THE C.P.R. ANNUAL REPORT

Company Able to Meet Heavy Demands and Yet Pay Dividends.

Montreal, May 5.—The report of President Beatty presented at the annual meeting of the Canadian Pacific Railway yesterday stated:

"The operations of the company during the year have been conducted under conditions which were so exceptional as to costs, as to make it unique in the company's history, as well as in the transportation annals of Canada.

"The back pay, which accrued before the increased freight and passenger rates became effective, amounted to a little less than seven million dollars and the additional amount required to pay exchange on coal and other purchases to four million dollars. The total, including provision for income taxes, involved additional costs of approximately thirteen million, five hundred thousand dollars, which were charged to the expenses of the year. All these extraordinary and additional expenses the company was able to absorb and pay its fixed charges and usual dividends. This result was only possible because of the excellent character of the company's facilities provided in previous years at large capital expense and the possession by it of equipment used with the greatest possible efficiency, which enabled the heavy fall movement of traffic to be effected with a despatch which has rarely been equaled.

"About the middle of December a pronounced contraction in business took place, resulting in diminished traffic of all descriptions. This depression still continues but by rigid economies the net result for the first three months of this year are somewhat in excess of those of the corresponding period of last year, notwithstanding the greatly increased costs of labor prevailing in 1921.

"The parity of conditions which has existed in United States and Canada resulted in the forced adoption in Canada of what is known as the McAdoo award and amendments and of the award of the United States labor board made in August, 1920. Increases in wages may have been justified at that time by the abnormal increase in the cost of living, but they were accompanied by alternatives in working conditions of such a character as to impose a heavy and, in the view of the companies' unnecessary burdens on the transportation agencies of North America. The combined effect of them has been to greatly increase the cost of production of all companies. The conditions which rendered them necessary being rapidly ameliorated, it is apparent that readjustments will be essential. The effort to secure reductions in wage and alterations in working conditions has already been commenced in the United States and is proceeding in a sane, orderly and legal manner. What is accomplished there will undoubtedly reflect on the rates of pay and working conditions in Canada. These increases in wage scales, which will not be the only element which entered into the increase in freight and passenger rates, were still a very outstanding and potent factor, and when the readjustment of wages takes place it is only right that the rate situation should be again reconsidered with a view to revision downward. The rates are high but the existing scale of wages and consequent high freights is not responsible for the present business depression; the causes of that go much deeper than the mere standard of wages paid to any given class and are world-wide, while reduction in wages does carry with it a reduction purchasing power in the individual. Such reduced purchasing power is not represented by the difference in the scales of wages because of the general decrease in prices of the commodities to be purchased. Nevertheless, the reduction in both wages and freight rates would have a pronounced and beneficial effect on the general sentiment in the country through the encouragement it would give and the confidence that normal conditions had been more nearly reached.

HEADACHES

MAKE LIFE MISERABLE.

Headaches are one of the most aggravating troubles one can have, and it is hard to struggle along with a head that aches and pains all the time.

Headaches seem to be habitual with many people; some are seldom, if ever, free from them, suffering continually from the dull throbbings, the intense pains; sometimes in one part, sometimes in another, and then again over the whole head.

There is only one way to get relief from these persistent headaches, and that is by going direct to the seat of the trouble, for unless the cause is removed, the headaches will still continue to exist.

The fact that Burdock Blood Bitters keep the stomach, liver and bowels toned up is proof enough to show that it will eliminate the cause of the headaches.

Mrs. Harold Lanain, Owen Sound, Ont., writes:—"My system was run down and my blood out of order. I suffered a great deal from severe pains in my head, which made me feel very miserable. After having a bottle of Burdock Blood Bitters, and was very glad to notice a decided improvement in my health, so I took another and am glad to say that it has done me an enormous amount of good. I have recommended it to my friends, who were in a similar condition, and they all say it is a wonderful remedy."

CONDEMNED MAN ACCUSED A WOMAN

Wife Charged With Murder of Husband Created Dramatic Scene in Court.

Utica, N. Y., May 5.—When Rutter B. Warder, sentenced to die in the electric chair for the murder of Henry Werner at Ilion, pointed an accusing finger at her in the courtroom at Herkimer yesterday, Mrs. Henry Werner, on trial for her life for complicity in the murder of her husband, broke out into a vehement and impassioned denunciation of Warder. Mrs. Werner never took her eyes off Warder while he was on the stand, but when he dramatically accused her of plotting her husband's death, pointing to her and shouting "That woman there!" she cried out in a shrill voice, heard throughout the courtroom, "You're a liar!" She continued to repeat this until calmed by court attendants. Warder denied having killed Werner or having been present when it was done. He charged that the killing was done by Mrs. Werner in the cellar of his home. His story on the stand flatly contradicts that given in his confession on the day after the murder which figured largely in his trial. In his confession he said he shot Werner in a ravine near the latter's home.

Warder's testimony pictured Mrs. Werner's mother, Mrs. Minnie Woodbridge, who is also under indictment for complicity in the crime, as urging her daughter to get rid of her husband and even suggesting means for disposing of him.

COUNT UPON HUNGER ENDING THE STRIKE

Call Made to Whole British Labor Movement to Defeat Strategy.

London, May 5.—An appeal to the whole labor movement to support the miners was issued yesterday by the joint committee of the Parliamentary Labor Party, the National Labor Party executive, and the Parliamentary Committee of the Trades Union Congress. In the course of the appeal it is stated that "the mine owners and the government have declared war upon the miners. The weapon is starvation, its first victims are women and children. It is to be a war of attrition. They count upon hunger forcing the miners back to work in a fortnight on terms which Sir Robert Horne tried to dictate to them last week. They calculate that both the spirit of the men and the unity of the federation will by then be broken. Organized labor must defeat such strategy. It must defend its own future by rallying to the miners now."
