"SEMI-READY WEEK" IS AN INSTITUTION

Quarter Century Elapsed Since Physique Type System of Tailoring Originated.

With the advent of "Semi-Ready Week" on Monday next the originators of the "Semi-Ready" physique type system will have completed their twenty-fifth or silver-anniversary in business.

"Few can recall the name of anyone in the wholesale clothing business before that time? For a full quarter century Semi-Ready tailoring has held the stage, and so well-known have their garments become that many people think the term "Semi-Ready" has a secondary meaning instead of being as it is, the product of one big tailoring house in Canada, with a branch in England.

"Semi-Ready" succeeded from the first, for it was a tailoring system that saved men both time and money and gave them precisely what they wanted—good clothes, quickly fitted, at a fair price based on the economy and efficiency of a wholesale system.

The tall stout man can get just what he wants as well as the short and corpulent figure. The patterns of each style or design are made for seven distinct and different physique types.
