The Marvelous Invention of Sir William Crooks

The inventor of the wonderful Crooks' Tubes, which made the X-Ray possible, has brought out a marvelous tinted glass, which excludes all the harmful rays of light from entering the eye.

To persons who suffer from inflamed eyes due to the terrific glare of the sun, sea, or snow, these imperceptibly tinted lenses are a boon almost priceless in value.

We know when and when not to prescribe these lenses. We take professional pride in helping our patrons choose the glasses that will do them the utmost good, at the same time to avoid all needless expense.

Let us explain to you the benefits of the Sir William Crooks' Glass.

DESERTS HUSBAND AND TWO LITTLE CHILDREN

Charge Against a Kingston Woman—The Police Are Making Enquiries.

That she ran away with another man, deserting her husband and two little children, is the charge against a Kingston woman, and an effort is being made to trace her.

According to information given the Whig, the woman left the city on April 8th. One child is two years old and the other a baby about eight months. The children were left with an aunt, but it was learned on Thursday morning that the aunt has been very ill, under the care of a doctor, and is unable to give the children proper care.

And according to information given the Whig this is not the first time the mother has run away. It is alleged that a year ago she lived for a time with a man at Cornwall.

It was stated by the police on Thursday morning that every effort possible was being made to get trace of the woman. She was located at Niagara Falls but disappeared from that place.

DOGS KILLING SHEEP IN PITTSBURG TOWNSHIP

Farmers Fail to Place Identification Tags on Their Dogs.

It is reported that dogs are committing depredations among the sheep raisers in Pittsburg. Among those reporting sheep killed are John Sibbett, R. Gates and Mrs. Beeton. All dogs are supposed to wear tags, according to the Ontario laws, and it is likely that in the event of any dog being caught killing sheep, the owner, in addition to paying the cost of the sheep, will be prosecuted and fined for failing to tag his dog. Many farmers, it is stated, have not placed identification tags on their dogs, and this is an evasion of the law, for which penalties are provided. Where sheep are being killed and the dogs cannot be identified, the township must pay for the value of the sheep. The law requires all dogs to wear tags was brought about for the protection of innocent taxpayers.

INTERESTING CASE IN THE POLICE COURT

In Which a Citizen Was Charged With Trafficking in Liquor.

Magistrate Farrell had an interesting liquor case before him on Thursday morning. A citizen was charged with trafficking in liquor, but the evidence, as brought out by A. B. Cunningham, who appeared for the accused, showed that he and another citizen had made an agreement about the cost of the liquor. The citizen who sent to Montreal for the liquor paid out \$24 for a case, but the other man paid him \$6 for a share of it. Mr. Cunningham held that there had been no trafficking in liquor, that the two men had merely made an agreement to secure the liquor and pay for it in this way. In order to prove a charge of trafficking, it must be shown that there was bartering, commercial transaction, or business.

Magistrate Farrell reserved his decision in the case.
