FOR MONTHS HE COULDN'T WALK

Toronto Man Was in Bad Shape For Nine Years—
Restored Year Ago, He Still Feels Fine.

"I can testify to both the immediate and lasting results one gets from Tanlac, for it fixed me up fine last fall and I haven't felt a trace of any of my troubles since," said James Gordon, 1177 Ossington avenue, Toronto, Ont., recently.

"For something like nine years I suffered with rheumatism and my whole system seemed to be out of fix. The rheumatism got so bad one time I lay in bed for three months and ached and hurt all over and thought I never would be any better. It was months before I was able to walk, and my legs, arms and feet just kept bothering me so bad I could hardly get up and down stairs. I had no appetite and suffered terribly from indigestion. I had headaches and dizzy spells when I would almost fall over.

"My second bottle of Tanlac seemed to help me in every way, and in a little while I was eating like a horse, and everything agreed with me so well I picked up twelve pounds in weight. Those rheumatic pains disappeared entirely and I've been feeling fine and sleeping better ever since than I had in years. Tanlac helped me so much that I am glad to give this statement for what it may be worth to others."

Tanlac is sold in Kingston by A. P. Chown and leading druggists everywhere.—Advt.

W. H. STEVENSON

Was Very Successful.
Prof. Manley B. Baker and wife are in Toronto. On Tuesday Mrs. Baker was operated on for an affection of the knee in the Toronto General hospital. It was highly successful and a speedy recovery is anticipated.

Realized \$1,620.85.
The Orphans' Guild held a special meeting at St. Mary's-of-the-Lake to receive complete results from the recent garden party, and announces that the handsome amount of \$1,620.85 was realized.

STROUD'S TEA
The taste is the test.

PERFECTION IS SEEDLESS
By CHARLES GRANT MILLER
(Copyright, 1921. All Rights Reserved by United Feature Syndicate.)

Gradually the world is attaining pleasures that have no alloy. Roses without thorns, the dream of the poets, may be given us by matter-of-fact science.

Darwin's discussion of the origin of species has borne fruit of practical value in stimulating breeders to experiment in the production of new varieties of plants and animals, some of which have great economical importance.

The seedless orange is a familiar fruit which has made big money for enterprising growers. A breeder in California has produced a great variety of new berries, some of which promise to have extensive use.

Now we have a seedless and colorless apple. Being seedless, the coreless apple is also wormless. The tree that bears it is also blossomless, a circumstance that further discourages the coddling moth from depositing its eggs.

The want of blossoms exempts the crop of apples from the bad effect of frost.

Surface thought would indicate that sunning science is at last conquering nature, even in her most secret methods.

But nature is not so easily managed as it might seem. Her laws of reproduction are inexorable, and violation of them is death.

The seedless orange and the colorless apple are at the end of their species. They cannot reproduce.

In death, then, the result of perfection in this world?

Possibly there is in this simple law of nature a solution of the problem of the ending of human life on earth. When we become so perfect that there remains nothing higher to struggle for, we shall cease to exist.

If this is true, we still have a long time to stay.

Or are we getting too far ahead to find in the absence of reproduction of seedless fruit an expression or suggestion of the extinction of man when he reaches perfection? Might it be a more reasonable lesson to conclude that when man is perfect like the fruit, he will not reproduce; that there may be no need for reproduction if he is perfect and knows enough of truth to avoid errors and their penalties, sickness and death?

great success in the Belleville tournament, are being congratulated on all sides. They brought three cups as well as individual prizes home with them. W. M. Campbell was the only one winning three individual prizes.

A Laugh.
A laugh is just like sunshine. It freshens all the day; It tips the peaks of life with light. And drives the clouds away. The soul grows glad that hears it. And feels its courage strong— A laugh is just like sunshine For cheering folks along.

Name Magistrate Cline.
C. H. Cline, K.C., recently appointed police magistrate of Cornwall, has received word from the Attorney-General's department in Toronto that an order-in-council had been passed appointing him police magistrate for the counties of Stormont and Glengarry as well as the town of Cornwall.

Died at Deseronto.
The death of Mrs. David Thompson at Deseronto early Monday morning moves one of Deseronto's most estimable citizens. Death followed a long and serious illness from which there promised little hopes of recovery. The remains were taken to Amherst Island for interment on Wednesday morning.

To Increase Water Rates.
Councillor Brennan gave notice that at Deseronto council he would introduce a by-law to increase the water rates twenty per cent. to put all water used by manufacturers on a meter service and that anybody wanting water service in future pay half the cost of laying the pipe line from the town mains to the applicant's property.

Joining Theatrical Company.
George Hogan, a former employee of the Grand Opera House, has been engaged by the Blue Pierrot Company for their Canadian transcontinental tour as chief electrician. Mr. Hogan joined the company in Cobourg on Friday, and the first performance will be in Toronto on Monday. The show is booked for presentation in Kingston.

Humane Society's Good Work.
In supporting the humane society you are not only helping to protect animals. The missionary work done by the society is invaluable. Cruelty

Automobile Accident.
The car of Joseph Robinson, Smith's Falls, is now so much junk. He and some friends were driving from Merrickville and in making a turn at Jasper the car was ditched and a fire started. The occupants of the car escaped with a few bruises each, but in a brief space there was one less automobile in the world. Mr. Robinson carried insurance on the car. There are those who think that the fire started before the upsetting of the car and that the steering gear was thus interfered with, as in making the turn at Jasper the speedometer was not indicating any extraordinary speed.

Death of Queen's Man.
The death occurred at Acton, Ont., of Councillor William Leonard Mullin, following an illness extending over several months as the result of an attack of spinal meningitis, from which he suffered when a member of the Canadian Engineers' corps at Valcartier Camp in 1914, when he was preparing to go overseas. Deceased was about forty years of age. He taught school for a time at Hermon, in Hastings county, and later came to Queen's to take a course in engineering. The war broke out during his vacation in 1914 and he enlisted in the Canadian Engineers and was the first man to leave Acton to join the Engineers' camp at Valcartier.

Recovered Stolen Flag.
Chief Ruse, of Cobourg, has recovered a Canadian ensign and United States flag, the property of the town, that were stolen, more as a prank, the night of the Duke of Devonshire's visit to Cobourg in June, 1915. The flags were stretched across King street and that night the rope holding the two was cut and the flags taken away. Chief Ruse had his opinion as to where the flags went, and on a recent visit to Belleville, called in police officer and they looked up the man he suspected had them. The suspected man denied taking them, but was given a chance to return them. The expected happened, the flags were forwarded to Cobourg. They were twelve by six feet in dimensions and had been well preserved.

HEADQUARTERS OF FORESTRY PATROL IN MANITOBA.

Victoria Beach, on Lake Winnipeg, where the government has established its air station for forestry patrol and from which the planes fly all over Manitoba's vast hinterland. It was at this point that one of the sea planes exploded August 9th, endangering the lives of its crew. One of the planes may be discerned on the water of the bay and the density of the forests through which the rangers must force their way is plainly shown. Inset is Major Basil Hobbs, superintendent of the station. He took part in the first trans-Canada flight.

COAL

We are not looking for any reduction in the price of Coal. Now is a good time to lay in a supply for next winter.
