IS FULL OF TRAGEDY.

Death Causes Appalling Depopulation of Russia.

Berlin, Feb. 25.—Preliminary results of the census taken last year by the Soviet government, which appear in the Russian newspaper Rul, published here, are full of tragedy. They show that town populations suffered an average loss of thirty per cent., which figure is much exceeded in the great cities. Petrograd has only 705,900 inhabitants against 2,446,917, while Moscow has decreased by over 800,000. The only increases shown, and those are very small, are a few small towns in Siberia. Death, not any back to the land movement, appears to count for this terrible depopulation for the agrarian districts have only increased at the expense of the towns by 3.5 per cent.

A snowdrop in a Milton garden is blooming five weeks ahead of its usual time.

Desperate fighting between Reds and Georgians is reported from Tiflis.

They Have to Lay their Egg a Day.

These fowls are fed the "Royal Purple" way, which supplies all the essential food substances necessary to feed the hen and the extra material required to produce an egg a day per hen during the winter.

ROYAL PURPLE Laying Meal

is a correct combination of wheat, corn, meat, ash, lime, etc. It has been on the market for years and thousands of farmers and poultrymen now rely entirely upon it for winter eggs.

They know the results it gives. Better start right if you want eggs, by ordering a sack of Royal Purple Laying Meal from your feedman or direct from us. Insist on *Royal Purple Laying Meal*.
