BIGGEST LITTLE PAPER IN THE WORLD

HUMOR PLAY WORK

#### ONE REEL YARNS

RING OFFI "I'm tired of being yelled at," deeided the telephone crossly. "Folks seem to think I have no feelings at The telephone stopped its fretting long enough to ting-a-ling-a-ling loudly. It waited a while, and then jingled again. No one came. "That's fust it!" wailed the telephone. 'No one pays any attention

to me when I want them to. "It's a hard life. I sit here on the desk all day and no one pays any attention to me, except to give me a barsh word now and then." The door opened. A big man came in, seized the telephone, tried to get

number, and, not succeeding, slammed the telephone down and went groaned the telephone. "That beast nearly jarred my gizzard out. I wonder what he thinks I'm made of. That's the way it goes. Some one is either mad at me, or some one is saying foolish things in

my ear until they make me sick. "I'm never appreciated. I guess if they didn't have me they would miss me all right. They'd feel sorry for the way they treated me. I guess I'll jump off the desk and end it all." The telephone had been left standing on the corner of the desk, so it that will fit into the mouth of the on his head. was an easy matter for it to edge tumbler, a stiff plece of cardboard over until it was balanced right on about four inches square, a playing the very end. Then some one opened card, and a rubber band.

"My goodness," called a woman's the rubber band around it to hold it front-the weighted end toward the John, go over next door and call the repair department right away so we can have it fixed this afternoon." The telephone gave a feeble, despairing tinkle.

EASY JUGGLING

LESSON 10

Rasso, one of the most widely known professional juggiers, has pre-pared a series of ten lessons in easy juggling especially for the readers of this newspaper. This is the tenth and last article.

"Apple Drop" and a Coin Catch

Place the square of cardboard over the mouth of the tumbler. Set the force behind the toss to make the hat. the apple on the tube. See figure 1. With a sharp blow of the hand, knock the cardboard off the glass. Hit the cardboard in such a way that your hand does not touch the glass. The tube will fly from under the apple. head by only slightly shifting your And the apple will drop neatly into

The Trick With Three Apples effective, try it with three apples.

This necessitates, of course, the use of two more tumblers, and two more playing cards, as well as a longer piece of stiff cardboard. Set the tumblers about three inches apart. The stiff cardboard must reach over all three tumbiers. See figure 2. When the tumbiers all have been guide.

prepared, knock the stiff cardboard Behead to halt and leave the highoff the glass by hitting it at the mid- est point.

Handy "Bayer" boxes of 12 tablets-Also bottles of 24 and 100-Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-aceticacidester of Salicylleacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

# THE

Procrastination And Its Penalties

B UST A FEW EXAMPLES of what "putting it off a little longer" does, cited to show how costly delay may prove to be. Foot-brake linings have worn down "paper thin," but replacement is beglected, with the result that the bands themselves become worn through, so tust they will not take new linings and new ones have to be bought. Moreover the drums are so badly grooved that the new linings wear out abnormally. An owner knows that his engine oil is dangerously thin, but takes a chance on running a while longer before changing it. It happens that he gives the engine an unusually hard run, with scored cylinders as the result. The penalty is the price of a reboring job and new pistons, not to mention loss of use. An engine knock develops, but the car is kept at work, in the vain hope that the noise will disappear—a thing which knocks hardly ever do. The hammering grows worse, but repair is deferred until, on some hard pull, the much abused connecting rod-end, which has been making the warning "music," finally lets go, gives the crankcase a knock-out blow and ends by doubling up and cracking the cylinder base. Bare spots on the fenders and splash guards are noticed, but touching them up is put off, even though they begin to rust, with the result that when the long delayed repainting is started, these metal parts are corroded through and new ones have to be bought. A nice new casing runs over a stray bottle and its tread is badly cut. The owner threatens to have the cuts repaired-"right away." But right away doesn't come and the next time the casing is examined it is found that sand has worked in through the cuts so far, that nearly the whole tread is loose, calling for an expensive repair job. The above examples are from "real life" and by no means cover this sad theme.

loose. What is the cause of this

Answer: We cannot say, but the

most natural assumption is that

the engine misses explosions, when

engine speed become more notice-

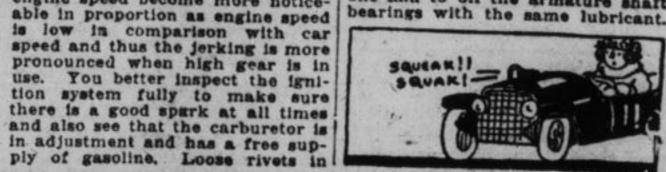

in adjustment and has a free sup-

ply of gasoline. Loose rivets in
