

THE BRITISH WHIG 88TH YEAR.

Published Daily and Semi-Weekly by THE BRITISH WHIG PUBLISHING CO., LIMITED

J. G. Elliott, President; Lemay A. Guild, Editor and Managing Director

TELEPHONES: Business Office 242, Editorial Rooms 229, Job Office 292

SUBSCRIPTION RATES: (Daily Edition) One year, delivered in city \$6.00; One year, if paid in advance \$5.00; One year, by mail to rural offices \$2.50

OUT-OF-TOWN REPRESENTATIVES: F. Calder, 21 St. John St., Montreal; F. W. Thompson, 100 King St. W., Toronto.

Letters to the Editor are published only over the actual name of the writer.

The circulation of THE BRITISH WHIG is authenticated by the A B O Audit Bureau of Circulations.

The germ of war multiplies rapidly in sore spots.

The best cure for unemployment is a vigorous epidemic of buying.

Not the least of England's minor worries at present is Asia Minor.

One of the boys is usually the black sheep of the family, but Old Dad is always the goat.

The most remarkable thing about an infant is its appetite. This is also true of infant industries.

The habit of cursing one another was probably unknown to the world until the first man ran for office.

The adv. writer who said: "You remember the quality; you forgot the price," wasn't talking about war.

Every once in a while you find an old-fashioned preacher who still persists in preaching about religion.

An umpire's practice in making quick decisions should make him unusually successful as a pedestrian.

If the reformers keep on, a man won't be able to do a single thing he would whip his small son for doing.

When a Jap wishes to show his contempt for a fellow Jap he probably remarks that the other has a white streak.

Russia can't get over an uneasy feeling that the rest of the world will try to make her respectable while feeding her.

In their efforts to get together, nations show a commendable willingness to do anything short of being reasonable.

Temptation can't run fast enough to keep away from the man who has a pocket full of easy money and time to spend it.

The only thing that grows larger as it is divided into parts is the tax the manufacturer passes on to the consumer.

And yet, there is a lot of satisfaction in writing paragraphs good enough for other paragraphs to steal.

Perhaps the frost did it, but on close inspection we observe that some of the peaches on the street are a little wrinkled.

As we understand it, Ireland might be willing to remain in the family if it is clearly understood that she doesn't have to do it.

With a square foot of pumpkin pie under our belt, we have an unbroken faith that the heart of the world is not broken yet.

If a boy can't learn to shoot straight, and has a habit of blaming the wrong ball, he will probably grow up to be a policeman.

The first sessions of the peace parley between England and Ireland; it is announced, "will be devoted to preliminaries." Then will come the main bout.

Now a woman wants a divorce from her husband because he spent all his time tinkering with the automobile. However, the divorce action suggests that he finally got her going.

PREFERRED TO BREAD.

Human beings would be better off perhaps were they less prone to buy luxuries when short of the means of procuring the necessities of life. This curious propensity has been marked often; the fatuousness of it has been emphasized in classic fable; the vice of it is daily exemplified. Yet no noticeable impression is made on the people.

Acceptance of such a theory permits us to read with patience the news that the Russian government has brought a lot of American typewriters, paying for them with furs.

As a fact, what is more indispensable to the soviet outfit than writing machines? The tyrants will get all the bread they require; if there were but one crust left in the empire it would be theirs.

Somehow the people will get bread. But there is no satisfaction for the Lenin gang equal to that of telling the world. So the tyrants buy typewriters for the good of the souls of their victims with furs that might better have been traded for food to keep the souls in their bodies.

MOTION PICTURES IN SCHOOLS.

The old philosopher who told the king there was no royal road to learning, that is to say, no smooth, convenient highway to avoid the rocks and ruts of the customary path, lived before the days of motion pictures.

Some recent experiments indicate that before long this invention will be generally utilized to make education more efficient. In New York 500 pupils of the seventh grade, divided into three groups, were tested. One set was given a prescribed lesson orally; the others, through motion pictures. The latter received marks averaging 23 per cent. higher than those of the orally instructed.

In Detroit two groups of scholars, equal in standing and intelligence, were selected for the comparison. A certain film was shown twice to the first group, the time occupying thirteen minutes. The teacher did not explain the pictures while they were being shown, nor did she prepare the children for the lesson intended to be conveyed. The teacher of the other group gave the pupils a fifty-five minute talk. Then identical lists of questions were given to two groups to answer.

There are subjects, of course, in which pictures can never be substituted for good, hard digging in the books. Nor would it be desirable to dispense with the mental discipline which comes through vigorous, continued exercise of the mind. The main object of education, despite Mr. Edison's theory, is not the accumulation of a mass of facts, but to train the mind to reason from facts and to learn where to find valuable information when needed.

When a Jap wishes to show his contempt for a fellow Jap he probably remarks that the other has a white streak.

As we understand it, Ireland might be willing to remain in the family if it is clearly understood that she doesn't have to do it.

With a square foot of pumpkin pie under our belt, we have an unbroken faith that the heart of the world is not broken yet.

If a boy can't learn to shoot straight, and has a habit of blaming the wrong ball, he will probably grow up to be a policeman.

The first sessions of the peace parley between England and Ireland; it is announced, "will be devoted to preliminaries." Then will come the main bout.

Now a woman wants a divorce from her husband because he spent all his time tinkering with the automobile. However, the divorce action suggests that he finally got her going.

THE BRAMPTON MEETING.

The Brampton meeting of the Farmers' party may be taken as a fair indication of the awakening consciousness of the Agrarian forces in Ontario. That it should attract farmers from three counties in such numbers as to occupy the two largest buildings in the town, and leave a still larger audience outside, is in itself significant.

It will be difficult for Mr. Melgoin to follow him in Western Ontario and maintain that the tariff is the only issue. A lawyer, a publicist and a business farmer are the recognized leaders. Neither of the first two have ever been in business.

The use of tobacco should be prohibited. "A little liquor now and then is good for every man," Bryan. "I regret I have only one life to give my country," Bergdoll. "I have reduced your rent 50 per cent," The Landlord.

My greatest ambition in life is to do and say only those things that will make me popular with the American people," LaFollette. "I do not need a new hat this fall," A Wife.

A K asks: "Is the man who is fast asleep in danger of being arrested for speeding?"

Just One Horn Thing After Another. We're through with ice and now our roll will go to buy a load of coal.

Hoak! Hoak! Heads Up! The bands of thieves these days appear to prefer automobile horns.

Might Teach Them Something. "I would consider an adequate punishment for speed fender."

Diary of Miss Opportunity. Friday, Oct. 21—1 see doctors look upon sleeping sickness as rare disease. I run into hundreds of cases of it every day.

Daily Sentence Sermon. Working for the best beats hoping for it.

Tell It Not to Yuletide. A prim, and model lass. Is young Miss Arleen Hughes? But shocking tales they tell, They say she wears tight shoes!

News of the Names Club. A Kokomo (Ind.) reader declares Missus Beer, of New Orleans, does not for she never drank the stuff.

Anybody Ought to Know That. "How should a married woman sign her name to letters and checks?" is a question lamped in a Chicago contemporary. Just use a pen and ink, lady. It's perfectly simple when you know how.

Worthy of Black Diamonds. Platonic love is just a detour around marriage.

The Toronto, police department has purchased three sub-machine guns to fight bank robbers. The guns will fire 1,500 shots a minute. The banks arm their staffs.

BIBLE THOUGHT FOR TO-DAY

BETTER THAN SILVER AND GOLD: Godliness with contentment is great gain. For we brought nothing into this world, and it is certain we can carry nothing out. And having food and raiment, let us therewith be content.—1 Timothy 6: 6, 7, 8.

Walt Mason THE POET PHILOSOPHER

THE MOVIES

A million children, every night, behold the movie actors; in education, wrong or right, the films are mighty factors. And so the famous movie folk have influence unmeasured; their "hot movie" whippersnapper, in youthful hearts are treasured. So they should make their lives so clear they'll sparkle in their beauty, and not seem angels on the screen, and demons when off duty.

ALONG LIFE'S DETOUR BY SAM HILL

Give Himself Away. The man who never knows too much is never wise enough. To keep his talk from proving That he is just a bluff.

Observations of Oldest Inhabitant. I kin remember when a man had to watch his step to keep from treading on the ladies' trains.

Not Out of Date. "A few years ago you boasted you had a model husband, then why have you separated from him?" "We did you see, he was a 1918 model and he's now out of date."

That's Our Guess. "Dear Sam: 'If Icker is more plentiful now and easier to get, why in the Sam Hill are the anti-raving agelst prohibition?"—T. A. B. Agelst, Asheville, N.C.

Where It Hurt More. "I hear you were injured on your trip." "You heard wrong. I was injured on my foot."

Remarkable Remarks. (Never Made.) "The use of tobacco should be prohibited."

Just One Horn Thing After Another. We're through with ice and now our roll will go to buy a load of coal.

Hoak! Hoak! Heads Up! The bands of thieves these days appear to prefer automobile horns.

Might Teach Them Something. "I would consider an adequate punishment for speed fender."
