Good High

The Discontented Goldenrod.

"Oh me!" sighed the Goldenrod As the gentle breeze blew her green stems back and forth playfully. "Day after day it's just the same wearing to the north. thing over and over again."

"Well, what in the world is the ing every day, nor can we all be the world.

'That's just it,' sighed the discontented Goldenrod, "If I have to RARE MODELS OF grow beside this dusty road I don't see why I can't at least have one gay-colored flower to grace my old.

"Why, your sister before you had a glorious crown of gold, and when the children who travelled the road here saw her, they exclaimed in joy because she was so very beautiful! head with pride. Always remember there's work for every one in this fore a glass case in which is the market here. world, and that you have your work,

But Goldenrod sighed and dropped her green bonnet. They had all told her of the wonderful change that was King Charles of England his crown written by Dana Carroll. It was enexpected of her some day, but that and his head, day seemed farther and farther away and Goldenrod had almost lost heart waiting for its coming.

a I can do, indeed I can't," she sighed, and nothing her neighbors could

way seemed to cheer her. Day after day went by and even the singing birds, the buzzing of the bees and the fluttering of the butterflies' wings didn't seem to make the world any happier for little Goldenrod. Then one morning, bright and early. Goldenrod discovered the first tiny glint of gold along edges of her tip-top branches, with a cry of delight she called her friends

"See, I told you so!" laughed the tiny blade of grass. "I told you so! Within a day or two your crown will be golden all over."

Sure enough, one morning, only one, but every tip-top end the goldenrod plant, was covered to greet the breeze.

"Now, if I only lived where someone could see me and enjoy my beauon a road so far away from folks." she sighed. Even her golden crown didn't seem to make Goldenrod happy. She sighed and complained all recently opened its first public exday long.

Goldenrod heard someone is now going on. sobbing. She looked down, and saw a dear little Ladybug who had lost all ardent ship model "fans," are her way and had wandered far from Newcomb Carleton, James A. Farher home. Bending her branches rell, H. H. Rogers, Sherman Hoylt, Goldenrod asked the cause of her Junius Spencer Morgan, Irving R.

"I'm lost!" sobbed Ladybug. "I W. Kent, Carleton T. Chapman, W. came away without my machine L. Aylward, Harrison Cady, Clifford which tells me one direction from H. Ashley, Breckinridge Long, another, and I dont know which way Franklin D. Roosevelt, Allan Forbes, to go to fly back home."

> It is a source of regret to American model collectors that most the original models of the famous old Yankee clipper ships have been destroyed. Donald McKay of Boston, most famous designer and builder of clippers in the forties and fifties, left his collection of ship models to a niece. Unfortunately this woman had no eye for the artistic, and one cold winter the models were

Among those she destroyed were those of the Flying Cloud, Lightning, another Sovereign of the Seas,

The Lightning, fastest ship that ever sailed, was built by McKay for a British company. On her maiden trip, February 18th, 1854, she sailed from Boston to Liverpool in 13 days. 19 1-2 hours, March 1st on that trip she established a record never equalled by sailing vessels and seldom surpassed by the fastest steamships of to-day. Her skipper said he had crossed the ocean on the rim of a cyclone. The log of March 1st is historical:

"Wind south. Strong gales. Bore away for the North channel. Carried away the foretopsail and lost jib. Hove the log several times and found the ship going through the water at 18 to 18 1-2 knots. Lee rail under water and rigging slack. Distance in 24 hours, 436

In a recent address on American sailing ships Theodore F. Humphrey, who has one of the finest American collections of ships' models, described these wonderful old clip-

"All sail was often carried when ordinary ships were seen reefed down on the same course. As Clark Russel notes in one of his novels. the skipper of the ship from Europe as he paced the deck with anxious eyes upon his shortened canvas, fearing that it would be blown from the bolt ropes, very often saw a tiny speck upon the horizon, watched it grow into a splendid ship wita 'every rag set.' saw her fling the stars and stripes to the gale as she went roaring up and then, with feelings that cannot be described, gazed after her until she disappeared in

And again another author: "A British vessel, snugged down to reefed topsails and holding bare steerageway in the South Pacific or Indian ocean, would see a cloud of snow-white canvass burst out of the gloom and vanish like a ghost to Leeward-a Yankee clipper under

At the outbreak of the world war, after sixty years, there were fewer than thirty steamships in regular trade throughout the world that could equal the speed of the Light ning. In 1905 in the race for the Kaiser's cup, the schooner Atlantic. Captain Charles Barr commanding, made the run from Sandy Hook to The Lizard in twelve days and four hours, but her best day's run was only 841 miles. The speed of the Lightning on the

Thirty years ago the uses of electricity were few and obscure.

To-day electricity is the force which quickens the energy and lightens the burdens of industrial and domestic life. With 5,000 practical uses, electricity is replacing steam as a motive force in industry and transportation. It joins communities and continents by the telephone and wireless. It performs marvels in science. It lightens household tasks.

And we have just begun. The future will show us a world largely electrified.

Technical skill, research and many years of experience in the electrical manufacturing industry have made this progress possible. The manufacture and installation of electrical machinery and equipment has become one of the world's most important industries.

Electrical development within British Empire is inseparably associated with the English Electric Company Limited of Great Britain. In America the products of the Canadian Crocker-Wheeler Company Limited, have been in use for over a decade The English Electric Company Canada, Limited, combines in one organisa tion the broad experience and resources of these two pioneers. It will take a prominer part in supplying electrical demands.

Investors are now being offered an opportunity to share in the development of this industry. Write for full particulars
