As It is Insufficient—This is Road and Railway Wage.

There is a considerable demand for labor, but owing to the low rate of wages offered, the married men decline to accept the jobs and they are picked up by the young single men. Married men claim that they cannot accept 25 cents an hour on jobs that will only last for a few weeks or three months at the most, as it will only pay for their food from day to day and not permit them to live over the winter months when there is no work of any kind.

On the other hand, there are lots of young fellows glad of the opportunity to get something to do for the summer months. Outdoor work appeals to them, and 25 cents an hour for ten hours is better than nothing. The rate of wages appears to be set by the townships, and the railway construction and road work—all of the unskilled class and, therefore, calling for no previous experience.

Farmers are paying from \$30 to \$35 a month for farm labor. A man to get that money is expected to be able to plough and milk cows, but it is stated that not more than one man in ten seeking work can do one or both. It is, therefore, difficult to place on farms all of the men who apply.

The highway work is taking a lot of young single men, as married men are refusing to accept the rates of pay offered, viz., 25 cents an hour. It is not the nature of the work gives them a reasonable claim for higher wages, but their inability to live and lay up anything against the long winter, but fuel and pay rent.
