QUEEN'S ALUMNAE TEA

Attended By Many Old Graduates as Well As New.

The local branch of Queen's Alumnae Association is to be congratulated upon instituting the tea in the cafeteria immediately after convocation, for here the events of the day are talked over, the girl graduates received congratulations, men students, too, who have just reaped the reward of their labors, are here with their parents, whom their Kingston friends are glad to meet, and who have long been looking forward to this day. On Wednesday the reunion brought still another element into the throng for men, and women were here to whom Queen's, as she is today, is the fulfilment of their most rosy dreams, and who, looking back to the old days, can hardly realize that these stately halls of grey lime stone set on their back ground of living green, now starred with golden dandelions, are the offspring of the old medical and old arts buildings.

"Fresh as new, my dear—and I washed it myself" It's my old georgette—another tussle with the washer-woman and I believe it would have fallen to pieces. So, of course, as things are so dear now and we must make them last, I thought I'd wash it with Sunlight. Or rather—let Sunlight wash it, for there's no need of any rubbing—just soaping and rinsing. And see— isn't it just lovely? Sunlight Soap The purity of Sunlight is such that it will not fade or discolor anything washable—it contains absolutely no fillers or adulterants—it is the most economical soap your money can buy. It's all soap. Insist on getting the Soap you ask for—SUNLIGHT SOAP. LEVER BROTHERS LIMITED, TORONTO

Person-to-Person Long Distance Calls When you ask the long distance operator to get a particular person in another city, and connection is established and you talk with the person called, the "Person-to-Person" rate applies. This service requires a greater amount of operating effort and more circuit time than "Station-to-Station" calls because a particular person must be brought to the telephone before you can talk. The rate for such calls is about one-fourth greater than the "Station-to-Station" rate. Again, when the calling party, in placing a call, names a specified time at which he wants to talk and the conversation is held accordingly, the "Appointment" rate applies. Additional operating labor and circuit time have been required to make the appointment. The "Appointment" rate is about one-half greater than the "Station-to-Station" rate.
