FIFTY YEARS' SERVICE.

Diamond Dyes Celebrates Half a Century of Service.
Somebody out of touch with truth, once said there is no sentiment in business. Another greater in wisdom, declared: "They profit most who serve best."

All this year a concern that helped put Burlington, Vermont, on the map of national business, is celebrating fifty years of successful service of the womanhood of the world. "Diamond Dyes" is half a century old and they are having a series of happy episodes to make the anniversary a noteworthy one.

"Diamond Dyes" is a heroic example of the power of advertising, for the plant of small beginnings now covers a city block. The business was built on "making good" the advertising that has made "Diamond Dyes" a household. Possibly the greatest asset of this proved aid to economy, is the good will of families that run through generations. Young women tell that their mothers and grand-mothers before them, were Diamond Dye enthusiasts. They like the Diamond "service plan" which makes it clear that for a few cents it is easy to "dye old things new."

The Railways of Canada Draw to Your Attention the

NEW RAILWAY RATES!

FOR PASSENGERS

The advance on sleeping and parlor car tickets authorized in 1920 has been cut in half—the advance made on ordinary fares at that time having been completely taken off many months ago.

FOR SHIPPERS

The percentage of advance granted to the Railways in 1920 has been reduced ten points. In addition to a five point drop at the first of the year.

These changes became effective December 1st.

Your cost of Living

YOUR cost of living should be directly affected. If it is not it is because (1) as the railways have pointed out before, the actual money paid for their services is an almost negligible factor in making prices, and because (2) even the huge sum now cut out of the railways' revenues and amounting to approximately—

\$25,000,000.00*

annually—becomes a very small fraction of a cent when split up among the billions upon billions of small and large articles which constitute the freight traffic of Canada during a year. And because

(3) the Court which has the power to control railway rates is not able to direct who is or is not to get the benefit of reductions. In other words, whether these savings in railway charges are passed on to you—or whether they are absorbed in marketing, cannot be controlled either by the railways or the public.

BUT this fact remains: a very great sum of money—enough to build every year a small city, or a Quebec Bridge, or four hundred and fifty of the newest and most powerful locomotives—is now removed from the revenues of the Canadian Railways and should be reflected, at least to some extent, in the family budgets of all Canadians!

WHETHER your railways can continue to function without the revenue thus lost to them, is an experimental problem facing the various managements. It depends largely on whether traffic keeps up or falls off—and whether costs rise or decline. But the managements are attempting the problem cheerfully and with determination to keep Canada's railway service the cheapest, mile for mile, and among the most efficient in the world!
