ONE HUNDRED OUT ON QUEEN'S CAMPUS

The Beginning of a Big Revival of Athletics is Apparent.

Monday, October the fourth, 1920, saw over one hundred men out in uniform for rugby practice on Queen's lower campus. They were not out for some special occasion nor for a demonstration of any kind, but merely for one of the two practices held every day.

The students, of course, did not do this all in one day of their own volition. Last fall Professor Lindsay Malcolm, in co-operation with several other true Queen's men, got the students of the university together and put it up to them.

The soccer team, also, is showing up well. Two or three good working in uniform have been held, while there is a soccer ball being kicked around somewhere all the time.

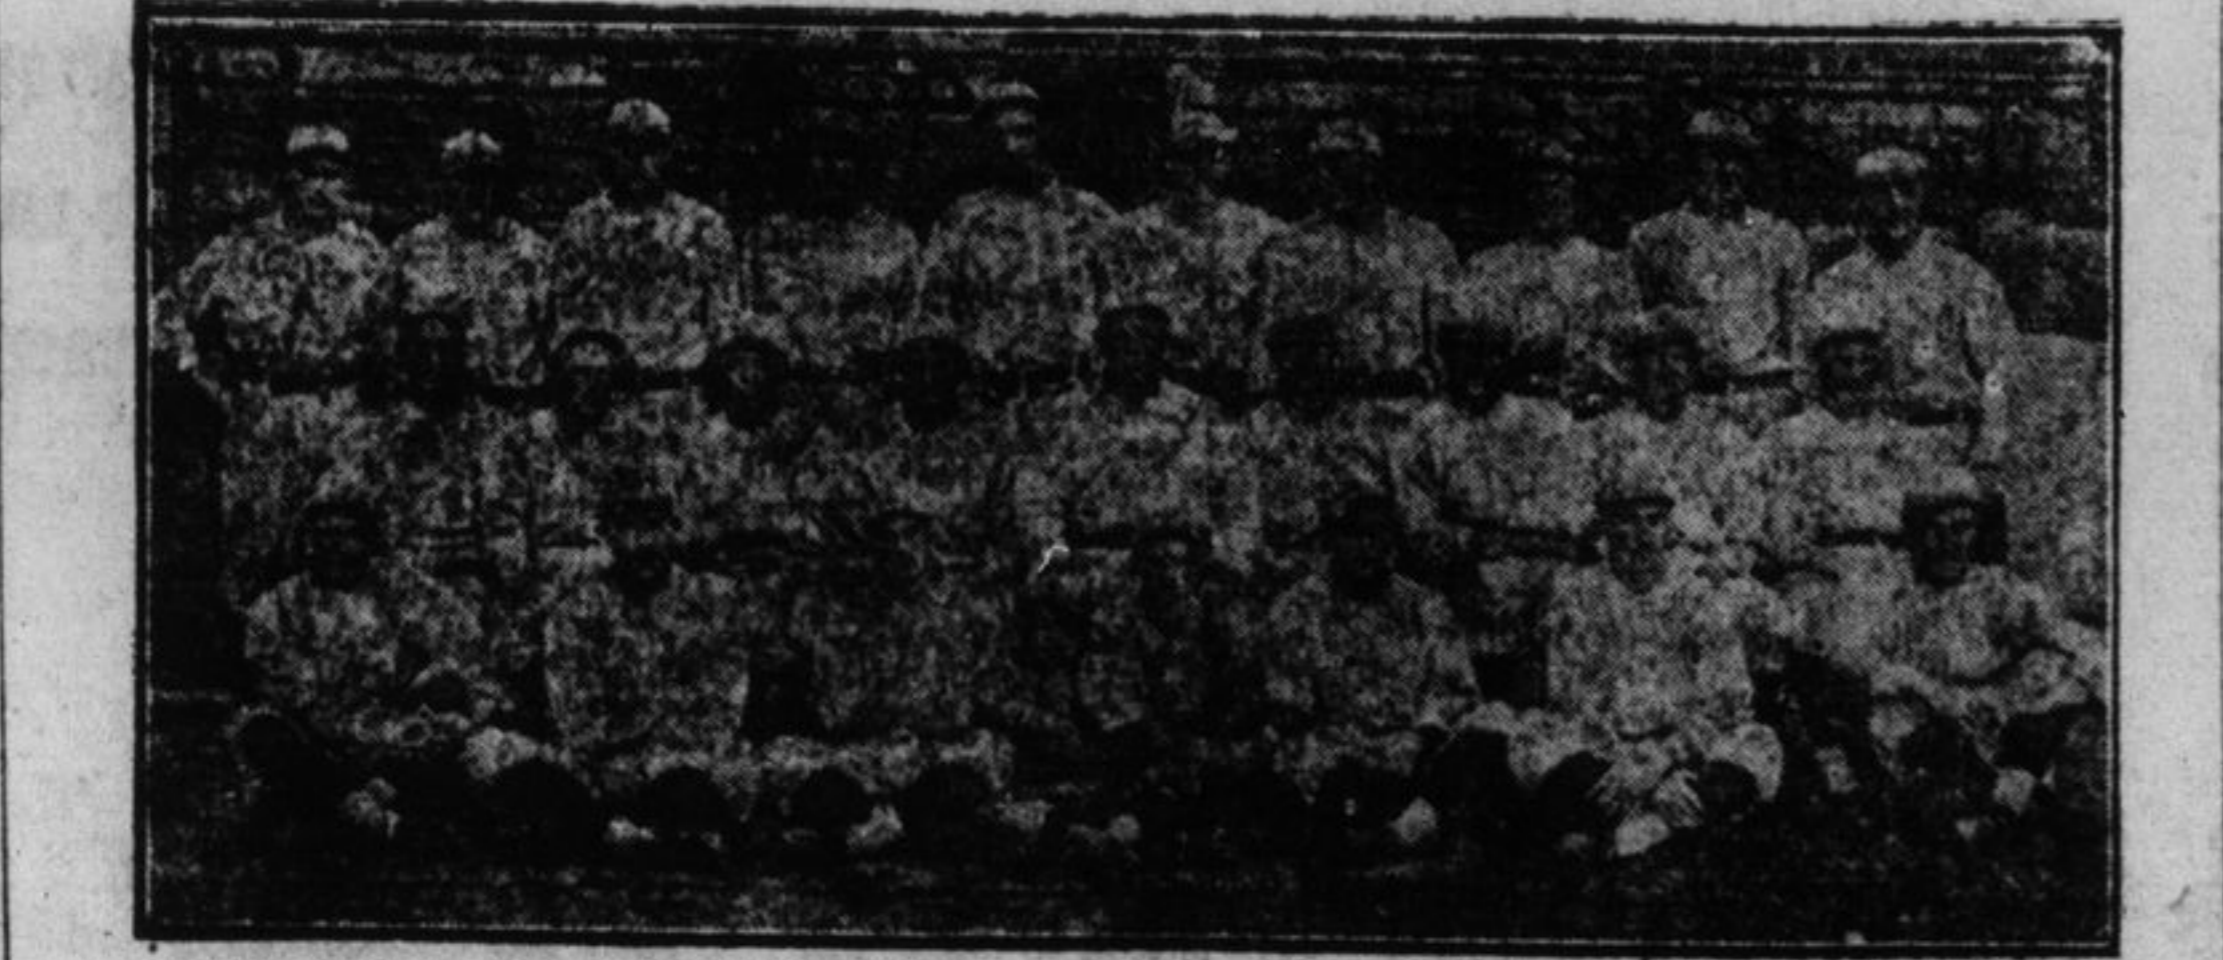

The track team has started in to work and several were out taking runs on the campus track yesterday afternoon, putting themselves in shape for the big events of last year's line-up were on deck and displayed just as good and better ability than last year.

Altogether the sport outlook at Queen's is on the mend and decidedly so. All over the university there is evidence of a big revival in athletics and, at the rate at which it has started, it is going to be some revival.

Another by-law to purchase the canal and adjoining property, on which are erected the Giffard Furniture company's factory, W. D. Midmer's lumber and box factory, and the pumping station of the Napanee waterworks, was carried by a big majority.

An arrangement has been entered into between the governments of the wheat producing states by which the compulsory wheat-pooling scheme established during war years is to be continued on somewhat similar lines for the 1920-1921 harvest and possibly longer.

THE IRISH DESIRE TO TRADE WITH CANADA

Belfast, Dublin and Cork Merchants Wish to do Business Direct.

Ottawa, Oct. 5.—Writing from Belfast to the Weekly Bulletin of the Department of Trade and Commerce, Trade Commissioner J. Vernon McKenzie discusses the effect of the disturbances in Ireland upon trade. He states that after a fairly comprehensive tour of the leading commercial centres of Ireland, he finds that there is considerable temporary and local dislocation of trade. The logical centres for distribution of goods, he states, are Belfast, Dublin and Cork, but at the present time it is practically impossible for any one house, in any particular city, to distribute effectively throughout Ireland owing to the many boycotts and counter-boycotts which have been enacted. He finds that there is a keen interest in Canadian goods in all parts of Ireland, and a definite desire that direct trading relations may be established. Mr. McKenzie says that Belfast, Dublin and Cork merchants are unanimous in endeavoring to establish a trade with Canada, which does not have to pass through the hands of London brokers. There is a demand for Canadian cheese, timber and wood products of all kinds. Agricultural implements and garden tools have found a ready market. Belfast timber importers are interested in a Montreal steamship company, which would be a reasonable price for the Irish markets.

Decline Below \$2 a Bushel.

Chicago, Oct. 5.—All grain prices smashed down yesterday to the lowest level since 1917. Impairment of confidence on the part of owners appeared to be largely responsible. The Youth Did Not Murder His Mother

Toronto, Oct. 5.—The Ontario government will act this week upon reports of Dr. Harvey C. Clark, director of Ontario hospitals in the department of prisons, Dr. Arthur Jules Johnston and Dr. C. K. Clarke, who have had Arnel Love under observation since he made the startling confession that he murdered his mother, the crime for which his father was hanged at Owen Sound.

All the doctors are convinced that the young man did not murder his mother and that his story that he committed the crime was "a sudden obsession," due to the excitement of the religious revival which was being carried on at the time in Salem, Grey county, which is not far from the farm where the young man was employed as a farm hand. His stories told at the time of the trial, and following the revival, according to the doctors, "do not fit together."
