rom wrought iron by hand, can be east in their entirety from steel by One French railroad is converting

200 of its locomotives into oil burners and another will experiment with An indoor golf game that has been nvented includes a plush mat for a

tee and a target like pocket to catch the balls An acetylene generator that requires attention only once a month

has been invented in Europe for illuminating road signs. Cuff links that cover the buttonholes and are joined around the edges of cuffs have been patented by

a Rhode Island inventor. By adding 6 per cent of molybdenum an Englishman has produced what is claimed to be the hardest tool steel yet invented. Apparatus has been invented to de-

erages by volume in a few minutes almost automatically. The cork from hundreds of thousands of discarded life preservers in England is being removed to be

ermine the alcoholic content of bev-

manufactured into linoleum. An electric implement for retouch ing photographic negatives enables user to do more than twice as muc

work as with hand tools. French manufacturers of course textiles are experimenting with the African alfa grass, which has a fibre similar to jute and hemp-

Ink dried in stick form is used in connection with a pen that a New York man has invented, being made ready for use by dipping in water. variety of sugar cane that is

raised in China for chewing in the raw state is kept in good condition for months by burial in the ground An inventor has patented a mir-

ror and electric light, mounted on the end of a rod, to be inserted into vio-Hn body to examine its interior. An Australian is the inventor of a grain harvester that both reaps and

threshes and with which a man can cut and sack fifteen acres of wheat To make it more noticeable a new railroad crossing danger signal is il-

luminated intermittently by automatic mechanism operated by acetylene

Of Cuban invention is a sugar bowl with four radiating arms, from which its contents are obtained by pressing buttons without lifting the device.

The manufacture of leather from fish skins has been made commercially possible by the invention by a New York man of a process for preparing

English educators have found that the increase in motion picture theaters has been followed by a decrease in the circulation of cheap literature. For aeroplanes an instrument has been invented which enables an aviator to know the speed at which he is flying relative to distances on the

One of the largest machines of the kind in the world has been built in the United States for a Japanese steel plant to roll 180-inch steel plates. Kansas agricultural experts have found that dynamiting is not benefi-

cial to all soils, that in heavy clay it frequently injurez both soil and The Spanish government will permit experiments in tobacco cultivation and will inspect the seeds and

plants and supervise the disposal of An automatic weighing machine for parcel post packages releases the correct stamps when a package is laid on a plate and a key for its zone

English engineers have estimated that the cost of electrifying the South African rail ays, which will be carried out by stages, will exceed \$56,-

An Indianna inventor claims to get more power out of his water wheel with blades alternately curved to the left and right than with a straight bladed wheel.

English scientists are experimenting with two musical tones, sent by a telegraph key and received by a telephone, to replace the dot and dash in telegraphy.

Agents of Chicago packers, experi-menting at a Pennsylvania tannery. have succeeded in making men's clothing from the hair clipped from slaughtered steers.

It is estimated that about 1,500 ns of prethrum flowers are used

annually in Japan in the manufacture of incense, insect powder and mosquito exterminators.

One man can operate a new street cleaning machine which sprinkles a roadway, sweeps the moistened dirt together and loads it into 'a containdis- er on the vehicle.

So that a motorist can see that the tail light on his car is burning with-The invention of a Massachusetts out leaving his seat an Englishman. man is a fastener to prevent rubbers has patented a series of suitably mounted mirrors.

For use of clothing manufacturers women, who begin to learn the trade an electric awl has been invented that can penetrate 100 thicknesses of cloth at once to make holes in accordance with a pattern.

One of France's most noted aviators has built a passenger carrying plane with two decks, the upper for twelve first-class passengers and the lower for sixteen second-class. The present annual consumption

of oil and oil products throughout the

world is estimated at 79,300,000

about 40,000,000 tons.

IN THE SUMMER The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic diarrhoea and dysentry, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Great Steeple Climbers. The greatest steeple climber in England is William Green. He has repaired fifty or more steeples and spires, and is sent for from all parts of the kingdom. His great achievements have been in repairing the spire of Salisbury Cathedral which, is 404 feet high; Louth Lincolnshire, 350 feet; Grantham, 320 feet; and a steeple in Cambridgeshire, 280 feet. -Spare Moments.

About the simplest device yet invented for converting an ordinary bicycle into a motorcycle consists of a tank and motor to be mounted on the handlebars and drive the front wheel.

To my way of thinking, it is as essential to pay as it is to pray.

Thinks Swearing
