

To Manufacturers

THIS Bank considers that one of the most important of its functions is to meet the needs of Manufacturers. Our record of substantial development during the past 48 years has been largely due to this policy. By the closest co-operation with Manufacturers, both large and small, and by a never-failing vigilant interest on their behalf, wide mutual benefits have resulted.

We cordially invite the accounts of Manufacturers.

THE STANDARD BANK OF CANADA

TOTAL ASSETS OVER NINETY MILLIONS

Kingston Branch: J. F. Rowland, Manager.

Manufacturers

IF your home demand is slackening, are you investigating markets abroad? Our Foreign Department has detailed information on export trade possibilities which we shall be glad to place at your disposal.

THE CANADIAN BANK OF COMMERCE

PAID-UP CAPITAL : \$15,000,000
RESERVE FUND : \$15,000,000

KINGSTON BRANCH—R. T. Brymner, Manager.

Childrens' Savings Accounts

We suggest you start your children on the road to Thrift by opening Savings Accounts for them, and then encouraging them to increase their balances. A small sum will open the account, and by the time a boy or girl is of age there will be a substantial amount for a start in life. Few things give a young man or woman more assurance than the knowledge that there is always a nest egg in the Bank to fall back on.

The Manager of any Bank of Toronto Branch will gladly take the few minutes necessary for the pleasant duty of opening Savings Accounts for your children.

THE BANK OF TORONTO

Back of Every Mortgage A Life Insurance Policy

As a matter of good business, every mortgagor should protect his estate in this way. Why leave your wife and family to struggle with an obligation of this kind? Your loss, as breadwinner of the home, is sufficient handicap to your dependents.

Do you know that, by systematically depositing a few dollars with The Manufacturers Life each year, you can create an estate equal to the amount of your mortgage? Moreover, if you live until maturity of the policy, the proceeds become payable to you, and the mortgage can then be retired with the sinking fund so provided. Isn't it worth considering? Better make certain that your property will be clear of encumbrances at your death, thus eliminating the possibility of a forced sale whereby the labor of years is sacrificed. Write us to-day.

The Manufacturers Life Insurance Company

Select Laxative Medicine With Great Care

In debility and weakness, medicine should be mild and far reaching. Many pills and purgatives are too hard, are drastic instead of curative, excessive action is always followed by depression, and knowing this Dr. Hamilton devised his pills of Mandrake and Butternut so as to mildly increase liver and kidney activity, so as to flush out the system by toning and regulating the bowels. Thus do Dr. Hamilton's Pills eliminate poisons from the body, thus do they restore clearness to the skin, thus do they renew health and strength. To keep your system in healthy, good working order, regulate it with Dr. Hamilton's Pills. 25c. All dealers or The Cataract House Co., Montreal.

A Blend of Imported Virginia Leaf

Spare The Pileated Woodpecker.

Those who spend much time in the north woods are usually familiar with the northern pileated woodpecker, commonly known as "black woodcock," "log cock," or "cock-of-the-woods." It is a handsome bird, and the largest Canadian woodpecker, being nearly a foot and a half long. Unfortunately, its handsome look and large size often make it a mark for the guns of hunters, who desire it as an ornament in their home. It is not a game-bird, however, but a most useful insect-eater, which should be protected at all times. It feeds chiefly upon beetles and their larvae, especially the kinds which bore into timber, and upon ants and their larvae. It is very strong, and will sometimes tear an old stump quite to pieces with its bill in order to secure the borers and ants which have taken refuge therein. In this way it helps greatly to protect sound timber from the ravages of these pests. It also eats, in late summer and fall, wild fruits and berries. The "black woodcock," like all our woodpeckers, is rightly given strict legal protection at all seasons by the Migratory Birds Convention act and the provincial laws, and any one killing or molesting it or disturbing its nest or eggs, unless by authority of an official permit to do so, is liable to severe penalty. Our forests will receive the benefit if, under this protection, this bird is able to increase considerably in numbers.

Its general color is brownish black, but its throat, stripes on the side of its head, and large patches in its wings are white. The male bird has two scarlet "moustache" streaks at the sides of the bill, and a scarlet crest. The female has no scarlet except on the hind part of the crest.

An empty stomach provides food for thought.

They Have to Lay their Egg a Day.

These fowls are fed the "Royal Purple" way, which supplies all the essential food substances necessary to feed the hen and the extra material required to produce an egg a day per hen during the winter.

ROYAL PURPLE Laying Meal

is a correct combination of wheat, corn, meat, ash, lime, etc. It has been on the market for years and thousands of farmers and poultry-men now rely entirely upon it for winter eggs.

They know the results it gives. Better start right if you want eggs, by ordering a sack of Royal Purple Laying Meal from your feed-man or direct from us. Insist on Royal Purple Laying Meal.
