HOW TO MAKE MONEY

F CW women are averse to making pin money. It doesn't matter whether they need it or not. There is special pleasure in spending money one has made through one's own initiative and resources. Each day there will appear on this page one of a series of suggestions on making money. Each article will give women readers of The Whig an idea that may be turned into a moneymaker.

The once despised culinary

art has given occupation to

many women who have devel-

oped flourishing business en-

terprises from what began as

spare-time occupations. Only

the other day appeared the story of a woman who started

out to do china painting and

wound up by making sausage.

She had always been famous

which was made from an old

family receipt and she found a

ready sale for her product,

having inserted an advertise-

ment in the classified columns

of one of two papers and

informed her friends and

neighbors that she was ready

to fill orders. Her children

helped her in the grinding and

delivery of the orders. She

used only the best of meat in

the sausage and utilized every

bit of material (in the making

of lard, etc., which she also

sold) so that no part of it re-

presented waste. Naturally her

profits were large and her bus-

iness steadily increased. To-

day she is the head of a very

prosperous sausage manufac-

tory and says she doesn't a bit

191 PRINCESS STREET JOE LEE, PROPRIETOR Open from 7 a.m. to 2 a.m.

There, on your pattern envelope you will notice the Deltor's saving of 50c to \$10 NOTICE the amount of yardage your Butterick pattern specifies! Did you ever dream that such a style could be made of so little material? It's less-as much as 1% yards less-than was ever possible before. Which means that you will save 50c to \$10 on the frock or suit you are planning! Think of the economy of that-the pattern paying for itself and saving money besides! It's all possible because of a wonderful invention enclosed in the envelope with your new Butterick pattern-an in-

vention individually planned for the pattern it accompanies -the Deltor! And this Deltor not only saves money because you use less material, but endows you with even greater skill of sewing and opens to every woman new avenues of smartness!

### The DELTOR

Saves 50c to \$10 on materials alone

Follow through these three steps and see how simply the Deltor guides you to sewing ease, to economy, to Paris'

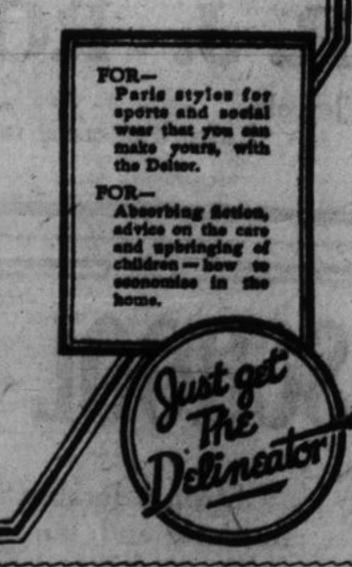

The first thing the Deltor does is to give you an individual layout chart, (yes, individual, not just a general chart but one for your exact size and for each suitable width of material). Because of this chart, your pattern calls for 1% to 1% yards less material than any other pattern can -a saving of 50c to \$16 on materials alone.

Then you follow picture-and-word illustrations that guide your every stitch to perfect fit, drape and set. Your needle flies - you save hours of time - you instinctively do the right thing at the right time; and you always do the thing the Parisian modiste would do.

Finally—ideas of finish! Should your sleeves be the type that Martial and Armand favor, should the neckline hint of the Moyen Age, should embroideries follow Madeleine and Madeleine's gay lead, the Deltor explains just how to achieve the correct effect. From the first to the last detail, this most economical, most successful frock is a triumph of Paris
