NTARIO'S forest wealth is dwindling. Every year forest fires take disastrous toll. Careless campers cause eleven per cent. of Ontario's forest fires. Last summer 112 cases of neglected camp fires were reported. This summer be careful.

Save Ontario's Forests They're Yours

DONT DON'T take chances with fire in Ontario's forests. DON'T throw away cigarette or cigar butts, pipe "heels" or burnt matches until you are dead sure they

DON'T neglect to drown out

DON'T build your camp fire guinst a rotten log or tump — nor on windy into; nor near moss Build it in a former fire-place, or on a flat rock, or on a spot cleared down to the true soil below, or by the edge of the water. DON'T forget that the upper layer of ground in the

When you build your fire to make tea, fry bacon or add cheer to pipe and story-telling time, use a woodsman's precautions.

The real woodsman builds his fire on an old fireplace, if there be one handy. Failing that he scrapes away all litter, moss and fibrous rotted wood down to the mineral soil, or the bare rock, and preferably some place close to the water. He knows that if fire gets into the moss or the upper woody layer of forest soil, or in a half-rotted log or stump, it "holds over," burns away unnoticed underneath, and unless fellowed up and carefully put out, is liable to break into a flame later. He knows how hard it is to put such deep-smouldering fire out. So he makes his cooking fire surprisingly small and compact, and chooses a spot that is absolutely safe.

It is a mark of his finished woodsmanship how thoroughly he drowns his fire out with plenty of water when he is through with it. Save the forests. You may want to camp again.
