REO SPEED WAGON

Try This on Your-- Little "One Ton" Truck

Telephone Companies are so partial to Reo Speed Wagons that there are hundreds of them in this service in various parts of the continent.

They tell us that, habitually, they not only load this Speed Wagon to twice its rated capacity with wire, insulators, tools, etc., but, thus loaded—to give traction—use it to pull the heaviest cables taut.

Some clutch—don't you think? Not to mention motor, transmission, driving gears and rear axle.

Some Speed Wagon!

This is Semi-ready Week in our shops

Clothes like these command attention anywhere—

And they are not any higher in price than common clothes.

What it means
We want you to see and to study the Physique Type System. Then you will know why Semi-ready Suits and Top Coats are so much better than the ordinary. The conception of the Physique Type System of designing good clothes gave the impetus and uplift which has made men in the higher walks of life favour the ready-to-try-on way of tailoring. This Demonstration of both Fashions and Fitting qualities is really a Free Exposition—where you are invited to see—and not necessarily feel obliged to buy.

The Cost of Clothes
Prices are a consideration nowadays, and the question is asked often, "When will clothing drop in price?" It has tumbled far down—perhaps prices have declined more than in any manufactured commodity. A year ago a pure wool suit could not be bought for less than \$45. Today such a suit costs \$25 to \$30. Take a Navy Blue British Serge. They are down to \$25 and \$30. Nobody can be deceived on a Serge for it's a plain weave, whilst anybody can feel the quality of the wool in it. "King's Own" Serge Suits that were \$75 a short time ago are now \$45, made to custom-measure; a drop of \$30 within 15 months.
