

LEADING AUTHORITIES NOW SHOW JUST WHAT TANLAC REALLY IS

Physiological Action of Principal Ingredients of Celebrated Medicine on the Human System Is Explained.

SUPREMACY CLAIMS WELL SUPPORTED

Many of the Medicinal Elements Have Been Known and Used Since Civilization First Began.

Tanlac, the celebrated medicine which has been accomplishing such remarkable results throughout this country and the United States, is composed of the most beneficial roots and herbs known to science. The formula is purely ethical and complies with all National and State Pure Food and Drug Laws. Altogether, there are ten ingredients in Tanlac, each of which is of recognized therapeutic value.

Many of these ingredients have been individually known and used since civilization first began, and some of them have been used and prescribed by leading physicians everywhere, but until they were brought together in proper proportion and association, as in the Tanlac formula, humanity had not heretofore realized their full value and effect.

In referring to one of the more important ingredients of Tanlac, the Encyclopedia Britannica says: "It has been the source of the most valuable tonic medicines that have ever been discovered." In referring to others of the general tonic drugs contained in Tanlac, the 13th Edition of Potter's Therapeutics, a standard medical text book, states that "They impart general tone and strength to the entire system, including all organs and tissues."

This same well-known authority, in describing the physiological action of still another of the ingredients of Tanlac, which is of value in treating what is commonly known as "a run-down condition," uses the following expression: "It is highly

esteemed in loss of appetite during convalescence from acute diseases."

There are certain other elements in Tanlac which, because of their influence upon the appetite, digestion, assimilation and elimination, improve the nutrition and vital activity of the tissues and more important organs of the body, and produce that state of general tonic which is called Health.

The United States Dispensary makes the following comment regarding another ingredient: "It may be used in all cases of pure debility of the digestive organs or where a general tonic impression is required. Dyspepsia, atonic gout, hysteria and intermittent fever are among the many affections in which it has proven useful."

There are certain other ingredients described in the Dispensary and in other standard medical text books as having a beneficial action upon the organs of secretion, whose proper functioning results in the purification of the blood streams passing through them. In this manner objectionable and poisonous ingredients of the blood are removed, and the entire system invigorated and vitalized.

Tanlac was designed primarily for the correction of disorders of the stomach, liver and bowels. At the same time, however, it is a powerful reconstructive tonic and body builder, for it naturally follows that any medicine that brings about proper assimilation of the food and a thorough elimination of the waste products must, therefore, have a far-reaching and most beneficial effect upon the entire system.

Although Tanlac's claims for supremacy are abundantly supported by the world's leading authorities, it is the people themselves who have really made Tanlac what it is. Millions upon millions have used it with gratifying results, and have told other millions what it has done for them. That is why Tanlac has become the real sensation of the drug trade in this country and the United States, and that is also why it is having the largest sale of any medicine of its kind in the world today.

GIRL CONFESSES TO FAKING A ROBBERY

Stenographer Rehearsed Hold-up Scene With Partner in Jewellery Firm.

Newark, April 9.—Miss Gussie Lerner, 18-year-old stenographer, admitted, police said, that the "hold-up" at the Heyman Brothers jewellery manufacturing establishment last night was staged by Harry Heyman, with her assistance, after it had been thoroughly rehearsed by them for the past two weeks. Heyman reported to the police Wednesday night that three masked robbers entered his place and escaped with diamonds and jewellery valued at \$21,000. The "loss" was covered by insurance.

After telling her story the girl was placed under arrest, and detectives were sent out to locate Heyman, who was "ill in bed," according to information given by members of his family.

The young woman charged that Heyman induced her to aid him in his alleged hold-up scheme by pleading that he faced bankruptcy and ruin unless he was able to raise \$20,000 quickly. He confided to her, she is said to have admitted, that he had burglary insurance to that amount and it was then that they laid their plans.

Seven Sentence Sermon.

It is almost as presumptuous to think that you can do nothing as to think you can do everything.—Phillip Brooks.

Any man may commit a mistake, but none but a fool will continue in it. —Cicero.

So far to-morrow and its needs I do not pray; Still keep me, guide me, love me, Lord, Thro' each to-day. —Ernest R. Wilberforce.

The Lord reigneth; let the earth rejoice. Ps. cxvii. 1.

We are shaped and fashioned by what we love.—Goethe.

There is no great and no small To the Soul that maketh all; And where it cometh, all things are; And it cometh everywhere. —Emerson.

When in God thou believest, near God thou wilt certainly be.—Leland.

Clayton Will Survive Adverse Harbor Report

Clayton, N.Y., April 9.—On the St. Lawrence says: "The government has turned down Clayton's request for a breakwater. If there is any real logic here because of the decision it does not appear on the surface. There were many excellent reasons advanced for the movement, but a good many better ones could have been used against it. A tie up place for coal barges to smoke up the water front is no real asset to a summer resort. Detached from shore and in direct line of the finest sunset view in America, it would have been little short of a crime. If Clayton receives no harder jolt she will survive."

OPPOSE NEW DIVORCE COURTS

Petitions Again Being Circulated in Niagara Diocese. Hamilton, April 9.—Being of the opinion that the evils of divorce will increase if power is granted to courts to dissolve marriages for causes arising after marriage, the committee appointed by the Niagara synod has recommended against the granting of divorces in this country, and arrangements have been made to circulate petitions throughout the diocese of Niagara opposing this. These petitions, when filled, will be submitted to the senate and house of commons.

Parham Personal.

Parham, April 8.—Miss Hazel Wagar is visiting at A. C. Wagar's. A. C. Wagar has sold his store to Mr. Merriman. Mr. Cassels is at Frank Wagar's. Edward Barr is at S. Barr's. Mr. and Mrs. Frank Good and Alexander Howes, and Fred Barr are in the city; Miss Clara Howes has returned to Sydenham. G. H. Goodfellow and family are at L. B. Bate-man's. Bert Cornwall has moved on his place, formerly owned by Angus McLeod, who leaves soon for Tamworth. Mr. and Mrs. F. Charl-ton and children, Belleville, at J. N. Smith's. Mr. and Mrs. A. Good, Mr. and Mrs. W. Smith visiting at J. N. Smith's. Mrs. G. A. Smith is visiting her daughter, Mrs. S. Ball, Odessa. DeWitt Leslie and Miss Win-nie Clow were married in Kingston on April 6th. Mrs. McCumber, Wag-arville is at W. L. Goodfellow's.

Merrills Heads Department.

Alexandria Bay, N.Y., April 9.—At the annual meeting and election of officers of the Alexandria Bay fire department the following officers were elected: Chief, Melvin Merrill; secretary, Merton B. Pearce; treasurer, J. Davis Comstock. The newly elected chief appointed Jack Schmitt first assistant and Glenn Shaver second assistant chiefs.

Mr. and Mrs. A. A. Welsh, who have been spending the winter months in Florida, returned to Gan-anoque on Thursday, and will com-mence shortly to put the inn in order for opening.

Mr. and Mrs. Fred Weeks have re-moved into the hotel in Consecoc, which is being reopened.

Fresh Milk Always Handy on Your Pantry Shelf

Talk with your Grocer about this convenient milk supply

EACH day you require Milk. Some days you need more milk than others. Sometimes you need it unexpectedly. In winter—you have the annoyance of frozen milk. In summer—you know well how quickly milk is apt to "turn"

And, to make assurance doubly sure, it is then STERILIZED.

Note that nothing is added—no sweetening or preservative. Nothing but some of the water is taken away.

USE Carnation Milk just as it comes to you as cream for tea, coffee, cereals or fruit.

Dilute it with an equal part of water and it fills every milk requirement. Add still more water, and it makes a nourishing drink for the kiddies—as fresh as it is safe.

You'll find Carnation Milk economical, too, because it stays sweet for several days after the can is opened.

Begin to-day to get your milk from the modern milkman—your grocer. Phone now for half-a-dozen cans of Carnation Milk.

Your daily milk supply is quite a problem, isn't it?

Let your grocer solve it for you. He is the modern milkman. He can fill your needs for milk a week—or a month—ahead. He sells Carnation Milk—Nature's finest food in a safe, pure, convenient form.

CARNATION Milk is just pure "whole" milk from Canada's finest dairy farms. Our condenseries are in the heart of the finest dairy-ing centres. Milk reaches us while perfectly fresh.

Immediately part of the water is taken away by evaporation.

Then, this rich milk of creamy consistency is sealed in air-tight containers.

Made in Canada by CARNATION MILK PRODUCTS CO., Limited, Aylmer, Ont.

YOUR HEALTH

What You Can Do for Hair That Falls Out in Patches

By Royal S. Copeland, M.D., Commissioner of Health, New York City. Baldness is bad enough if it takes the usual form. The crown of the head may show increasing evidence of loss of hair. The brow may become higher and higher as the hair recedes from it. As time goes on all the hair on top of the head may disappear and the forehead may extend backward to below the crown.

Unfortunately, however, some persons get bald in patches. The head looks moth-eaten.

This form of baldness is called "alopecia areata." Baldness of any type is called "alopecia." "Areata" relates to the circumscribed area or patch of trouble. The cause of suddenly developed baldness is not well understood. It is entirely different from the slowly progressing type of what we may call "natural baldness." In the latter there are underlying conditions which I described in another article. In ordinary baldness there is weakness or softness of the heart's action. Added to poor circulation is the bad habit of wearing a heavy, stiff and tightly-fitting hat. From the lack of proper nourishment the hair falls out.

There are other cases of baldness, however, where the loss of hair immediately follows an attack of disease. For instance, after severe influenza there may be almost complete loss of the hair. Fortunately,

in such cases, it grows in again very speedily.

In alopecia areata the patches of baldness suddenly appear. Without warning, perhaps, the afflicted person finds a whole handful of hair in the comb and gazes into the mirror in horrified amazement at the ugly patch of bare scalp.

Sometimes the beard may be involved or the eyelashes may disappear. The eyebrow or any other hairy surface may be affected.

There are various explanations offered for this embarrassing difficulty.

For a time it was thought to be due to some parasite. Experiments to pass it on from one person to another have failed, so this theory has

been abandoned.

Others have considered it a disease of nervous origin. The nerves of nutrition have been thought to be disturbed and the baldness to be the effect.

Another theory it that it is due to toxins of some sort. Dental defects, intestinal disturbances, tonsillar disease and other conditions where absorption of bodily poisons take place have been considered possible factors.

In persons under 40 years of age recovery is probable. In older persons the condition is not so hopeful.

Every possible cause must be sought and removed. Locally, massage, stimulating applications, the

various therapeutic lights, and electricity have their uses. Local applications of stimulating drugs have appeared to help some cases.

Every attention should be given the general health. Fresh air, exercise, lots of sleep and the simple rules of hygiene will do much to place one on the road to recovery.
