Letters to the Editor

To Lessen Car Thefts.

Kingston, Sept. 26.—(To the Editor): Will you please allow me a small space in your valuable paper? I would like to make a suggestion to prevent this car stealing when parked while so many people are at the shows and elsewhere—that is appoint a man who is out of work and with a family to support and let him have a book of tickets.

RUMANIA GASOLINE REACHING CANADA

Sold in Montreal at One Cent Per Gallon Less Than Usual Price.

Washington, Sept. 27.—European gasoline, principally from Rumania, is being sold at service stations in Montreal at one cent per gallon less than the prevailing retail price.

Arrangements are being made, the consul reports, for a considerable supply from this source. Establishment of this trade would in a measure offset Rumanian indebtedness to Canada as a result of war loans.

A number of interesting points are involved in the importation of gasoline from Rumania, such as, for example, the quality of the gasoline, in view of the Canadian tariff which seeks to bar high grade gasoline measure, and also the effect of the importation on prices.

Investors and Hotel Securities

With the development of company-owned hotels and chain operation, hotel securities have within a comparatively brief period come into their own, and today enjoy with shrewd investors a popularity equal to other conservative investments.

This growing confidence of the investing public is based on the fact that the modern hotel is a thoroughly stabilized business, one not subject to abnormal price changes or radical labor conditions.

In the case of the hotels owned and operated by the United Hotels Company of America, past records assure to investors a return that cannot fail to attract those seeking safe and desirable investments.

The Backbone of Canada. The story of Canada's prosperity is told in the development of her agricultural resources, for Canada has become one of the greatest agricultural countries in the world. This has been made possible only through a struggle with problems which the life insurance companies have helped to solve by placing twenty-five to forty per cent. of their entire assets in mortgage loans. Today this assistance is measured by one hundred and thirty millions of dollars invested in mortgages and loans by the Life Insurance Companies. Silently and effectively these funds are at work, making conditions easier for our people and adding to the general prosperity of the country. When you think of life insurance, remember it serves you in two ways—while it is protecting your home it is also building up the nation.
