CAPT. LESSLIE MAY RAISE SUNKEN VESSEL

Six Pontoons and Wrecking Outfit Will Proceed to Steamer Keystorm. Captain William Lesslie intends to make another attempt to raise the steamer Keystorm which was sunk with a valuable cargo of coal in the St. Lawrence near Alexandria Bay some years ago. He has secured six pontoons from Buffalo and a wrecking steamer and will proceed to the scene of the sunken steamer in a few days. The equipment to float the boat is very complete and arrived at the Canadian Locomotive Company's wharf from Buffalo on Wednesday evening.

Already several attempts have been made to raise the ship, but as it is lying in 120 feet of water, the efforts have been fruitless. The boat has been examined a number of times and was written off as a total loss by the owners some time ago. However, Capt. Lesslie, whose qualifications as a wrecker are beyond question, and who has perfected a new type of pontoon, is hopeful that the vessel may be salvaged.

GEN. ROSS ATTACKS JUSTICE DEPARTMENT

Declares it Favors the Rich Man Rather Than Poor Man. Stirling, Aug. 12.—An amusing commentary on Premier Meighen's speech here last night, occurred when Brig-Gen. Ross, of Kingston, attacked the administration of justice in Canada on the ground that it favored the rich man rather than the poor man, and that the penitentiaries were run with needless cruelty in some instances. The Premier had spoken of his party as being National, Liberal and Conservative, but Gen. Ross boldly called himself "one of the rich men" and said that the principle and policies of Sir John A. Macdonald and of Sir James Whitney, "and the sooner we get there the better."

Dr. S. F. Tolmie, Minister of Agriculture, who spoke briefly, described the Prime Minister as "one of the brightest young men of this country." Canada, he said, was fortunate in having in Meighen a step into the shoes of Sir Robert Borden. Dr. Tolmie, in his remarks, dealt exclusively with agricultural topics, expressing his regret that in recent years there had been in Canada a gradual reduction in the average yield per acre of field grains. He said it behooved all Departments of Agriculture, both Federal and Provincial, to encourage a system of mixed farming throughout the Dominion. Touching on the British embargo on Canadian cattle, he said the Government would continue to urge its removal because there has been no pleuro-pneumonia or hoof and mouth disease in Canadian herds for over 30 years.

Dr. J. D. Reid, Minister of Railways, was present but did not speak. Can't Supplant Fox Trot. Cleveland, O., Aug. 12.—The fox trot and the easier waltz steps cannot be supplanted, according to members of the International Association of Masters of Dancing, which opened its 27th annual convention here yesterday. The dancer of today does not want to exert himself mentally or physically, hence the gradual demise of the rigorous steps. Since the freakish steps began to wane, waltzes and the two steps of ten years ago have been making a strong bid for a comeback, but it cannot be done, in the opinion of the dancing masters.

Sample From Godfrey. George A. Deare, Godfrey, has sent to the Whig a sample of the potato balls from the stock of his Irish Coblers, showing that he has been very successful in potato culture. These balls are the seed-carrying fruit of the potato plant, but these seeds are never used in growing potatoes, indeed, it would be impossible to raise tubers from these seeds in one season in our climate.

HOW TO PLANT AN ADVERTISING CROP Until the advent of the Audit Bureau of Circulations, advertisers sowed their business seed in a vast but fallow field. Some of it grew and returned a fair harvest—much of it was cast upon barren ground and was lost. There was no standardized method of determining the fertility of a publication's field. Experimenting was expensive. The A. B. C. has eliminated the barren spots of circulation. Planting an advertising crop is no longer an experiment. Advertisers KNOW the field through audit reports. They know whether it is fertile ground and sow their seed accordingly. The British Whig's circulation has been audited by the A. B. C. Advertisements placed in this publication are seeds well sown.
