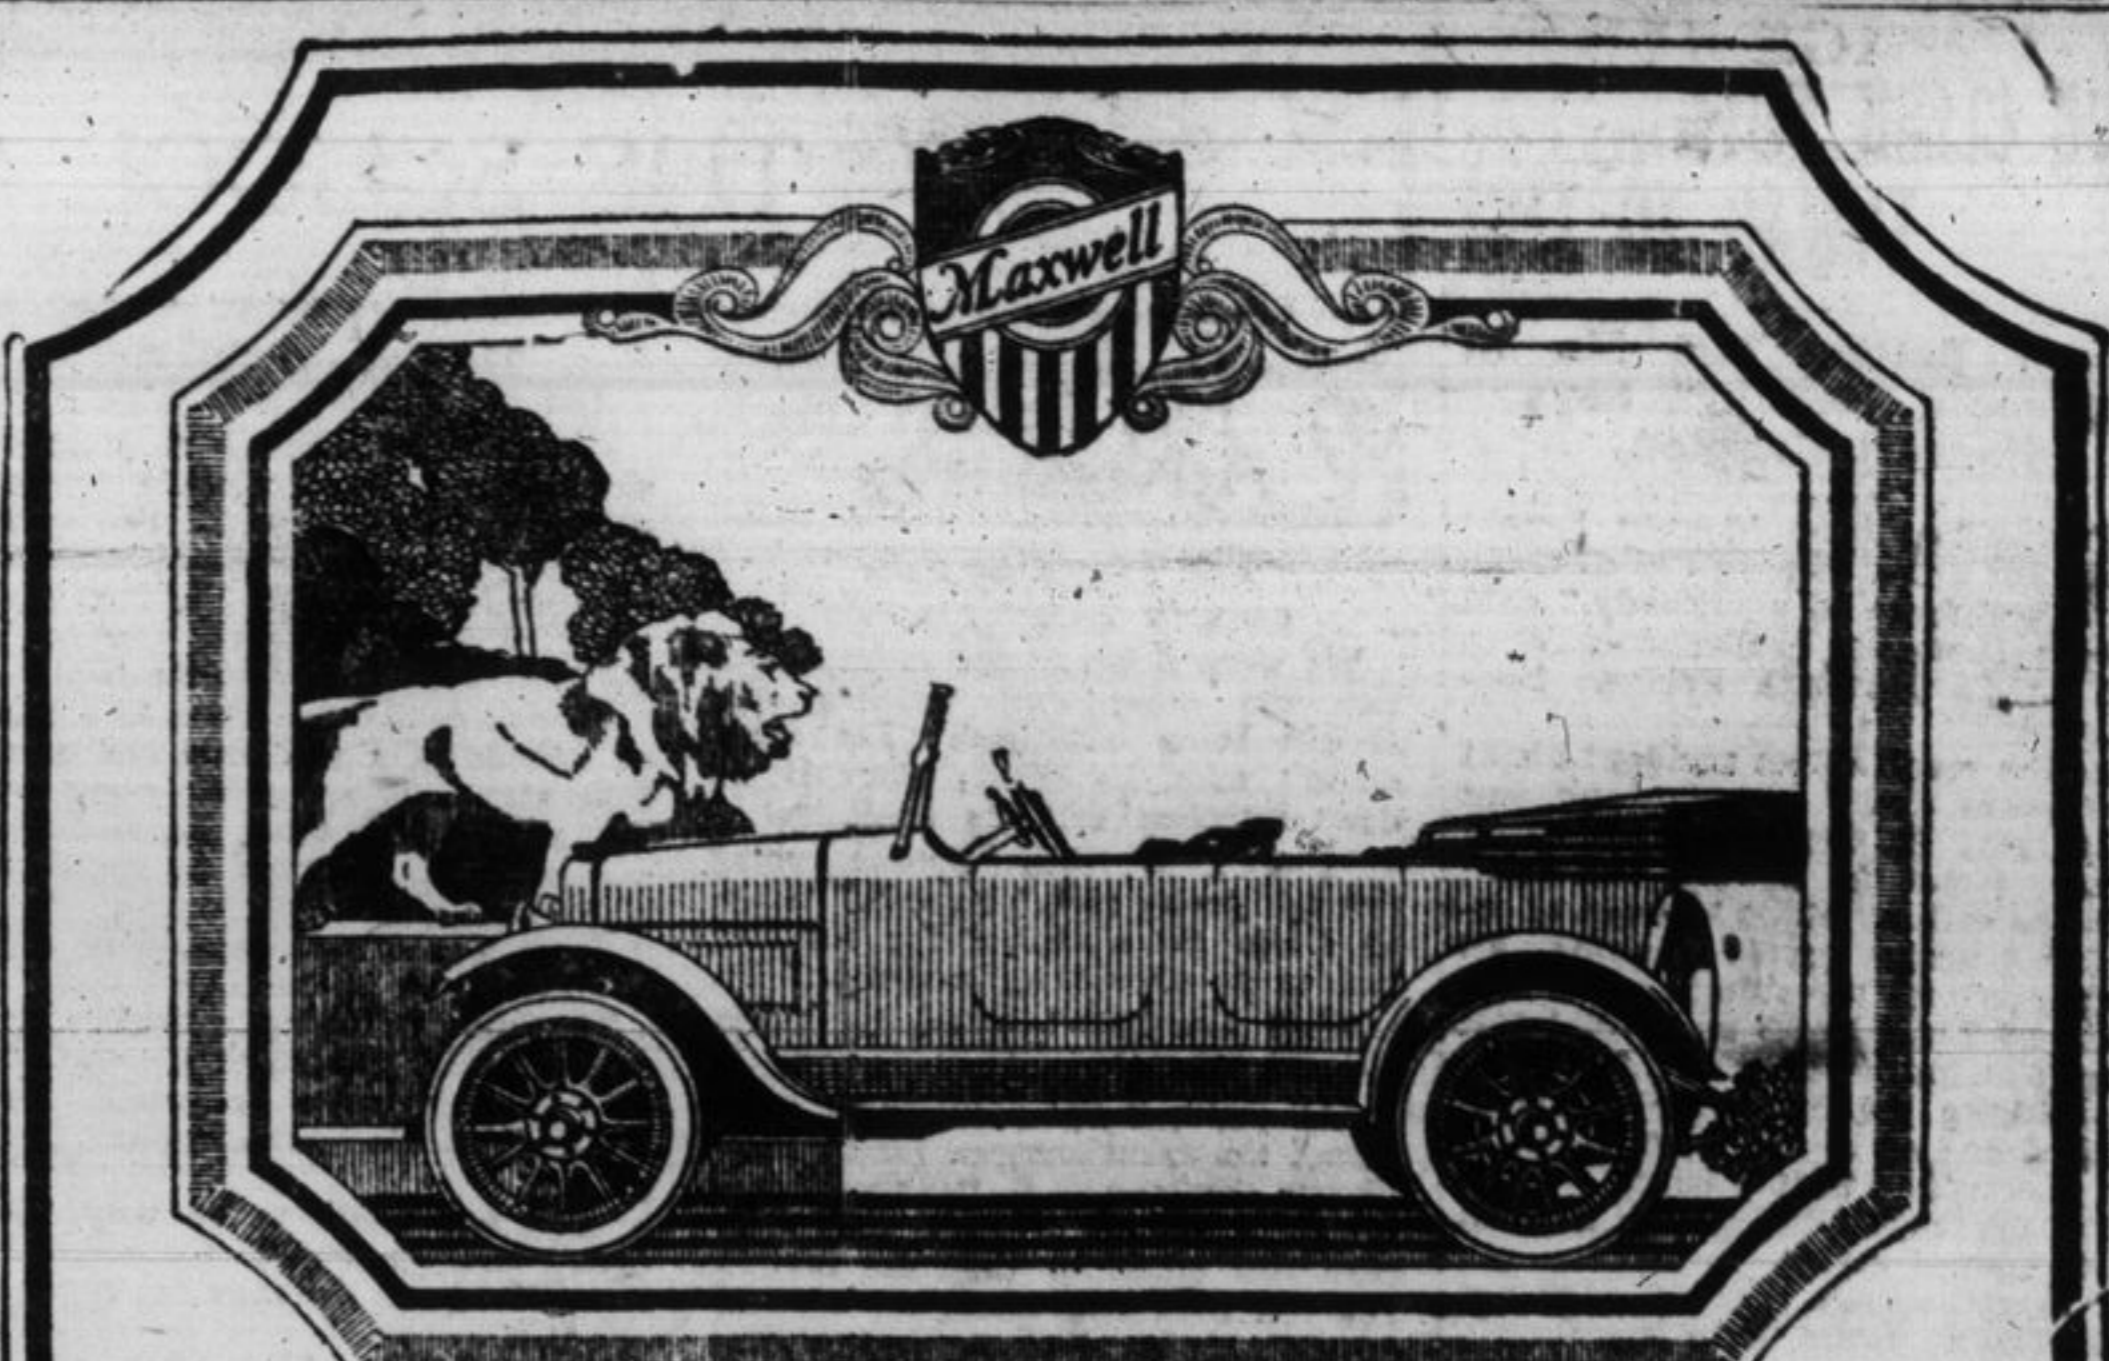

Best Hay Crop In Years Is Being Out.
 Regina, Aug. 4.—With a week of hot and dry weather prevailing throughout the province, the need for rain is again being generally felt. Local showers in some districts are mentioned in the report made by the provincial bureau of statistics. The best hay crop in years is being cut in the Saskatoon district. A great improvement in the crop outlook is reported from the Vonda district, where farmers are having a fight with grasshoppers. The reports from the various points show that the hail loss so far has been negligible.

CASUALTIES ARE ENORMOUS

Exceed Proportionately Those of Bloodiest Battle of World War.
 Paris, Aug. 4.—A message received through diplomatic channels states that the Polish casualties, when published, will astonish the world. The proportion of killed and wounded to the total number involved exceeds that of the bloodiest battles of the world war, which explains the reluctance of the Poles to publish their casualties, it was declared.

Director of La Presse.
 Montreal, Aug. 4.—St. Lomer Gouin, former premier of the province of Quebec, has entered on his new duties as political director of La Presse.

Passenger rates in the United States will be increased on August 20th.

An Analysis of the "Road Speed" of a

MAXWELL

is a tribute to its special steels.

Men driving larger cars have often wondered at the "road speed" of a Maxwell. True, in an open, straight stretch they have run away from a Maxwell. But in any "piece of going" (and we have many such roads in Canada) in which hills, turns, curves or rough roads enter into the general average, they do not outrun a Maxwell.

The reason for this is the special steels in a Maxwell. They are made to Maxwell's own formulae, and make possible construction combining great strength with light weight.

The lightness of the weight enables a Maxwell to take a turn with more ease and less slowing up, come down a hill under better control, ascend a hill as well, and make more time over a rough piece of roadway.

The strength of its steels enables a Maxwell to stand equally as well, or better, side strains, road unevenness, etc.

In other words, a Maxwell makes speed when a larger car cannot, and thus evens up to a high average its "road speed" without breaking the speed laws.

This ability in a Maxwell is one of many that is winning new friendships daily. Nearly 400,000 of them to date; in another year 500,000.

ON THE ROAD, NOT ON PAPER

Many a dealer honestly thinks that he sells wonderful cars and says so, glowingly. But after all, that's only what he thinks, and his idea may not be yours.

A car is valuable to you, not for what a dealer says about it, but because of what it will do for you on the road. That's where your car will make you happy or unhappy.

We have never been able to do justice to the Reo Six on paper. Words and pictures fall short. But on the road, where the only thing that counts is the merit of the car itself—there is where you certainly know, first hand and for yourself, that this amazing Reo Six is a car after your own heart.
