REG. U.S. PAT. OFF.  
For Constipation

**—the Modern Method of Treating an old Complaint**

Nujol works on an entirely new principle. Without forcing or irritating, it softens the food waste. This enables the many tiny muscles in the intestines, contracting and expanding in their normal way, to squeeze the food waste along and out of the system.

It is absolutely harmless and pleasant to take. Try it.

## TRIMMING IN USE

Wealth of Embroidery Takes Precedence Over Silhouette.

Lavish Use of Decoration Raises Question of Where Needlework is to Come From.

The trimming takes precedence over the silhouette, asserts a prominent fashion authority. This is the thing that strikes one most forcibly in the late models. Many of the old forms of trimming are cast aside for embroideries, which are used so lavishly that we wonder where all the workers are coming from to turn out so much of this needlework.

It is unfortunate to run to an extravagant use of any mode of ornamentation. No one can gain the decorative effect of beautiful embroidery, but it, like anything else, becomes commonplace when too extensively used.

One reason for using so much trimming may be because the silhouette has changed so slightly designers have felt that this is the only way of offering something new. Straightline dresses are covered with embroidery, the stitches being placed so closely together that it is almost impossible to discern the patterns. Coats and hats show quite as much embroidery as do the frocks.

It is surprising to see such a costly use of trimming directly following so many movements toward economy. It would seem that any effort toward economy in dress is like swimming against the current. With what measure of success these dresses will meet it is difficult to say. They must necessarily be expensive with so much needlework ornamenting them.

Very unusual are the things used to work out embroidery designs. A chemise frock of satin has the entire

front and back portions overlaid with huge clusters of grapes embroidered in natural colored wooden beads. Steel nailhead embroideries in conjunction with bright red silks are used to ornament day-time frocks of dark blue Foutre twill.

### PLAID UMBRELLAS FOR FALL

Colored Silks and Noveltyes Hold Prominent Place; Few Changes in the Handles.

Plaid silks are perhaps the most striking note in the fall line of umbrellas. Colored silks, which have attained such pre-eminence in this field, remain leading favorites for fall, but the noveltyes are plaids and stripes, with plaids leading.

Practically no black silk umbrellas for women are being shown, although, of course, they remain the height of fashion for men.

Umbrella handles manifest few changes for the coming season. The pyroxylin handles, which have been so fashionable for the past year, still continue to be favorites.

There are some noveltyes being shown in carved wooden handles, bird and animal heads being favored. They are so carefully carved and tinted that although of wood, the feathers, fur or hair seem almost real. These handles have feather carrying loops, club ferrules and pyroxylin tips and are considered unusually novel. Nothing could be smarter with sport outfits or tailored suits than these clever sport handles.

Some Dresden handles, and also some Cloisonne effects are still being sold to women who prefer the artistic and delicate to the more novel and smart.

**Silk and Wool Sweaters.** Silk and wool mixtures for sweaters are as popular as the all-silk or fiber silk weaves.

Numerous advantages are claimed for a motor driven hair clipper in which the motor is behind the hand grips instead of between them and the cutting blade.

New Zealand government chemists after long experimenting have found a way to separate dirt from kauri gum and increase its yield of oil for use in varnish.

Mrs. Roy Mackie, Orillia, Ont., writes: "I desire to express my thanks for the relief I have had by using Milburn's Laxa-Liver Pills.
