With our young men learning to cook, and our girls taking boxing lessons, we wonder which of these accomplishments will be known as the menly art fifty years from now. Ever notice how hard it is to go usy and pay an old debt?

## Prettier Teeth Next Week

If you will now start this delightful test

This is to offer you a way to whiter teeth, cleaner, safer teeth. Such glistening teeth as millions now enjoy.

Your dealer will give you the means. Get it and watch the effects. See your teeth grow

prettier-note how clean they feel. Dentists everywhere advise this method. Millions of homes have adopted it. Try it this week, for your own sake. Learn what it means to you.

To remove the film

Your teeth are coated with a dingy film. It is viscous - you can feel it with your tongue. It clings to teeth, enters crevices and stays. It clouds the teeth and causes most tooth troubles.

The ordinary tooth paste does not effectively combat it, so the tooth brush has left much of it intact. As a result, teeth lose their luster. And, despite all brushing, tooth troubles have been constantly increasing.

The film is what discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germs breed by millions in it. They, with

It multiplies the salivary flow - Nature's great tooth-protecting agent. It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise form acid.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay. Pepsin is also included.

Made in Canada

tartar, are the chief cause of pyorrhea. Many other serious troubles are also traced to

### Science combats it

Dental science has long sought ways combat that film. The ways have now been found. Able authorities have amply proved them. Leading dentists everywhere advise their daily use.

The methods are embodied in a new-day tooth paste-Pepsodent. It combats the film wherever it may linger. In this way it brings surprising results which one quickly sees. Over 5,000 new people daily are trying out this modern method.

Fights acids too

Pepsodent brings three other effects which authorities now desire.

But Pepsodent is most important to the children. Their teeth seem most subject to these film and starch attacks. Dentists advise that children use Pepsodent from the

benefits it brings.

film-coats are dingy.

## Save Children From Blindness

CIFTY per cent. of all blindness-that most dreadful of all afflictions-is preventable!

A nation-wide organization formed from the Canadian National Institute for the Blind is now operating in Canada in a worthy endeavor to eliminate all preventable blindness. We are laying particular stress on the need for proper care and attention of the eyes of infants at birth. Help us make those who are responsible see the great need for better care.

In Toronto, for instance, a special class has been formed of children with poor vision and defective eyesight. These little people use specially printed books. Their class room is arranged to give their eyes complete rest. Their sight is being conserved; they will retain vision throughout life.

We provide glasses and treatment for those low-sighted men, women and children who are unable to pay. Our expenses in this branch of our work are heavy and we must turn to you for
