My! But "Putnam's" Eases Corn Agony
Not only ease for corns, not only quick relief from the agonizing pain, Putnam's does more; it roots the corn out for all time. Lets you wear a shapely boot again, takes that ugly eye sore out of your toes. No pain, no burnt flesh, no fussing with acid salves or troublesome plasters. No more monkey business. Just use Putnam's and out comes the corn and stays out too. Nearly 50 years in use, costs a quarter, sold everywhere.

GAS IN THE STOMACH IS DANGEROUS
Recommends Daily Use of Magnesia to Overcome Trouble. Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excess hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a few ounces of Bisurated Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloat right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness or pain. Bisurated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Renfrew Will Buy Site.
Renfrew Council has decided to purchase a lot on Raglan street as a site for the Carnegie library, plans for which have already been approved by the Carnegie commission. The amount of the grant is \$16,000, and a lot can probably be had for \$5,000. The work of building will proceed at once, the structure to cost in the neighborhood of \$6,000. Some members of council are in favor of putting the building on the public park, Low Square, so in that case the site would cost nothing, and the \$5,000 proposed now for the location could be used for equipment, in accordance with the advice of the Central Library Board in Toronto.

Have Faith in Village.
The people of Calabogie never lose faith in the future of their village. The large power plant is the magnet that is to attract business enterprise. Of the 6,000 horsepower already developed only a fraction is in use, and the possibilities are practically unlimited. It is rumored that two American strangers in the village recently were representatives of a large automobile factory in Detroit and that they were looking for a desirable location where cheap power was available, for a Canadian branch. It is believed that the situation at Calabogie appealed to them. The rumor, too, is revived that the C.P.R. will experiment with the modern motor power and electricity the K. & P. branch.

A Crack Shot.
John Porter, sr., North Elmsley, although above the army age limit may still be called upon to use his skill in a sharpshooter for the next war. One evening while sitting on his verandah he noticed several small black and white animals gliding across the field toward the western part of the farm. Feeling like having some amusement he took his shot gun and ran down the lane in order to meet them crossing the road, but to his disappointment, the animals scenting him changed their course and went towards the south. The gamester, not to be done out of his sport, took a chance and fired the fatal shot at a distance of fifty yards. Upon going to the spot he found no less than six skunks. Four had been killed outright, the other two dying shortly afterwards.
