

INDUSTRIAL WEEKLY REVIEW KINGSTON

CANADIANS MUST LOOK FOR FOREIGN MARKETS

U.S. Tariff Proposals Call For Action—Natural Products Will Be Very Hard Hit.

Tariff experts of the government are engaged at present in a minute examination of the new Fordney bill, introduced in the United States congress as the basis of the proposed permanent tariff of that country.

conditions. While it is true that the new tariff at Washington contains a clause allowing negotiations with any country for reciprocity, there is little tendency to take advantage of it.

Arguments Used.

In the reciprocity campaign of 1911, one of the main arguments used against the pact was its unpopularity, and the likelihood of the United States abrogating any such arrangement when political or economic reasons suggested such a course.

Comparisons Made. The outstanding effects as being worked out here, are of interest. The table showing the commodities mainly involved, the proposed new duty, the present duty and the exports from Canada in the fiscal year which ended March 31st, last, main items, are as follows:

Table with columns: Commodities, Fordney, Present Tariff, Ex. Value. Includes items like Cattle, Fresh beef, Pork, Fresh milk, Butter, Cheese, Eggs, Horses, Fresh fish, Harley, Wheat, Flour, Bran, etc.

Federal Policy. Nor is any retaliatory policy considered likely. A revision of the tariff here, which is now inevitable, with uncertainty as to just when it will occur, will be based on what is considered best for Canada under the

regarded here as making a new attempt undesirable, while if one were made, the organized opposition inevitably encountered would likely cause it to be abortive.

sider what it will do and when. There is some opinion in favor of full tariff revision next session, and another idea that it would be well to effect the revision only after a general election on the whole tariff question.

Fruit Affected.

The total of all grains exported last year and now affected was \$112,631,110. Apples to the value of \$171,256 were exported last year when dutiable at 10 cents per bushel.

Agriculture Hit.

Obviously where the definite effect is the greatest is in the application of the proposed tariff to the products of agriculture and of the live stock industry.

The green color of blanched or etiolated plants may be restored by exposure to light.
