The Whig extends hearty congratulations to R. Easton Burns, a popular local chartered accountant and member of the Utilities Commission, on his election, last Friday, to a position on the council of the Institute of Chartered Accountants of Ontario. It is a well-deserved recognition of his outstanding ability in the profession he so worthily represents.

THEN AND NOW.

A contemporary, speaking of a law that requires autoists to stop and ascertain the extent of the injuries caused if they strike any person, remarks that in the olden days no such laws were necessary; that the courtesy and chivalry of knight-hood were enough. But now, thanks to W. F. Nickle, knight-hoods are a thing of the past in this democratic dominion.

While anything that will promote care in the use of the road and enforcement of the law against the reckless is to be welcomed, it is to be questioned if it is altogether fair to our race to-day to picture it as requiring statute laws where courtesy and chivalry were enough before. A glance over the Mosaic law gives the impression that there were some among the ancients who needed official orders to supply a lack of chivalric feeling. In addition to the good manners detailed, in the commandments, there also is something said about an eye for an eye and a tooth for a tooth. The story of the Good Samaritan also refers to some types of old that would pass by on the other side of a man found wounded in the road.

The mere thought of what the Stone Age boys might have done if they had had automobiles is enough to make one tremble. The reckless and unchivalrous surely can be handled to-day without casting reflection upon the entire race every time one of the comparatively few heartless individuals discloses himself. The average Canadian to-day has considerable chivalry.

PROGRESS OF WOMAN.

In all directions, there are evidences that women are pushing earnestly forward to have and to hold their newly acquired rights. In this country they already have a member in the house of commons, and several of them have found seats in provincial legislatures. The number of appointive positions of which they are already in possession is large, and the indications are that it will go on increasing. In short, the sway of woman in Canadian public life is plainly destined to be pervasive and powerful.

In Great Britain women have long been eligible to county councils and the other different bodies engaged in the work of local government. More recently they have won their way into the house of commons. For the present, they are stopped from membership of the house of lords, but the wobbling attitude displayed on the question of their admission by the committee on privileges is sufficient warrant for the assumption that the barriers will ere long be let down.

Even more symptomatic of the trend of the times is the news from Rome that the pope has disregarded the conventions of centuries by installing in his own apartment a woman as house-keeper and wardrobe maid. What this move may ultimately portend it is impossible to say, but it is not without significance that in other Christian sects women have been recently admitted to administrative posts and to the ministry itself. In vain did John Knox protest against the "Monstrous regiment of women." Time was when abbesses attended ecclesiastical councils and presided over joint houses of monks and nuns. In this respect there is no inherent improbability in the supposition that the wheel may come again full circle.

A FOOLISH ENQUIRY.

Scientists do occasionally undertake strange missions, depending on the result for justification of their expenditure of money, time and energy, but surely no body of men ever entered on a more quixotic enterprise than the fourteen savants who have banded themselves together with the object of determining the causes of the recent world war. Every one knows these causes without elucidation from scholars, however eminent. For all practical purposes, they might as well try to decide why two and two make four.

If the enquiry had as its motive the prevention of future wars, which is just what the world needs as much as anything else at the present time, it would be intelligible and deserve encouragement, but apparently the sole objective is to lay the blame for those four years of terror where it belongs, either upon the Allies or the central powers. What good will that do? The war is over, and it will serve no useful end to decide scientifically who was responsible for it, even if the investigation leads, according to promise, to delving into the dusty records of the national libraries of Europe in order to establish or confirm theories regarding the origin of international antipathies. Conceivably, the outcome of such delving might be productive of great harm in leading to a renewal of hostile feelings long since lost in oblivion, and then the last case would be worse than the first.

It strikes the impartial outsider that these learned gentlemen could easily find a more suitable outlet for their abilities than the conduct of what can be at best but a profitless investigation.

Dispatches from Ireland are meagre now. Doubtless they are too busy dispatching one another.

ASOP'S FILM Fables THE MODEL DAIRY

On perfumed grass the cattle browse, And then from udder, contented cows The farmer gets his milk with ease And makes the rich cream into cheese.

Milk with is watered quite a lot, And labeled cream, which it is not. For this is one of many jokes The farmer plays on city folks.

Here is the moral of this fable: You cannot judge things by the label! -Exp. Jr.

GORDON-ARTHUR WEDDING

Took Place at Inverary on Wednesday, June 7th. Inverary, June 9.—The marriage of Miss Margaret B. Arthur, daughter of Mr. and Mrs. Thomas Arthur, Inverary, to J. Roy Gordon, son of Byron Gordon, Glenvale, was celebrated in the home of the bride's parents on Wednesday, June 7th. The youthful bride given away by her father, looked charming in her wedding gown of cream Spanish lace and pearls, draped over an under-dress of baronet satin. She wore a beautiful bridal veil caught with orange blossoms. Her only ornament was a string of pearls with diamond and platinum clasp, the gift of the groom.

The ceremony was performed by Rev. R. Calvert. Owing to the recent deep bereavement in the groom's family only a few of the most intimate friends were present, among them the bride's grandfather and grandmother, who last year celebrated their sixtieth wedding anniversary, and the groom's grandmother, who has passed her eighty-fifth birthday.

The bride is an honorary graduate of Sydenham high school, capturing the Old Boy's scholarship. She is an undergraduate of Queen's and belonged to the 1923 Arts class. The groom followed in the 1920 Science class of Queen's and graduated with honors. Since then he has been engaged in the department of mining and metallurgy at the college. At present he is engaged in the plant at Deloro.

After a wedding dinner was served, the happy couple left, amid showers of confetti and good wishes, for Montreal, the bride travelling in a handsome pair of well embroidered neck piece. They expect to return the early part of next week after which they will go to Deloro for a time.

FARMERS ARE JUBILANT.

Over Increased Cheese Prices—Inverary Budget of News. Inverary, June 8.—Rev. A. Shorten, after an absence of six years, addressed a crowded house on Sunday night. He was attending conference. The Ladies' Aid met at the home of Mrs. Howard Arthur on Sunday. An unusually large number was present. Mrs. Knight, who has been so seriously ill, is improving. Congratulations to Norman Freeman, who was successful in obtaining his M.D. degree. He is writing on the Ontario Council and later on will go to Toronto to try the dominion council examination. The little girl who was reported to have small-pox has recovered, and the placard has been taken down. The largest sale that has been in this country for years was the one at the home of the late William Taylor. Everything brought a high price. The farmers are jubilant over the increase in the price of cheese.

Miss Cochran and her mother are at Thompson Hunter's. The cottages on the shores of Loughboro Lake are being rapidly filled. Miss Olga Arthur and her friend, Miss Helen Shangrow, came from Sydenham on Wednesday to be present at the marriage of the former's sister, Miss Margaret Arthur, to Roy Gordon. B. Sc. Mrs. Fanny Taylor has moved her household effects to W. Moreland's vacant house and will reside with her father and mother for the present.

The United States will intervene in Cuba, July 1st, if local administrative affairs are not straightened out by that time, political observers believe. A crisis in President Zayas' cabinet is expected next week. Elmer E. Brown, chancellor of New York University, denies the charge made by The Nation that his institution is taking steps to bar Jews.
