INDIAN TALK

The following poems were written by White Eagle, the famous Indian rider:

White Eagle is getting old, but he Game all gone, we working now: White man shirts, no nice beads o Smoking him pipe, feeling sad, Squatting by the tepee door, That old times come back no more

The Prairie Dog Um prairie dog 'neath clear blue skie Sits by him hole, never bats him eyes! was good to me and helped me Him keep on barking "yip, yip, yip."

Him much fat 'cause him eat much Him jump in hole when folks go past.

TO-DAY'S PUZZLE Bu White Engle does not like the animal. Behead a tiresome person and East He has been lonely for the leave a metal. Behead an inflamed Answer to yesterday's: Isle, said,

Johnny was very fond of music. He exactly as he saw them. Then, he went to a concert every time he got a chance. Therefore when his aunt is a expert tracker and has moving picture show, she was suroffered to take him to a concert or a articles about the art of prised when he chose the show. "Why didn't you want to go to the at once as the picture of a ne'er-doconcert?" she asked, when they were going home. for The Boys and Girls picture show." he answered, "so "Because it was dark in the moving didn't need to wash my ears."

HUMOR

BOXING KANGAROOS

The boxing kangaroo is part of many circuses and animal shows. People watch them and think how wonderful it is that they could be trained to box so cleverly. It isn't wonderful at all. Kangaroos are natural boxers. The young kangaroo is taught to defend himself in this way as soon as he is old enough to hop about. Naturalists who have watched the

animals in their native surroundings say it is very funny to see the mother giving the youngster his first boxing lessons. Afterwards the father takes up the teaching and with much gentleness and patience trains him to box. When kangaroos box they back off and rush in and prance about very skillfully, Each one watches for an opportunity to strike, and at the same time tries to prevent the other from striking. They cleverly try to move about so as to get the enemy below them on the slope of a hill. The resounding blows they give with their hind feet can be heard far away. The kangaroo fights like a gentleman. He is a good sportsman, even when he is fighting with his cnemy. The animals strike with the flat of the foot, and never use against each

other their terrible ripping ciaws. A BOY'S ART

one was stealing the bit uscious pears on the tree that grew close to the garden wall of the house where the boy Thomas Gainsborough, one day to become a great artist, lived. One morning Tommy took his sketch book and slipped out into the garden to draw. He didn't get a char cause his father frowned upon it. He feared that Tommy would not spend enough time on his school

As Tommy sat in the summerhouse, he chanced to glance up just in time to see a head appear above the wail, right next to the pear tree. The man looked furtively about, then aprang up to the top of the wall and began to fill his pockets with the juley fruit. Never a sound came from the summerhouse, but Tommy's cunning pencil had drawn the robber's portrait with the narrowed eyes and leering lips just ran into the house, just as the thief

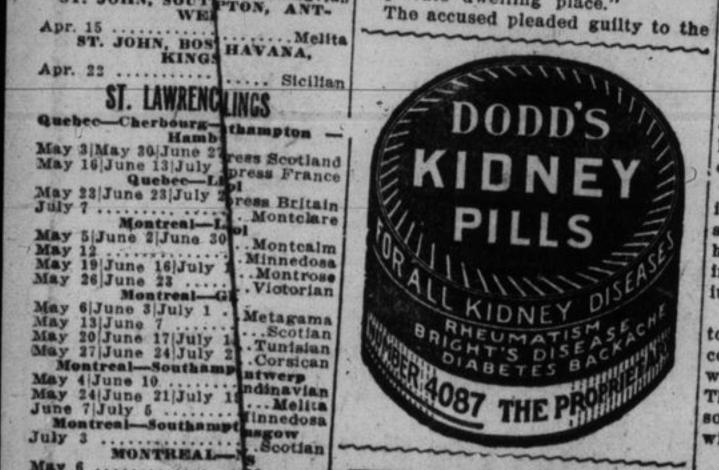

dropped out of sight. An hour later Tommy and his father were showing the sketch book before the squire. The squire recognized it well about the village. The man was arrested and he confessed Mr. Gainsborough thought the matter over. Then he bought his son

This double track arrangement for door hanging permits the opening of a door at any point, which is an important feature.-L. Stevenson, Secretary, Dept. of Agriculture, Toronto.

ARE THE IMPLEMENTS READY?

A Question That the Prudent Farmer

Will Keep In Mind. With tillage and harvesting machof the various causes which have period and with farm men not as Toronto General hospital, as nurse- fore allowing the foal to commence their time. Fifty per cent, efficiency is too low for any implement or tool trouble, so that the cause should be only to those who take care of their With the exception of those cases | weather when not in use and keep

Keeping Celery.

At a constant temperature of 32 degrees Fahr., celery can be kept for several months, and placed on the market as fresh looking as the day it was cut. Recent experiments at the Ontario Government Cold Storage Station at Brighton, bear out this statement, which knowledge will prove of immense value to growers. To obtain the best results from cold storage, celery should be well grown, partially bleached, cut with part roots on, with a little roughage left for protection; and finally, cut, hauled and placed in cold storage the same day.

If home-made lime-sulphur solution is to be used, make it now and store till needed. made, and the seed of the early be kept in check by spraying, with green or arsenate of lead.
