A Start in the Right Direction

The temptation to spend money in your pocket is greater than when your money is in a savings account in the bank. That margin of temptation may mark the difference between an opportunity to go into business later on or of working for wages with nothing saved and nothing ahead, at the end of your working years.

Why not open a savings account in The Bank of Nova Scotia today?

Your account will be welcomed and you will have made a start in the right direction.

Fruit.

Bananas, doz 30 to 40
Grape fruit 12 to 15
Lemons, doz 30 to 40
Oranges, doz 30 to 60

BETTER BULLS WANTED.

Campaign Starting to Replace Scrubs in Saskatchewan.

Saskatchewan, with a view to keeping the quality of her live stock up to that in other provinces, is putting on a Better Bull campaign as a start this year. The work will be under the direction of the Provincial Department of Agriculture backed by the Saskatchewan Cattle Breeders' Association and stock breeders' clubs throughout the province. Procedure is being based on the experience of stock improvement movements in other parts of Canada and in the United States, and a big reduction of the percentage of common cattle shipped from the province is expected to result from the work. Stock breeders' associations in Saskatchewan, and the Provincial and Dominion Departments of Agriculture have for some years been advocating a province-wide move to improve the quality of cattle herds in the province by the introduction of pure-bred bulls in the place of scrubs at the head of both dairy and beef herds. It is estimated that Saskatchewan's share of the total loss of \$25,000,000 in the Dominion due to the use of inferior bulls and lack of finish in killed cattle is \$3,000,000 per annum. With the general run of cattle in Saskatchewan improved by better breeding the farmers of that great grain producing province will have little trouble in finding the wherewithal to finish them in accordance with the most exacting demands of the home or export market. Ontario breeders can heartily wish the Saskatchewan Better Bull campaign every success, more especially since the Ontario breeders are more than likely to benefit from the increased demand for good pure-bred bulls that will result from the undertaking.

British Farmers Gain.

Since lifting the British embargo on Canadian cattle depends on that action benefiting the British, and the British farmers have a lot to say in the matter, the part of Canadian farmers in the controversy should be to point out that removal of the embargo would result in greater benefit to British feeders and breeders of cattle than to Canadians who are in the same lines of business.

If export of feeder cattle should result in increased activity in cattle breeding here, this would mean bigger business for British breeders of high class breeding stock, as well as cheaper feeders for the British finishers of cattle for the block. These advantages to the British farmer are assured, while the ultimate benefit to Canadian farmers from taking advantage of the embargo removal is doubtful.

With the embargo removed, Canadian farmers with feeder cattle on hand at the present moment would benefit immediately. But if the business of exporting feeders continued for any considerable length of time, there is little doubt that the Canadian farmer's farm would suffer. There would be very little chance of profit in feeder cattle if they were fed grain up to a limited extent on this side of the Atlantic. Without fattening cattle to feed to, how would the Canadian farmer feed up his grain; if he sells the grain, how will he manage to keep his farm in heart?—Removal of the embargo is desirable for a number of reasons. But whether it is desirable to take advantage of the removal of the embargo is a question.

New Hatched Chick.

When the chick is hatched it comes into the world with a sufficient supply of nourishment in the form of egg yolk, to last it for several days. What it requires, at the start is not feed but warmth and rest. When the chicks show positive signs of hunger, which will be in about two or three days, give them a feed scattered on a coarse sand or chick grit. For this first feed, hard boiled egg and bread crumbs in the proportion of about four of bread crumbs to one of eggs is used. Feed little and often alternating this feed with scratch grains and dry mash. Supply tender green feed such as lettuce or something similar. After the first week hoppers of dry mash should be kept before them and by the time they are about ten days old, the egg feed may be discontinued. Place grit, water and a dish of sour milk where they will have free access to them. Nothing provides animal food in better form than does sour milk.

Value of Trapnesting.

Trapnesting is usually not practical on general farms where chickens are kept largely for eggs and meat, though it pays well to head the farm flock with cockerels out of high producing trapnested hens. Trapnesting is tremendously practical for the constructive breeder and absolutely necessary for pedigreeing, unless birds are mated in pairs only and each pair separately penned. Pen matings, as compared with pair matings, make it impossible to identify the eggs laid by individual hens unless trapnests are used.

A locomotive jib crane capable of handling 56-ton loads at radius of 87 feet, which has been built for use at the Panama canal, is believed to be the largest machine of the kind in the world.

According to an English Scientist there is an individuality in heart beats affecting the handwriting to such a degree that it can be identified when writing is magnified.

EASTERN SPRUCE

Our present stock of Spruce is supplied by some of the largest and best mills in Quebec and New Brunswick. Customers are thus assured of sound stock and first class milling.

MATHIEU'S SYRUP OF TAR & COD-LIVER OIL

CURES

Coughs, Colds, Grippe, Bronchitis, Whooping Cough, Asthma, Etc.

MATHIEU'S SYRUP is a sovereign tonic combining the curative properties of TAR and the strengthening virtues of COD LIVER OIL.

Colds, when neglected or badly treated give rise to consequences of such a grave character that you should not risk using inferior preparations.

MATHIEU'S SYRUP is the only genuine remedy whose reputation has caused to crop up many imitations of doubtful value.

ON SALE EVERYWHERE

Ceaseless Advertising

Admit that we are getting into dog days, and that business is not so good.

Nevertheless, the great successful advertisers have not ceased advertising. They know that during the summer most people eat three meals a day, wear clothes, clean their teeth, use automobiles, buy things for vacation, occupy houses and lead normal lives.

The so-called dog days are, nine times out of ten, the excuse of a lazy man for evading decisions.

The present effect of Daily Newspaper Advertising is just as great as it ever is.

If the experience of successful advertisers is a guide to you, consider following their lead.

Continue your Daily Newspaper Advertising.

Issued by Canadian Daily Newspapers Association, Head Office, Toronto.

Hoot Mon!

A Scotman named Macdonald was very proud of his ancestors, and was never tired of boasting about them. On one occasion he remarked to a friend that his clan had lived before the Flood.

"Well," replied the other, "I never heard of the name of Macdonald going in the Ark."

"Noah's Ark!" retorted Macdonald, contemptuously. "Who ever heard of a Macdonald that hadn't a boat of his own?"—Tit-Bits.

A New York fireman is the inventor of a helmet with a dry battery light in front for illuminating and for signalling by passing red or green glass in front of its lens.

Machines have been invented that quickly sort for length bolts and rivets that accumulate about industrial plants and shipyards.

More Cattle

If your progressive ideas for cattle raising are beyond the financial resources at your command, talk the matter over with the local Manager of this Bank.
