A capacity house greeted the premler showing of William DeMille's famous "Midsummer Madness" in Kingston which was presented at the Strand last night. This famous director has proven again that he is a master in his capacity and brought forth another offering that will long live in the memory of those who saw the picture yesterday. It is an every-day story of modern love and marriage and deals with a very delicate subject very delicately and drives home the truth in every detail. No doubt it brought many a blush because it is produced on facts and facts of the greatest importance in the every day life of to-day.

The Strand novelty offering was indeed a beautiful number the stage being completely banked in palms, ferns and lilles and the centre attraction being a huge lily in which appears the lady soloist. The lighting effects are wonderful and the singing of the Rosary by three voices brought rounds of applause.

The usual short subjects were also THE VALUE OF HOME screened and a concert by the famous Strand orchestra rounded out one of the best bills in many a day. The attraction coming Thursday will be the famous English racing story. "The Gentleman Rider." which is an all-British picture produced in England, featuring England's most noted screen star, Violet Hopson. The big attraction of the season will be week of April the 4th, which will be Paramount Blue Ribbon week. Be sure and try in the big contest -Advt.
