WHY MRS. GROWING-HEAVIER STOPPED TO THINK. MISS ADMITTEDLY-STOUT (gushingly)—I'm so glad to hear you say that this dress makes me look thinner! Don't you want the pattern?

Why the Baby Cries. Johnny—What makes the new baby at your house cry so much, Tommy? Tommy—It don't cry so very much—and anyway, if all your teeth were out, your hair off, and your legs so weak you couldn't stand on them, I guess you'd feel like crying yourself.

Perfectly True. The two comrades were in a poetical frame of mind. "Here's one for you, Jack," said Tom. "In the dark and dreary day, a silver lining you will spy, waiting till the clouds roll by."

All the world's a stage and the barber is given many parts.

"I know that," said Charlie, "but it's a fact, all the same."

Save Your Eyes  
Your Youngster's Precious Eyes deserve the best care  
ARE you giving sufficient thought to your children's eyes? It is a duty you owe your children to make sure that they are not suffering from eye defects. Many "grown ups" wearing glasses today would not need them if their eyes had been properly cared for in childhood. Don't guess. Know!  
The only safe way is to have your children's eyes examined by a competent Optometrist. His scientific methods of examination enable him to detect eye defects and his knowledge fits him to advise and prescribe. Consult your Optometrist. He knows.

My Nerves Were So Bad at Times that I Could Not Keep Back the Tears  
WHEN the nerves collapse there is such a feeling of utter helplessness that strong men, as well as women, cannot do otherwise than weep.  
The average physician is sadly at a loss when consulted by a nervous patient, and we have from such an eminent authority as Dr. Richard Cabot the statement that half the ordinary practitioners' work is with derangements of the nerves.  
Think of the headaches, backaches, neuralgic and sciatic pains, the sleeplessness, indigestion and tired, depressed feelings that give the doctors their business, and you will realize the truth of this statement of Dr. Cabot.  
The conditions under which people have lived during the last few years has meant enormous strain on the nervous system. The fear, the worry, the anxiety have wasted nerve force at such an enormous rate that persons of nervous temperament have been unable to stand the strain—the result is nervous collapse.  
Recovery must necessarily be slow, and the average doctor, accustomed as he is to treating symptoms only, finds difficulty in bringing about restoration, and often fails to realize the helpless and discouraged condition of his patient.  
Because Dr. Chase's Nerve Food supplies in condensed and easily assimilated form the vital substances with which Nature rebuilds the starved and wasted nerve cells it stands out to-day as the greatest of nerve restoratives.  
A careful reading of this letter will give you an idea of just what you may expect from the use of this treatment, because it describes an average case:  
Mrs. S. Sharp, Midland, Ont., writes:—"About eleven years ago I had a serious nervous breakdown, and was so bad at times that I could not keep back the tears. I also had a queer feeling in the back of my head; sometimes it seemed to be going backwards. I could not do any sewing, and finally could do no work at all. I tried other remedies and doctors' medicine, but they only gave me temporary relief. Last fall I commenced using Dr. Chase's Nerve Food, and had not taken very many until I found I was getting better. I kept on taking them, and am at present greatly improved, and am now able to do my work, and they have strengthened me splendidly. I can highly recommend Dr. Chase's Nerve Food for nervous trouble of any kind."  
The next step is to make the test of Dr. Chase's Nerve Food in your own case. If you are careful to see the portrait and signature of A. W. Chase, M.D., on the box you buy you will be sure that you are getting the genuine. 50c a box, 6 for \$2.75, all dealers, or Edmansen, Bates & Co., Ltd., Toronto.
