Justice Demands 8%
 TIME was when 4% interest was all that investors expected with safety.
 Governments borrowed at 3% and less.
 Now all that is changed. Governments pay 6% and more. High-class Corporation Securities pay 7% and 8%.
 Yet present Government interest rates would have been considered the "lure" of "blue sky" promoters ten years ago.
 You see, therefore, there is nothing visionary or hazardous about a vast hotel enterprise borrowing money at 8% and offering its Convertible Debentures at this rate of interest plus a Common Stock Bonus.
 This policy is particularly sound in the case of The Mount Royal Hotel Company, Limited, which will own the largest fireproof hotel in the British Empire.
 The Mount Royal Hotel enterprise is timed to reap all the advantages accruing to Montreal as the greatest seaport, the industrial centre, the railroad headquarters and the pivotal point of all travellers and tourist traffic in Canada.
 Consider, too, the list of Directors. You must be impressed by the fact that so able a group of men would never associate themselves with a doubtful enterprise.
 Remember also that the hotel will be operated by the United Hotels Company of America, which has made an outstanding financial success of every hotel they have managed—eighteen in all.
 Every man and woman who has money earning only 3% or 4% should consider at once the investment of some of their money in these 8% Convertible Debentures.
 These 8% Convertible Debentures at par and interest, carrying a 20% bonus of Common Stock are the choicest security that has been offered in years.

The National Crisis

"My appeal is to the whole people; to every man and woman who wants to do right, by this country; to every one who breathes the spirit of our fathers who founded this British Dominion."
 Arthur Meighen

THE Election to be held on December 6th will be the most momentous in Canadian history; for as men and women vote will depend the economic stability, the political stability and, indeed, the national stability of this country.

Today we find group striving against group, class against class, the industrial and financial structure of the country assailed by false and unsound doctrines and theories, while our great neighbour to the south has adopted a trade exclusion policy directed against Canada's vast agricultural interests.

The currencies of nearly every country in the world are depreciated. The Canadian dollar in the United States is subject to a heavy discount causing a loss of over one hundred million dollars in exchange annually.

Europe is overwhelmed with war debts—unemployment is acute—and the restoration to pre-war conditions is slow.

While Canada is in a much more favorable condition than many countries, yet there is evidence of stagnation, instability, unemployment and lack of confidence.

Taxes are heavy because of the country's efforts in the Great War, but have become burdensome on account of the misconceived policies and blunders of Governments that directed Canada's affairs prior to 1911.

These conditions are largely the direct aftermath of the war, but they must be dealt with fearlessly and constructively. This is no time to consider experimental changes, or the theories of visionaries.

This is no time for Crerar and his Free Trade Policy.

This is no time for King and his wobbling "charted" policies, varying with each provincial boundary.

It is the time to cling to orderly, stable Government in the interest of all the people; to be guided by the experience of the past proceeding upon lines that have been proven sound.

It is the time to place the destinies of Canada again in the hands of a Government led by a sane, courageous Canadian who has safely brought the country through the trying years of reconstruction, and upon whom we can rely to retain and initiate policies in the interest, not of a group or class but of all the people.

It is the time to support Arthur Meighen and his Candidates.

Meighen will lead us through

The National Liberal and Conservative Party Publicity Committee.
