THE GENERAL HOSPITAL

Received \$1,600 in Subscriptions to the Christmas Appeal. The General Hospital board of governors met on Tuesday. The report from the committee of management mentioned the very interesting time the patients had on Christmas day. While the month of December was quite active, it was not considered at any time overcrowded.

The medical superintendent had been called out of the city but his report was read by the general secretary. The visiting governors, not bringing in a report, were re-appointed for this month. It was reported to the governors that the result of the appeal at Christmas time was somewhat below expectations, being about \$800 less than a year ago. The total this year was around \$1,600.

GOOD TIME

At A.O.H. Euchre and Dance Last Night.

The A.O.H. euchre and dance in the club rooms of the order on Tuesday night was well attended. About twenty-five tables were kept going and the playing was keenly contested throughout. The best players in the habit of attending euchres were present and all worked hard for the prizes. The contest finally ended with Miss Myrtle Sidley capturing the ladies' first prize and Timothy Gallivan winning the first prize for the gentlemen. Consolation prizes were awarded to Miss Rhoda Menard and Mr. Clayton.

After the cards, dainty refreshments were served and music was supplied for dancing by the Hibernians' orchestra. The whole affair was a splendid success.

Marie Lohr in "Her Destiny."

An appreciative audience was present at the Grand Opera House on Tuesday evening to witness the production of "Her Destiny" from the French play, "L'Inconnu." Miss Marie Lohr, the distinguished English actress, and her excellent company, produced this play in a most charming manner. This is Miss Lohr's third appearance in Kingston this season, and the lovers of dramatic art greatly appreciated her coming. Miss Lohr's associates are the very best the English stage can offer.

Forty American towns and cities the electric power rates of which were previously unknown at the office of the Hydro-Electric Power Commission of Ontario, were chosen at the beginning of the recent study of comparative rates.

From each of these communities which ranged in population—from 300 to over 30,000, complete rate-schedules were procured and all special information affecting rates such as service charges, meter rents, discounts, flat rates, optional rates, and load-factor.

Then, taking nine classes of service, from the 20 kilowatt-hour per month requirement of a six-roomed house to the factory service of 500 horse-power and a monthly consumption of 100,000 kilowatt-hours and calculating the net monthly bills of each, and comparing them with the monthly bills of the Hydro-Electric System, for the same nine classes of service and for the same case the lowest possible charge, the highest possible, and the average were calculated, making fifty-four points of comparison as between co-operative municipal ownership in Ontario, and private ownership in the United States. In every case but one of the fifty-four, the highest Hydro rate was lower than the Average American rate. The average Hydro rate was continually lower in 39 cases; the highest Hydro rate was lower than the lowest American rate.

A Table of Average Monthly Bills for domestic service contrasting the charges on the two sides of the border, here follows:

DO YOU LONG FOR SMARTNESS? PARIS SMARTNESS?

It Can Be Yours—in the Least Expensive Clothes You Ever Made!

THE DELTOR

Saves You 50c. to \$10 on Materials Alone

THE FIRST THING

You will find this invaluable aid enclosed in the envelope with your Butterick pattern. It is not a part of the pattern itself but a separate, patented service—a picture-guide especially planned for the pattern it accompanies.

THEN

that the Deltor does is to give you an individual layout chart (yes, individual, not just a general chart but one for YOUR exact size and for EACH suitable width of material). Because of this chart, your pattern calls for ¼ to 1½ yards less material than any other pattern can—a saving of 50c. to \$10 on material alone for every frock.

FINALLY

you follow picture and word illustrations that guide your every stitch to perfect fit, drape and set. Your needle flies—you save hours—you instinctively do the right thing at the right time; and you do always the thing the Parisian modiste would do—ideas of finish! Should your sleeves be the type that Martial and Armand favor, should the neckline hint of the Moyen age, should embroideries follow Madeleine and Madeleine's gay lead, the Deltor explains just how to achieve the correct effect. From first to last detail, this most economical frock, this most successful frock, is a triumph of Paris!
