 HAND CRAFT PROJECTS **HOUSEHOLD MECHANICS**

AND HERE'S HOW YOU MAKE IT
 The bottom of this handy fisherman's box is partitioned to accommodate a reel and the larger pieces of a fishing outfit. The upper part of the box has a tray in which there is space for sinkers, hooks, etc. The cover of the box is constructed so that it is large enough to receive all the lunch you'll want to take with you.
 The top tray may be made of cigar box wood. The tools needed are a saw, hammer, plane and screw driver. Fasten the parts of the box together with glue and No. 18 brads. Hinges and a lock are necessary for fastening on the cover. These are held in place with screws. A leather strap, fastened to the cover with tin strips or round-head screws, makes a good handle.
 As a fishing box is more or less subjected to water it should have a waterproof finish. Several coats of paint or spar varnish will do. To keep your lunch from falling out the box when the lid is lifted, cut a piece of cardboard large enough to fit across the top, to be held in place by tin "buttons" fastened to the end pieces of the cover.

DESTROYING MUSTARD

How to Get Rid of a Very Unwelcome Weed.

Iron Sulphate Will Give Satisfaction—Clean Cultivation Will Eradicate Bladder Campion or Cow Bell—Fitting the Horse Collar an Art.

(Contributed by Ontario Department of Agriculture, Toronto.)

Following is a continuation of last week's discussion on the best methods of destroying certain weeds affecting Ontario farms:

Spraying With Iron Sulphate to Prevent Mustard From Seeding in Cereal Crops.

Iron sulphate or copperas can be successfully used to destroy mustard in standing grain without injury to the crop.

Preparation of Solution.

A 20 per cent. solution should be applied. This can be prepared by dissolving 50 pounds of iron sulphate in forty gallons of water. Iron sulphate is dissolved quite readily in cold water. The solution should be strained through a cheese cloth, as it is put into the spray pump tank. This will remove dirt and small particles that are apt to clog the nozzles.

Time to Apply.

Apply on a calm clear day just as soon as the first few plants in the fields show flowers. It is very important to spray early. If the plants are left too long the treatment is not nearly so effective. If a heavy rain comes within twenty-four hours after the solution is applied, it will be necessary to spray again.

How to Apply the Solution.

An ordinary hand pump barrel sprayer, such as is employed to spray fruit trees may be used, or a potato sprayer can be rigged up to do this work. Many of the up-to-date sprayers have a special broadcast attachment for spraying weeds. These are excellent for large areas, as they cover a wide strip at each round. Care must be taken to see that every Mustard plant is covered with the solution in the form of a fine spray.

The results of the ten years' co-operative experiments show that Mustard may be prevented from seeding in oats, wheat or barley by spraying with a twenty per cent. solution of iron sulphate without any serious injury to the standing crop or to the fresh seedings of clover.—J. E. Howitt, O. A. College, Guelph.

Method of Cultivation For the Eradication of Bladder Campion or Cow Bell.

Badly infested fields should be ploughed deeply in the fall and then cultivated and cross-cultivated with a broad-sharred cultivator in order to break up and weaken the under root-stocks. In the spring this cultivation should be repeated frequently enough to prevent the plant making any growth above ground until it is time to put in a hoed crop, which must be kept thoroughly clean in order to be effective. A well-cared for corn crop planted in hills so that it can be cultivated both ways has been found to give excellent results. Special attention must be given to hoeing out any bladder campion plants which may appear in the corn crop and which are not destroyed by cultivation. One fall and one spring's thorough cultivation, followed by a well cared for hoed crop, has been found to destroy practically all the bladder campion in a field, except in exceptionally wet seasons.—J. E. Howitt.

Fitting the Horse Collar Is an Art

Much trouble results on the average farm each year from sore shoulders on horses, from the improper fitting of collars, and improper adjustment of hames.

The collar should fit the shoulder so that in length there is just room for the flat of one's hand between the collar and the neck at the bottom. In width the collar should fit snugly against the sides of the neck from a point three inches above the shoulder point, to a point about half way up to the top of the neck. The upper one-third to one-half of the collar should be wide enough to allow one to pinch the thick of the hand between the collar and the side of the neck. If the upper part of the neck is thick a "Quarter Sweeney" or "Half Sweeney" collar should be used, so as not to pinch the neck. A collar too wide at the top will produce a sore neck on account of side motion of the collar as the horse walks.

Sweat pads should be avoided as they hold the heat and sweat and produce a tender shoulder, often causing a galled condition.

The hames should be adjusted so as to hold the collar snugly against the sides of the neck, and so as to bring the line of draft right angles to the face of the shoulder as nearly as possible.

The collar should be kept clean by washing with a damp cloth each night when it is removed from the shoulder.

Washing the shoulder each evening with cold salt water will help to toughen the skin and prevent shoulder galls.

Bank Backs Better Bulls.

"Better bulls, bucks, and boars build bigger bank balances," says the First National Bank of Bend, Ore., and to prove it they bought an \$800 Rambouillet buck and 25 pure-bred Rambouillet does to distribute among sheepmen in central Oregon—the first pure-bred sheep in Deschutes County.

Maize is cultivated by the Peruvians at a height of 7,000 feet above the sea.

We guess the kitchenette is plenty large enough for preparing salads and making fudge, which seems to be all a modern young wife needs a kitchen for anyway.

When a man is elevated to a high position it is well to keep in mind the fact that he had to do a lot of hard climbing before he got up to where the elevator starts.

An Announcement

We wish to announce that we have taken the local agency for—

Edison Phonograph and Records

(Successors to J. M. Greene Music Co.)

See us for all the latest Records.

We also carry a complete stock of Brunswick Phonographs and Records.

Musical Instruments of all kinds.

CANADA STEAMSHIP LINES, LIMITED

JOHN F. PIERCE
 PASSENGER TRAFFIC MANAGER

MONTREAL, December 15, 1921.
 A-25

Canadian Daily Newspapers Association,
 902 Excelsior Life Building,
 Toronto, Ontario.

Dear Sirs:

Years ago, the newspaper announcements that were put out by the Canada Steamship Lines, Limited, were merely time tables telling when the ships sailed. Of later years, however, large copy has been run in the daily newspapers in those cities that were fairly accessible to points of sailing, telling of the many attractions that were offered in a trip by boat.

Right through the season for the past few years, boat trips have been most popular. 1920 was the finest passenger year the Company ever had. 1921, despite the fact that business was so unsettled, shows but a 7% decrease in passenger traffic over 1920.

Time after time, ships for special cruises, as, for example, those from Montreal to the Saguenay and from Montreal to Newfoundland, have been filled through advertising in the dailies. Next year, as in the past few years, the daily newspapers will be the backbone of this Company's advertising.

With best wishes, I am,

Yours very truly,

John F. Pierce
 Passenger Traffic Manager.

The ranks of those to whom sea, sky, and scenic beauty call in vacation time, change from day to day as seasons come and go. Advertising thus becomes to them news of the day. They search for it in the daily newspaper which commands immediate consideration as a part of daily life.

Issued by The Canadian Daily Newspapers Association, Head Office, Toronto.

Oh! What a Sale!

That's what they all say when they get at the bargains we are now showing. It's a REAL SALE, and the VALUES ARE VERY REAL. Be fashionable and come to JENKINS' RETIRING SALE. It's where your dollars give you greatest returns.

BATH TOWELS

Just at the first of the season we are giving you a grand chance to lay in a supply of excellent towels at very low prices.

Reg. 40c. for 30c.
 Reg. 50c. for 39c.
 Reg. \$1.00, for 60c.
 Reg. \$1.25, for 80c.
 Reg. \$1.50, for 95c.
 Reg. \$2.00, for \$1.05

BATHING SUITS

Ladies' All-wool Suits, featuring the new style and color combinations. —\$4.25—

Men's All-wool One-piece Skirt Style Suits. Sizes 36 to 42. —\$8.85—

Men's Cotton Bathing Suits. One piece skirt style. —\$1.00—

Boys' Cotton Suits —75c—

SOFT COLLARS

Your choice of our full range of Soft Collars. Sizes 15 1/2 to 17 1/2 20c. and 25c.
 Tooke's Kant Krease. The most popular Collar on the market in Canada. Sized in quarters from 12 1/2 to 18. 80c. each, 7 for \$2.00

ENGLISH GOLF CAPS

Just received from the Old Country, an all wool hand-woven Connemara Tweed Cap—Silk lined with Russia leather sweat. To see it is to desire it. —\$2.50—

MEN'S SUITS
 We only sell good Suits

That is the reason why we are selling so many now, when you may take your choice at a discount of

40%

from regular prices. If it's a Dress Suit for the June Ball, get it here less 40%. Tailored by Fashion-Craft.

OUTING TROUSERS

All Wool Grey Flannel Trousers, exceptionally well tailored. —\$3.95—

MEN'S KHAKI DRILL —\$1.95—

YOUTHS' KHAKI DRILL —\$1.05—

BOYS' KHAKI KNICKERS —\$1.19—

OUTING SHIRTS

Lightweight Grey Flannellet-Collar attached or separate collar to match. 14 1/2 to 16 1/2. —\$1.25—

White Shirts with attached Collars and free necks. Regularly \$1.75 to \$2.00. —\$1.95 to \$2.00—

Here is the Question, can you afford to go without some of these values?

PANAMA HATS

Ladies' Panamas, untrimmed, regular \$2.00 \$1.30
 Men's Toyo Panamas, black and colored bands. Regular \$2.50 to \$3.50 \$1.50
